Burning Ginger Lazarus, 2022-01-18 Synopsis: It's 2008, at the height of the second Gulf War, and Don't Ask Don't Tell still bans LGBTQ service members from revealing their truth. Cy Burns, discharged from the Army for coming out, now takes on the world with her words, blogging from her rural country store where she and her employee, Sammy, elicit a mix of admiration and homophobia. When local infantryman Cole begs for Cy's help in wooing east coast transplant Rose, she volunteers to ghost write his courtship and keep her own admiration for Rose silent. Meanwhile, the return of her former commander revives old grudges and forces Cy to confront the darkest days of her military past. When Cole is deployed, Cy not only keeps the love letters coming but charts a dangerous course to expose Dulac's complicity in unspeakable crimes. In love and war, words unspoken are the words that burn. Cast Size: 2 Females, 3 Males

Enabling Creative Chaos Katherine K. Chen, 2009-09-15 In the summer of 2008, nearly fifty thousand people traveled to Nevada's Black Rock Desert to participate in the countercultural arts event Burning Man. Founded on a commitment to expression and community, the annual weeklong festival presents unique challenges to its organizers. Over four years Katherine K. Chen regularly participated in organizing efforts to safely and successfully create a temporary community in the middle of the desert under the hot August sun. Enabling Creative Chaos tracks how a small, underfunded group of organizers transformed into an unconventional corporation with a ten-million-dollar budget and two thousand volunteers. Over the years, Burning Man's organizers have experimented with different management models; learned how to recruit, motivate, and retain volunteers; and developed strategies to handle regulatory agencies and respond to media coverage.

This remarkable evolution, Chen reveals, offers important lessons for managers in any organization, particularly in uncertain times.

Rootkits For Dummies Larry Stevenson, Nancy Altholz, 2006-12-11 A rootkit is a type of malicious software that gives the hacker root or administrator access to your network. They are activated before your system's operating system has completely booted up, making them extremely difficult to detect. Rootkits allow hackers to install hidden files, processes, and hidden user accounts. Hackers can use them to open back doors in order to intercept data from terminals, connections, and keyboards. A rootkit hacker can gain access to your systems and stay there for years, completely undetected. Learn from respected security experts and Microsoft Security MVPs how to recognize rootkits, get rid of them, and manage damage control. Accompanying the book is a value-packed companion CD offering a unique suite of tools to help administrators and users detect rootkit problems, conduct forensic analysis, and make quick security fixes. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Crash Course in Technology Planning Christopher D. Brown, 2016-07-18 This easy-to-use primer will empower anyone—even those with no IT background—to face the challenge of adding one or more technologies to library services or maintaining existing technologies. Most of the public libraries in the United States are operating on tight budgets without allocation for IT personnel; in school libraries, the librarian often takes on the lion's share of IT responsibility. This book is an invaluable guide for library staff members who are put in the position of maintaining their own networks and

computers with very little training or support. Authored by an assistant library director with years of firsthand experience working as a solo IT manager within public libraries, this guide provides practical information about overcoming the unique challenges of managing IT in a smaller organization, juggling multiple job roles, being limited by a restrictive budget, and working directly with the public. *Crash Course in Technology Planning* addresses a wide variety of IT topics in the library sphere, providing information in a logical manner and order. It begins with an explanation of triaging existing IT issues, then moves into diagnosing and repairing both individual PCs as well as the library Local Area Network (LAN). The following chapters cover other important topics, such as the best way to inventory computers and equipment, how to budget for and procure new equipment, and recommended ways for an IT layperson to set and achieve goals.

Florida Stephen J. Pyne, 2016-03-31 In this important new collection of essays on the region, Stephen J. Pyne colorfully explores the ways the region has approached fire management. Florida has long resisted national models of fire suppression in favor of prescribed burning, for which it has ideal environmental conditions and a robust culture. Out of this heritage the fire community has created institutions to match. The Tallahassee region became the ignition point for the national fire revolution of the 1960s. Today, it remains the Silicon Valley of prescription burning. How and why this happened is the topic of a fire reconnaissance that begins in the panhandle and follows Floridian fire south to the Everglades.

Olde Cotswold Punishments Nell Darby, 2011-04-01 Look beyond the pretty cottages and gentle landscapes of the Cotswolds, and you will find a dark history of crime and punishment. From child thieves, poachers, conmen, prostitutes and would-be suicides to bigamists, highwaymen and murderers, the Cotswolds has had its fair share of criminals – treated in what appears to us today to

be an arbitrary and often unduly harsh manner by judges and juries. What crimes were committed in this rural society in the past, and how were they punished? This book looks at the variety of punishments bestowed to miscreants – from being hanged from a portable gallows at the scene of a crime to transportation or hard labour – and why some were punished more than others. Evidence is taken from contemporary sources: prison records, newspaper accounts and broadsides that celebrated the lives and deaths of local characters. It is a fascinating and shocking read.

Into the Fire Shelley Pacholok, In August 2003, one of the largest wildfires in Canadian history struck near Kelowna, British Columbia and the surrounding Okanagan Valley, causing unprecedented damage. As Shelley Pacholok observes in this innovative study, the turbulence and extreme conditions that followed in the wake of this disaster destabilized an important area of social life – that of gender relations. Into the Fire combines insights from gender studies and disaster studies to explore the extent to which notions of “masculinity” and “femininity” are challenged in the wake of crises. Pacholok focuses on how gender relations were simultaneously sustained and disrupted among those who fought the fire, drawing on media representations as well as interviews with firefighters . Into the Fire illuminates how disasters can serve as catalysts for new patterns of gender, even in

highly masculine spaces.

The Great Agrarian Conquest Neeladri Bhattacharya, 2019-09-01 Groundbreaking analysis of how colonialism created new conceptual categories and spatial forms that reshaped rural societies. This book examines how, over colonial times, the diverse practices and customs of an existing rural universe—with its many forms of livelihood—were reshaped to create a new agrarian world of settled farming. While focusing on Punjab, India, this pathbreaking analysis offers a broad argument about the workings of colonial power: the fantasy of imperialism, it says, is to make the universe afresh. Such radical change, Neeladri Bhattacharya shows, is as much conceptual as material. Agrarian colonization was a process of creating spaces that conformed to the demands of colonial rule. It entailed establishing a regime of categories—tenancies, tenures, properties, habitations—and a framework of laws that made the change possible. Agrarian colonization was in this sense a deep conquest. Colonialism, the book suggests, has the power to revisualize and reorder social relations and bonds of community. It alters the world radically, even when it seeks to preserve elements of the old. The changes it brings about are simultaneously cultural, discursive, legal, linguistic, spatial, social, and economic. Moving from intent to action, concepts to practices, legal enactments to court battles, official discourses to folklore, this book explores the conflicted and dialogic nature of a transformative process. By analyzing this great conquest, and the often silent ways in which it unfolds, the book asks every historian to rethink the practice of writing agrarian history and reflect on the larger issues of doing history. “The Great Agrarian Conquest is a subtle and substantial work of scholarship. If there is one book Indians need to read to understand how colonialism actually worked (or did not work), this is it.” — Ramachandra Guha, in *The Wire*, in praise of the Indian edition

Charleston is Burning! Daniel J. Crooks, 2009 From the days of bucket brigades and private

volunteer companies--such as the Phoenix, the Axemen and the Eagle--Charleston has seen more than its fair share of conflagrations. A carelessly overturned candle could ignite a blaze that would consume hundreds of Charleston's closely built wooden structures within just a few hours, leaving large swaths of the city in ruins. Join Charleston native and local historian Danny Crooks as he relates the story of Charleston's many historic fires and firefighting efforts, starting as early as 1698 and continuing through the horrors of the Great Fire of 1861 and the establishment of the Charleston Fire Department in the 1880s.

The Revolution Will Not Be Downloaded Tara Brabazon, 2008-01-31 This book attacks the often implicit and damaging assumption that 'everyone' is online and that 'everyone' is using online resources within the specified parameters of employers, government and national laws. This book summons a critical Web Studies, asking not only who is using particular applications, but also how and why. This remedial work is required. The concept and label of 'Web 2.0' is part of a wide-ranging suite of assumptions that offer simple answers to difficult questions. The term captures a desire for online collaboration and the sharing of information, performed most visibly through blogs, podcasts and wikis. Other 'products' that capture the Web 2.0 ideology include Google Maps, Facebook, MySpace and Flickr. Within this framework, websites no longer hold information but become a platform to connect applications with users. The business applications have gained the most attention - particularly content syndication - but there are also 'political' initiatives overlaying this project including open communication, the sharing of data and the deep linking of web architecture. Development of innovative concepts and models to manage the digital divide Evocative studies of the digitally excluded and downloading communities Attention to digital literacy and online education

Biomass Burning in South and Southeast Asia, Two Volume Set Krishna Prasad

Vadrevu, Toshimasa Ohara, Christopher Justice, 2021-11-05 The increasing intensity and frequency of natural disasters all around the world has caused severe socioeconomic impacts, especially in South and Southeast Asia. This region is particularly susceptible to vegetation fires, leading to biomass burning pollution with impacts on other countries through trans-boundary air pollution. Despite the growing body of information on biomass pollutants worldwide, only a modest amount of data from these regions are available. With fires and biomass burning identified as a vital issue in South/Southeast Asia, this two-volume set was created to meet community research and application needs. To better serve the atmospheric, environmental, and remote sensing communities, and to address air quality, climate, and the human health impacts of greenhouse gases and aerosols from biomass burning, this set brings together the collective achievements of experts in these regions and the state-of-the-art technologies and spatial analyses to model and monitor biomass burning events and their impacts. This first volume covers various topics on fire, biomass burning, mapping and monitoring while the second volume highlights the impact of biomass burning on the biosphere and reflects extensive research by interdisciplinary teams of experts. This set will serve as a valuable resource for remote sensing scientist, geographers, ecologists, atmospheric scientists, environmental scientists, and all who wish to advance their knowledge on fires, biomass burning, and biomass burning pollution in South/Southeast Asia Specific Features: Unique in its discussion of the sources and the causes of biomass burning and atmospheric research in South and Southeast Asia. Explains how remote sensing and geospatial technologies help the mapping and monitoring of biomass burning events and their impacts. Focuses on large spatial scales integrating top-down and bottom-up methodologies. Addresses the pressing issues of environmental pollution that are rampant in South and Southeast Asia. Includes contributions from global experts currently working on biomass burning

projects in the US, Japan, South/Southeast Asia, and Europe.
