Craft Bookbinding Linda Orriss,2014-07-31 Craft Bookbinding introduces some of the numerous binding styles that can be achieved with little or no experience, from simple structures that can be made with folded paper to the classic case binding. Techniques for handling paper and glue are explained in detail, along with a range of different methods of sewing and a variety of cases to be used as covers. There are various ideas for how the different binding styles can be lettered. Lavishly illustrated with photographs and diagrams, clear instructions describe the bindings, which can be adapted to bind books that are uniquely yours. There is a guide to adapting or making tools, plus specialist equipment and an emphasis on best practice so the skills can be developed and used as a foundation for fine binding. Lavishly illustrated with 73 colour photographs and 17 diagrams.

A Small Book of Practical Sewings Richard W. Horton,1997 This book is an excellent source of 23 sewings executed for the Fundamentals of Conservation Treatment course taught by Guy Petherbridge at Columbia University, 1988-89. Written for the bookbinder or apprentice seeking a reliable guide to a small number of exemplary, practical and much used sewings. It has all the sewings needed for beginning and intermediate binding classes, put forth in unambiguous language, and aided by easy-to-interpret line drawings. This book represents a wide variety of sewings used in every part of the world throughout the history of the codex book form. Sewing styles discussed take into consideration the size of the book, its intended use, the relative drape and thickness of the paper used, the size and quantity of sections, regional and personal quirks, and binding traditions.

Bookbinding & Conservation by Hand Laura S. Young,1995 The heart of this working guide is the three chapters dealing with techniques and the chapter on conservation. Basic Techniques detail the fundamental skills that are applicable to all hand bookbinding. General Techniques include those practices that, with minor variations, cover the early stages in all types of bindings. Specific Techniques describe the steps primarily used in producing a specific type of hand binding. The basic principles of conservation work cover one of the more important areas in the field of hand bookbinding today.

The Silver Cord Shirley Brooks,2018-01-31 Excerpt from The Silver Cord: A Novel Only half past five, he said, as he reached his own pleasant house in Gurdon Terrace. Walter, a high-spirited, dark-eyed boy of ten years old, heard his father's latch-key, and was in a moment tearing down the stairs with that cataract rush peculiar to the species. Bookbinding and the Care of Books Douglas Cockerell,2021-03-20 Book Excerpt: remain uninjured (see fig. 1, B). This was all very well for the gold, but a book so treated does not open fully, and indeed, if the paper is stiff, can hardly be got to open at all. To overcome both difficulties the hollow back was introduced, and as projecting bands would have been in the way, the sewing cord was sunk in saw cuts made across the back of the book.[Illustration: FIG. 1.]The use of hollow backs was a very ingenious way out of the difficulty, as with them the backs could be made to throw up, and at the same time the leather was not disturbed (see fig. 1, C). The method of sawing in bands was known for a long time before the general use of hollow backs. It has been used to avoid the raised bands on books covered with embroidered material.If a book is sewn on tapes, and the back lined with leather, there is no serious objection to a carefully-made hollow back without bands. The vellum binders use hollow backs made in this way for great account books that stand an immenRead More

English Embroidered Bookbindings Cyril Davenport,2016-08-01 New series of 'Books about Books,' exclusively English in its aims, may seem to savour of the patriotism which, in matters of art and historical research, is, with reason enough, often scoffed at as a treacherous guide. No doubt in these pleasant studies patriotism acts as a magnifying-glass, making us unduly exaggerate details. On the other hand, it encourages us to try to discover them, and just at present this encouragement seems to be needed. There are so many gaps in our knowledge of the history of books in England that we can hardly claim that our own dwelling is set in order, and yet many of our bookmen appear more inclined to re-decorate their neighbours' houses than to do work that still urgently needs to be done at home. The reasons for this transference of energy are not far to seek. It is quite easy to be struck with the inferiority of English books and their accessories, such as bindings and illustrations, to those produced on the Continent. To compare the books printed by Caxton with the best work of his German or Italian contemporaries, to compare the books bound for Henry, Prince of Wales, with those bound for the Kings of France, to try to find even a dozen English books printed before 1640 with woodcutsx (not imported from abroad) of any real artistic merit—if any one is anxious to reinforce his national modesty, here are three very efficacious methods of doing it! On the other hand, English book-collectors have always been cosmopolitan in their tastes, and without leaving England it is possible to study to some effect, in public or private libraries, the finest books of almost any foreign country. It is small wonder, therefore, that our bookmen, when they have been minded to write on

No one can become a skilled workman by reading text-books, but to a man who has acquired skill and practical experience, a text-book, giving perhaps different methods from those to which he has been accustomed, may be helpful.My thanks are due to many friends, including the workmen in my workshop, for useful suggestions and other help, and to the Society of Arts for permission to quote from the report of their Special Committee on leather for bookbinding.I should also like to express my indebtedness to my master, Mr. T. J. Cobden-Sanderson, for it was in his workshop that I learned my craft, and anything that may be of value in this book is due to his influence.

Fine Bookbinding Jen Lindsay,2009 The purpose of this book is to guide the reader through the sequence of operations involved in creating a book bound in leather, or a fine binding. The author defines a fine binding as a book fully covered in leather, with leather-jointed endpapers, gilt edges, and leather doublures. Although a basic knowledge of bookbinding terms and techniques is assumed, this book is meant for both novice and experienced bookmakers.The book is intended to be used as an active guide during the process of fine binding. It is arranged into sixteen sections, listing the sequence of operations, beginning with preliminary work and ending with preparing and putting in leather doublures. Each section includes appropriately numbered instructions allowing the user to find his or her place in the sequence of operations with a reference for what step is next. There are also numbered explanatory sections that include a rationale (why you do it) and technique (how you do it). The work includes close to 300 black and white illustrations, four appendices, and a bibliography.
