The 12 O'Clock High Logbook Allan T. Duffin,Paul Matheis,2005-09-30 Since its original release The 12 O'Clock High Logbook: The Unofficial History of the Novel, Motion Picture, and TV Series has been a consistent seller among WWII buffs, lovers of aviation, and fans of Hollywood TV and movies. The book, a labor of love for co-authors Allan T. Duffin and Paul Matheis, is a detailed, comprehensive look at a media phenomenon. Army Air Force officers Beirne Lay, Jr., and Sy Bartlett wrote the novel 12 O'Clock High as a somewhat fictionalized record of their experiences in England during World War II. Twentieth Century-Fox optioned the book and produced the 1949 movie version starring Gregory Peck as tough-as-nails Brigadier General Frank Savage. In 1964, prolific producer Quinn Martin (The Untouchables, The FBI) brought 12 O'Clock High to television as a weekly series on ABC, starring Robert Lansing as Savage. Packed with fresh interviews, rare photographs, and behind-the-scenes stories published for the first time anywhere, The 12 O'Clock High Logbook is the definitive history of this unique tale of heroism in World War II.

Excel Senior High School Peter Metcalfe,Roger Metcalfe,2004 This book contains coverage of the HSC Modules of the HSC Engineering Studies course, as well as material relevant to Year 12 students of similar courses in other States, such as the Engineering Technology course in Queensland. (From back cover).

The Greenhouse Gas Protocol ,2004 The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions.

Commercial Aviation Safety, Sixth Edition Stephen K. Cusick,Antonio I. Cortes,Clarence C. Rodrigues,2017-05-12 Up-To-Date Coverage of Every Aspect of Commercial Aviation Safety Completely revised edition to fully align with current U.S. and international regulations, this hands-on resource clearly explains the principles and practices of commercial aviation safety—from accident investigations to Safety Management Systems. Commercial Aviation Safety, Sixth Edition, delivers authoritative information on today's risk management on the ground and in the air. The book offers the latest procedures, flight technologies, and accident statistics. You will learn about new and evolving challenges, such as lasers, drones (unmanned aerial vehicles), cyberattacks, aircraft icing, and software bugs. Chapter outlines, review questions, and real-world incident examples are featured throughout. Coverage includes: • ICAO, FAA, EPA, TSA, and OSHA regulations • NTSB and ICAO accident investigation processes • Recording and reporting of safety data • U.S. and international aviation accident statistics • Accident causation models • The Human Factors Analysis and Classification System (HFACS) • Crew Resource Management (CRM) and Threat and Error Management (TEM) • Aviation Safety Reporting System (ASRS) and Flight Data Monitoring (FDM) • Aircraft and air traffic control technologies and safety systems • Airport safety, including runway incursions • Aviation security, including the threats of intentional harm and terrorism • International and U.S. Aviation Safety Management Systems

The Regulation of Organised Civil Society Jonathan Garton,2009-06-25 Although much has been written on organised civil society – the loose collective of organisations that operate outside the public sector, the private market and the family unit – over the past 30 years, there has been little jurisprudential analysis. This is in spite of the fact that a number of jurisdictions, including England, New Zealand, Northern Ireland and Scotland, have recently implemented major reforms to the regulatory frameworks in which civil society organisations operate, with a particular emphasis on the charitable sectors. Redressing the balance, this monograph considers from first principles when it is appropriate to regulate organised civil society and how that regulation might best be accomplished. Four broad issues are addressed: (a) whether the activities undertaken by civil society organisations are distinct from the activities undertaken by the state or the market, either because they are pursued in unique ways, or because they produce unique outcomes; (b) if so, whether it is justifiable to regulate organised civil society activities in a sector-specific way; (c) if it is, whether the peculiar characteristics of these activities make one type of regulation more appropriate than another; and (d) whether it is appropriate to distinguish between charities and other civil society organisations for regulatory purposes. The monograph integrates the traditionally separate disciplines of civil society theory and regulation theory to provide answers to these questions and advance a rudimentary theory of regulation specific to organised civil society.

Guidelines for Drinking-water Quality World Health Organization,1993 This volume describes the methods used in the surveillance of drinking water quality in the light of the special problems of small-community supplies, particularly in developing countries, and outlines the strategies necessary to ensure that surveillance is effective.

Internet Governance Lee A. Bygrave,Jon Bing,2009-01-22 The question of governance of the Internet is increasing in significance. The United Nations' World Summit on the Information Society, held in two phases in 2003 and 2005, provoked heated debate, and the resultant meetings of the Internet Governance Forum that followed this have been the subject of growing public and media interest. Yet governance of the Internet is multifaceted, complex, and far from transparent, and there has been little written about the subject which is detailed, systematic, and non-polemical. This book focuses on the issues involved in the ongoing development of Internet governance, and the challenges associated with developing and applying governance structures at a global level based on bottom-up, consensus-seeking decision-making procedures, without direct foundation in a treaty frame-work. Leading academics and practitioners studying and working in the area of Internet governance explore such issues as how the engineering of infrastructure matters, how legitimacy is gained and retained by governance organizations, and whether elements of such organizations can provide a model for other organizations to emulate. They examine the

tensions inherent in Internet governance, such as government control versus digital libertarianism; commercialism versus civil society ideals; interests of developed countries versus interests of developing countries. The book will be of interest to academics, researchers, and students of Information and Communications Technology, legal aspects of ICT, and Organization Studies, as well as legal practitioners, government bodies, NGOs, and others concerned with Internet governance.
