What Art Is Michelle Kamhi, Louis Torres, 2016-05-26 What is art? The arts establishment has a simple answer: anything is art if a reputed artist or expert says it is. Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century, today's critics claim that all such work, however incomprehensible, is art. A groundbreaking alternative to this view is provided by philosopher-novelist Ayn Rand (1901–1982). Best known as the author of *The Fountainhead* and *Atlas Shrugged*, Rand also created an original and illuminating theory of art, which confirms the widespread view that much of today's purported art is not really art at all. In *What Art Is*, Torres and Kamhi present a lucid introduction to Rand's esthetic theory, contrasting her ideas with those of other thinkers. They conclude that, in its basic principles, her account is compelling, and is corroborated by evidence from anthropology, neurology, cognitive science, and psychology. The authors apply Rand's theory to a debunking of the work of prominent modernists and postmodernists—from Mondrian, Jackson Pollock, and Samuel Beckett to John Cage, Merce Cunningham, and other highly regarded postmodernist figures. Finally, they explore the implications of Rand's ideas for the issues of government and corporate support of the arts, art law, and art education. This is one of the most interesting, provocative, and well-written books on aesthetics that I know. While fully accessible to the general reader, *What Art Is* should be of great interest to specialists as well. Ayn Rand's largely unknown writings on art—especially as interpreted, released from dogma, and smoothed out by Torres and Kamhi—are remarkably refined. Moreover, her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling. Anyone interested in aesthetics, in the purpose of art, or in the troubling issues posed by modernism and post modernism should read this book. —Randall R. Dipert Author of *Artifacts, Art Works, and Agency* Torres and Kamhi effectively situate Rand's long-neglected esthetic theory in the wider history of ideas. They not only illuminate her significant contribution to an understanding of the nature of art; they also apply her ideas to a trenchant critique of the twentieth century's 'advanced art.' Their exposure of the invalidity of abstract art is itself worth the price of admission. —Chris Matthew Sciabarra Author of *Ayn Rand: The Russian Radical* Rand's aesthetic theory merits careful study and thoughtful criticism, which Torres and Kamhi provide. Their scholarship is sound, their presentation is clear, and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to considerations of her work. —Stephen Cox University of California, San Diego

Blurring Intelligence Crime Willem Bart de Lint, 2021-03-14 This book explores the conundrum that political fortune is dependent both on social order and big, constitutive crime. An act of outrageous harm depends on rules and protocols of crime scene discovery and forensic recovery, but political authorities review events for a social agenda, so that crime is designated according to the relative absence or presence of politics. In investigating this problem, the book introduces the concepts 'intelligence crime' and 'critical forensics.' It also reviews as an exemplar of this phenomenon 'apex crime,' a watershed event involving government in the support of a contested political and social order and its primary opponent as the obvious offender, which is then subject to a confirmation bias. Chapters feature case study analysis of a selection of familiar, high profile crimes in which the motives and actions of security or intelligence actors are considered as blurred or smeared depending on their interconnection in transactional political events, or according to friend/enemy status.

Blurred Borders Jorge Duany, 2011-09-12 In this comprehensive comparative study, Jorge Duany explores how migrants to the United States from Cuba, the Dominican Republic, and Puerto Rico maintain multiple ties to their countries of origin. Chronicling these diasporas from the end of World War II to the present, Duany argues that each sending country's relationship to the United States shapes the transnational experience for each migrant group, from legal status and migratory patterns to work activities and the connections migrants retain with their home countries. Blending extensive ethnographic, archival, and survey research, Duany proposes that contemporary migration challenges the traditional concept of the nation-state. Increasing numbers of immigrants and their descendants lead what Duany calls bifocal lives, bridging two or more states, markets, languages, and cultures throughout their lives. Even as nations attempt to draw their boundaries more clearly, the ceaseless movement of transnational migrants, Duany argues, requires the rethinking of conventional equations between birthplace and residence, identity and citizenship, borders and boundaries.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist-an informational topologist with half his mind gone-as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Current Challenges in Migration Policy and Law Emília Lana de Freitas Castro, Sergio Maia Tavares Marques, 2020-01-01 This book emerges from those fruitful discussions as a collection of some of the matters presented, whose authors have virtuously stood out. Just as the previous books that arose from other TMC editions, Current Challenges in Migration Policy and Law gives the opportunity not only to experienced professors and researches but especially to young scholars to divulge their studies and present their experiences in the various research fields migration can be discussed, rethought and further developed. We are thankful to Transnational Press London as it believed in our aspirations as editors and it stimulated us to be protagonists in the process of editing and building up this book the way we believed it would contribute to the current discussions on migration. As scholars and young researchers, we are delighted by this opportunity created by Professor Sirkeci.

“International migration is one of the most challenging and critical factors shaping the future of societies and economies today. Its accumulated complexity challenges academics, politicians, professionals and citizens. Bringing together the voices of authors from diverse countries and backgrounds, belonging to a new generation of researchers, this book brings new clues to understand how modern policies are built and new tools to act for a better world.” – João Peixoto, Lisbon School of Economics and Management (ISEG), Universidade de Lisboa, Portugal
