*India's Foreign Policy Discourse and its Conceptions of World Order*  
Thorsten Wojczewski, 2018-06-27 Given India's growing power and aspirations in  
world politics, there has been increasing interest among practitioners and  
scholars of international relations (IR) in how India views the world. This  
book offers the first systematic investigation of the world order models in  
India's foreign policy discourse. By examining how the signifier 'world  
order' is endowed with meaning in the discourse, it moves beyond Western-  
centric IR and sheds light on how a state located outside the Western 'core'  
conceptualizes world order. Drawing on poststructuralism and discourse  
theory, the book proposes a novel analytical framework for studying foreign

policy discourses and understanding the changes and continuities in India's post-cold war foreign policy. It shows that foreign policy and world order have been crucial sites for the (re)production of India's identity by drawing a political frontier between the Self and a set of Others and placing India into a system of differences that constitutes 'what India is'. This text will be of key interest to scholars and students of Indian foreign policy, foreign policy analysis, South Asian studies, IR and IR theory, international political thought and global order studies.

**Desktop – My Book of Computer Science Class 8** Sayan Banerjee, Swati Goel, Madhu, Mini Singh, Goyal Brothers Prakashan, 2013-04-01 Goyal Brothers Prakashan

*India's Pakistan Policy* Stuti Bhatnagar, 2020-08-09 This book critically examines the role of think tanks as foreign policy actors. It looks at the origins and development of foreign policy think tanks in India and their changing relevance and position as agents within the policy-making process. The book uses a comparative framework and explores the research discourse of prominent Indian think tanks, particularly on the India–Pakistan dispute, and offers unique insights and perspectives on their research design and methodology. It draws attention to the policy discourse of think tanks during the Composite Dialogue peace process between India and Pakistan and the subsequent support from the government which further expanded their role. One of the first books to offer empirical analyses into the role of these

organisations in India, this book highlights the relevance of and the crucial role that these institutions have played as non-state policy actors. Insightful and topical, this book will be of interest to researchers focused on international relations, foreign policy analysis and South Asian politics. It would also be a good resource for students interested in a theoretical understanding of foreign policy institutions in general and Indian foreign policy in particular.

**Coalition Politics and Hindu Nationalism** Katharine Adeney, Lawrence Saez, 2007-04-11 This new collection examines the emergence of the Bharatiya Janata Party (BJP) in India and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government. Religious influence in contemporary politics offers a fertile ground for political-sociological analysis, especially in societies where religion is a very important source of collective identity. In South Asian societies religion can, and often has, provided legitimacy to both governments and those who oppose them. This book examines the emergence of the BJP and the ways in which its Hindu nationalist agenda has been affected by the constraints of being a dominant member of a coalition government. The collected authors take stock of the party's first full term in power, presiding over the diverse forces of the governing NDA coalition, and the 2004 elections. They assess the BJP's performance in relation to its stated goals, and more specifically how it has fared in a range of policy fields -

centre-state relations, foreign policy, defence policies, the 'second generation' of economic reforms, initiatives to curb corruption and the fate of minorities. Explicitly linking the volume to literature on coalition politics, this book will be of great importance to students and researchers in the fields of South Asian studies and politics.

**Defeating Political Islam** Moorthy S. Muthuswamy, 2010-12 Urging U.S. policy makers to rethink the War on Terror along the lines of the Cold War against communism, *Defeating Political Islam* offers a fresh perspective on the ongoing threat from Islamist terrorism and the future course of U.S. foreign policy initiatives.

**Contested Waters** Amit Ranjan, 2020-09-02 This book examines India's transboundary river water disputes with its South Asian riparian neighbours – Pakistan, Bangladesh, Nepal and Bhutan. It explores the history of disputes and cooperation over the transboundary river water in this region as well as discusses current disputes and future concerns. It analyses how and why existing transboundary river water sharing treaties between India and its South Asian riparian neighbours are confronted with challenges. The book indicates that India's transboundary river water disputes with its South Asian riparian neighbours are likely to escalate in coming years due to the widening of the demand–supply gap in the respective countries. It further shows the impact of bilateral relations on the resolution of transboundary river water disputes, even as cordial relationships do not always guarantee

the absence of river water disputes between riparian states. The book looks at some key questions: How political are India's transboundary rivers water disputes in South Asia? Why do the roots of India's river water disputes with Bangladesh and Pakistan lie in the partition of the British India in 1947? Why are there reservations against India's hydroelectricity projects or allegations of water theft? Is it possible to resolve transboundary river water disputes among these South Asian countries? This book will greatly interest scholars and researchers working in the areas of river management, environmental politics, transnationalism, water resources, politics and international relations, security studies, peace and conflict studies, geopolitics, development studies, governance and public administration, and South Asian studies in addition to policymakers and journalists.

**Understanding Hard to Maintain Behaviour Change** Ron Borland, 2014-02-03 The book presents an integrative theory of hard-to-maintain behaviours, that includes hard-to-reduce or eliminate behaviours like smoking and other drug use, overconsumption of food or unsafe sex, and hard-to-sustain behaviours like exercise and sun-safe behaviours. Most of the examples come from the author's work on tobacco smoking, but it is relevant to anyone who is concerned to understand why some forms of desirable behaviour are so hard to achieve, and to those trying to help people change. It also has important implications for public health campaigns and for the development of policies to nudge behaviour in desirable ways. The book provides readers with

frameworks to: - Determine whether a “hard to maintain” behaviour is a result of the skills needed to perform it, its reinforcement history, the way the person thinks about it, the context, or some combination of these. - Better integrate cognitive and behavioural change strategies, including emergent strategies related to mindfulness and acceptance, plus novel ways of retraining operational processes. - Understand the different nature of challenges for behaviours where multiple attempts are typically required before the desired behaviour pattern is sustained. - Better understand the role of feelings and emotions as influences on behaviour. - Understand the limits of environmental factors to determine change. - Understand the limits of self-control and will-power.

**Change They Can't Believe In** Christopher S. Parker, Matt A. Barreto, 2014-10-26 Are Tea Party supporters merely a group of conservative citizens concerned about government spending? Or are they racists who refuse

to accept Barack Obama as their president because he's not white? *Change They Can't Believe In* offers an alternative argument—that the Tea Party is driven by the reemergence of a reactionary movement in American politics that is fueled by a fear that America has changed for the worse. Providing a range of original evidence and rich portraits of party sympathizers as well as activists, Christopher Parker and Matt Barreto show that the perception that America is in danger directly informs how Tea Party supporters think and act. In a new afterword, Parker and Barreto reflect on the Tea Party's recent initiatives, including the 2013 government shutdown, and evaluate their prospects for the 2016 election.
