Uruguay International Monetary Fund. Western Hemisphere Dept.,2018-01-31 This Selected Issues paper investigates the impact of exchange rate movements on private consumption in Uruguay. Uruguay is a highly dollarized economy, which makes the relationship between exchange rate movements and private consumption particularly complex. The paper shows that a large share of Uruguayan households is liquidity constrained, which allows the transitory real income shocks brought about by exchange rate pass-through to have a significant impact on consumption. Moreover, exchange rate pass-through is highly heterogenous, with relative prices of durables increasing (decreasing) following a depreciation (appreciation). This creates incentives for households to engage in intertemporal substitution where they buy durables when they are relatively cheaper. Data from Input—Output tables show that Uruguay produces a nontrivial amount of the tradable, durable goods it consumes, opening the door to contractionary depreciations. The results offer a potential explanation for the often noted 'excess volatility of consumption' in emerging markets for the case of Uruguay.

Hospital Accommodation for Children and Young People NHS Estates,2005 This publication sets out best practice guidance on the design of healthcare facilities for children and adolescents, with the aim of creating a child-centred built environment. It is primarily intended for new-builds and upgrades of existing childrens facilities. Central considerations are alleviating fear and anxiety, maximising security and safety, reducing boredom, and creating a healing environment. Facilities should also cater for parents and siblings. Issues discussed include: general functional and design considerations, including patient groups, capacity planning, space, access and security requirements, play facilities and privacy aspects; design of specific service areas, including reception, out-patient and in-patient facilities; engineering services; and cost information.

Facilities for Rehabilitation Services NHS Estates,2004 This publication contains guidance on the planning and design of facilities for rehabilitation services provided within acute general hospitals, as well as in a range of community settings. It adopts a modular approach to the topic, which describes facilities for separate elements of a general rehabilitation service that can be put together as circumstances require and according to local needs, to achieve good management and value for money in capital and revenue terms. Recognition is given to the need to make decisions locally, as close to the patient as possible, and the involvement of service users and representatives in the planning and design process is encouraged. Sections cover: general service considerations; environment and design considerations, operational aspects including health and safety, catering and domestic services, health records service and IT; general planning issues including parking, entrance and reception areas, clinical and therapeutic spaces; engineering considerations; and cost information. It also includes case studies of four different settings and a patient's perspective of using the services of a rehabilitation unit. This publication supersedes the previous edition (ISBN 0113224516) published in 2000.

Transactional Memory. Foundations, Algorithms, Tools, and Applications Rachid Guerraoui,Paolo Romano,2014-12-29

The advent of multi-core architectures and cloud-computing has brought parallel programming into the mainstream of software development. Unfortunately, writing scalable parallel programs using traditional lock-based synchronization primitives is well known to be a hard, time consuming and error-prone task, mastered by only a minority of specialized programmers. Building on the familiar abstraction of atomic transactions, Transactional Memory (TM) promises to free programmers from the complexity of conventional synchronization schemes, simplifying the development and verification of concurrent programs, enhancing code reliability, and boosting productivity. Over the last decade TM has been subject to intense research on a broad range of aspects including hardware and operating systems support, language integration, as well as algorithms and theoretical foundations. On the industrial side, the major players of the software and hardware markets have been up-front in the research and development of prototypal products providing support for TM systems. This has recently led to the introduction of hardware TM implementations on mainstream commercial microprocessors and to the integration of TM support for the world's leading open source compiler. In such a vast inter-disciplinary domain, the Euro-TM COST Action (IC1001) has served as a catalyzer and a bridge for the various research communities looking at disparate, yet subtly interconnected, aspects of TM. This book emerged from the idea having Euro-TM experts compile recent results in the TM area in a single and consistent volume. Contributions have been carefully selected and revised to provide a broad coverage of several fundamental issues associated with the design and implementation of TM systems, including their theoretical underpinnings and algorithmic foundations, programming language integration and verification tools, hardware supports, distributed TM systems, self-tuning mechanisms, as well as lessons learnt from building complex TM-based applications.

  Neural Information Processing Long Cheng,Andrew Chi Sing Leung,Seiichi Ozawa,2018-12-03 The seven-volume set of LNCS 11301-11307, constitutes the proceedings of the 25th International Conference on Neural Information Processing, ICONIP 2018, held in Siem Reap, Cambodia, in December 2018. The 401 full papers presented were carefully reviewed and selected from 575 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The 4th volume, LNCS 11304, is organized in topical sections on feature selection, clustering, classification, and detection.

  Proceedings of the Future Technologies Conference (FTC) 2019 Kohei Arai,Rahul Bhatia,Supriya Kapoor,2019-10-12 This book presents state-of-the-art intelligent methods and techniques for solving real-world problems and offers a vision of future research. Featuring 143 papers from the 4th Future Technologies Conference, held in San Francisco, USA, in 2019, it covers a wide range of important topics, including, but not limited to, computing, electronics, artificial intelligence, robotics, security and communications and their applications to the real world. As such, it is an interesting, exciting and inspiring read.

Current Developments in Monetary and Financial Law, Vol. 4 International Monetary Fund,2008-11-06 The Legal Department and the Institute of the IMF held their ninth biennial seminar for legal advisors of IMF member countries' central banks, and the papers published in this volume are based on presentations made by officials attending this seminar. The seminar covered a broad range of topics, including sovereign debt restructuring, money laundering and the financing of terrorism, financial system and banking supervision, conflicts of interest and market discipline in the financial sector, insolvency, and other issues related to central banking.

Lehne's Pharmacology for Nursing Care E-Book Jacqueline Rosenjack Burchum,Laura D. Rosenthal,2021-09-10 Trust Lehne's to make pharmacology more approachable! Known for its clear explanations of drug prototypes and how they work, Lehne's Pharmacology for Nursing Care, 11th Edition provides a solid understanding of key drugs and their implications for nursing care. A perennial student favorite, this book simplifies complex pharmacology concepts, using large and small print to distinguish need-to-know drug content from the material that's merely nice to know. It also includes in-depth coverage of physiology, pathophysiology and drug therapy. Written by noted nursing educators Jacqueline Rosenjack Burchum and Laura Rosenthal, this text helps you understand and apply pharmacology principles as opposed to simply memorizing drug facts. Clear, engaging writing style simplifies complex concepts, making difficult pharmacology content not only understandable but actually enjoyable. Prototype Drugs approach focuses on representative drugs that characterize all members of a given drug group, so that you can apply your understanding to related drugs currently on the market as well as drugs that will be released in the future. Nursing implications of drug therapy are integrated throughout the text to reinforce the integral relationship between drug therapy and nursing care, and also summarized in Summary of Major Nursing Implications sections at the end of chapters. Special Interest Topic boxes examine the everyday impact of pharmacology with vignettes including Medication Overuse Headache: Too Much of a Good Thing and Antibiotics in Animal Feed: Dying for a Hamburger and Chicken Nuggets. Large print highlights essential, need-to-know information, and small print indicates nice-to-know information. Safety Alerts call out important safety concerns related to contraindications, adverse effects, and more. Patient-Centered Care Across the Life Span tables highlight safe and appropriate care for patients throughout their lives, from infancy to older adulthood. Concise drug summary tables present key information for individual drugs, including drug class, generic and trade names, dosages, routes, and indications. NEW! Thoroughly updated drug content reflects the latest FDA drug approvals, withdrawals, and therapeutic uses, with revisions to the corresponding nursing content. NEW chapters include Genetic and Genomic Considerations, Muscarinic Antagonists, and Complementary and Alternative Therapy.

Facilities for Pathology Services NHS Estates,2005-07-04 This document gives best practice advice on the

planning and design of accommodation for NHS pathology services. It focuses on laboratory-based facilities within acute hospitals, serving acute and primary care needs across a pathology network. It also touches upon point of care testing facilities.

Anti-fragile ICT Systems Kjell Jørgen Hole,2016-03-22 This book introduces a novel approach to the design and operation of large ICT systems. It views the technical solutions and their stakeholders as complex adaptive systems and argues that traditional risk analyses cannot predict all future incidents with major impacts. To avoid unacceptable events, it is necessary to establish and operate anti-fragile ICT systems that limit the impact of all incidents, and which learn from small-impact incidents how to function increasingly well in changing environments. The book applies four design principles and one operational principle to achieve anti-fragility for different classes of incidents. It discusses how systems can achieve high availability, prevent malware epidemics, and detect anomalies. Analyses of Netflix's media streaming solution, Norwegian telecom infrastructures, e-government platforms, and Numenta's anomaly detection software show that cloud computing is essential to achieving anti-fragility for classes of events with negative impacts.

Applications of Field-Programmable Gate Arrays in Scientific Research Hartmut F.-W. Sadrozinski,Jinyuan Wu,2016-04-19 Focusing on resource awareness in field-programmable gate array (FPGA) design, Applications of Field-Programmable Gate Arrays in Scientific Research covers the principle of FPGAs and their functionality. It explores a host of applications, ranging from small one-chip laboratory systems to large-scale applications in big science. The book first describes various FPGA resources, including logic elements, RAM, multipliers, microprocessors, and content-addressable memory. It then presents principles and methods for controlling resources, such as process sequencing, location constraints, and intellectual property cores. The remainder of the book illustrates examples of applications in high-energy physics, space, and radiobiology. Throughout the text, the authors remind designers to pay attention to resources at the planning, design, and implementation stages of an FPGA application, in order to reduce the use of limited silicon resources and thereby reduce system cost. Supplying practical know-how on an array of FPGA application examples, this book provides an accessible overview of the use of FPGAs in data acquisition, signal processing, and transmission. It shows how FPGAs are employed in laboratory applications and how they are flexible, low-cost alternatives to commercial data acquisition systems. Web Resource A supporting website at http://scipp.ucsc.edu/~hartmut/FPGA offers more details on FPGA programming and usage. The site contains design elements of the case studies from the book, including VHDL code, detailed schematics of selected projects, photographs, and screen shots.

Facilities for Surgical Procedures NHS Estates,2004 Supplies guidance relevant to facilities for surgical

procedures in all healthcare settings. This volume covers the facilities required to support in-patient operating theatres in an acute general hospital.

   In-patient Facilities for Older People NHS Estates,2005-04-25 This publication sets out best practice guidance on the building or refurbishment of dedicated in-patient facilities for older people, comprising intermediate care facilities and facilities for people with dementia. Sections cover: general design requirements; room spaces; engineering requirements; and cost information. It includes two cases studies of an intermediate care centre and a nursing home. The guidance takes account of the recommendations made in the National Service Framework for Older People, the NHS Plan and the Wanless report ('Securing our future health: taking a long-term view, 2002) in relation to health care services for older people, including the need for patient privacy and dignity, space and rehabilitation services.

   Canine Confidential Marc Bekoff,2018-04-13 Get to know your best friend better: "Everyone who owns a dog, breeds or trains dogs, or works with dogs should read this informative book." —Library Journal Just think about the different behaviors you see at a dog park. We have a good understanding of what it means when dogs wag their tails—but what about when they sniff and roll on a stinky spot? Why do they play tug-of-war with one dog, while showing their bellies to another? Why are some dogs shy, while others are bold? What goes on in dogs' heads and hearts—and how much can we know and understand? Written by award-winning scientist—and lifelong dog lover—Marc Bekoff, Canine Confidential not only brilliantly opens up the world of dog behavior, but also helps us understand how we can make our dogs' lives better. Rooted in the most up-to-date science on cognition and emotion—fields that have exploded in recent years—Canine Confidential is a wonderfully accessible treasure trove of new information and myth-busting. Peeing, we learn, isn't always marking; grass-eating isn't always an attempt to trigger vomiting; it's okay to hug a dog—on their terms; and so much more. There's still much we don't know, but at the core of the book is the certainty that dogs do have deep emotional lives, and that as their companions and trainers we must recognize them as the unique, complex individuals they are—so we can keep them as happy and healthy as possible. "Bekoff shares his own studies and others' research, along with real-life stories, in a winning tone." —Booklist
