**Windows 8.1: The Missing Manual** David Pogue, 2013-11-26 Windows 8.1 continues the evolution of the most radical redesign in Microsoft's history. It combines the familiar Windows desktop with a new, touchscreen-friendly world of tiles and full-screen apps. Luckily, David Pogue is back to help you make sense of it—with humor, authority, and 500 illustrations. The important stuff you need to know: What's new in 8.1. The update to 8.1 offers new apps, a universal Search, the return of the Start menu, and several zillion other nips and tucks. New features. Storage Spaces, Windows To Go, File Histories—if Microsoft wrote it, this book covers it. Security. Protect your PC from viruses, spyware, spam, sick hard drives, and out-of-control kids. The network. HomeGroups, connecting from the road, mail, Web, music streaming among PCs—this book has your network covered. The software. Media Center, Photo Gallery, Internet Explorer, speech recognition—this one authoritative, witty guide makes it all crystal clear. It's the book that should have been in the box.

**Start with Why** Simon Sinek, 2011-12-27 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

The Making of a Homegrown Terrorist Peter A. Olsson MD,2014-02-25 What are the factors that lead some individuals to become terrorists? In this book, a psychiatrist and psychoanalyst examines case histories of terrorism and reveals how radicalized youths living next door can become dangerous homegrown terrorists. Religious zeal and passionate dogma can be powerful motivators for homegrown recruits of terrorist organizations. In this book, Peter A. Olsson, MD, applies his years of work with disordered personalities to the psychological understanding of why seemingly ordinary Americans turn into murderers of their countrymen. He identifies the psychodynamic patterns of the lives of those who become homegrown terrorists and commit acts of cold-blooded murder, examining 20 detailed case histories of individuals—often youths or young adults—to provide theoretical and practical understandings. The book focuses on individuals that include Timothy McVeigh; Ted Kaczynski, a.k.a. The Unabomber; the Shoe-Bomber Richard Reid; Colleen LaRose, a.k.a. Jihad Jane; Nidal Malik Hasan, an American-born, former U.S. Army officer who opened fire on American troops at Fort Hood, Killeen, TX, killing 13 and injuring more than 30; and Dzhokhar and Tamerlan Tzarnaev, the two brothers charged with placing pressure cooker bombs at the finish line area of the 2013 Boston Marathon. It also delves into topics such as distinguishing between good charisma in a youth versus evil charisma and recognizing the characteristics of a healthy group or leader versus those with unhealthy motivations—subject matter that will be of interest and importance to anyone from concerned citizens and parents to teachers and terrorism specialists.

**Columbia Crew Survival Investigation Report** Nasa, 2009 NASA commissioned the Columbia Accident Investigation Board (CAIB) to conduct a thorough review of both the technical and the organizational causes of the loss of the Space Shuttle Columbia and her crew on February 1, 2003. The accident investigation that followed determined that a large piece of insulating foam from Columbia's external tank (ET) had come off during ascent and struck the leading edge of the left wing, causing critical damage. The damage was undetected during the mission. The Columbia accident was not survivable. After the Columbia Accident Investigation Board (CAIB) investigation regarding the cause of the accident was completed, further consideration produced the question of whether there were lessons to be learned about how to improve crew survival in the future. This investigation was performed with the belief that a comprehensive, respectful investigation could provide knowledge that can protect future crews in the worldwide community of human space flight. Additionally, in the course of the investigation, several areas of research were identified that could improve our understanding of both nominal space flight and future spacecraft accidents. This report is the first comprehensive, publicly available accident investigation report addressing crew survival for a human spacecraft mishap, and it provides key information for future crew survival investigations. The results of this investigation are intended to add meaning to the sacrifice of the crew's lives by making space flight safer for all future generations.

**The Cult of Osama** Peter Alan Olsson, 2008 In *The Cult of Osama*, Psychiatrist Peter Olsson examines Osama bin Laden's early life experiences and explains, from a psychoanalytical perspective, how those created a mind filled with perverse rage at America, as well as why his way of thinking makes bin Laden in many cases a hero to Arab and Muslim youths. Many other writings totally demonize bin Laden, and therein strangely play into putting this troubled man onto a pedestal, says Olsson, who spent 25 years on a social psychological and psychoanalytical study of destructive cults and cult leaders. There are many journalistic, political, military, and intelligence books about bin Laden and his terror cult group. But this one offers a purely psychological and psychobiographical perspective on bin Laden and his mushrooming influence. Bin Laden's destructive Pied Piper appeal, leading youths to murder others and even themselves in suicide missions, stems from the peculiar and profoundly important synchrony of shared trauma and pain between bin Laden and Arab/Muslim youth, says Olsson. And we in the West neglect this topic, at our own peril. Among the insights Olsson provides as he traces the psychological threads of narcissistic wounds and unresolved grief from Osama's childhood are the death of his father when Osama was 10, separation from his mother even earlier, the humiliation of Osama as the son of a slave in his father's household, and his lifelong search for a surrogate older brother and father figures among radical Islamist teachers and mentors. Olsson also spotlights the idea that Osama experienced dark epiphanies as a young adult which further magnified and focused his unresolved disappointments and narcissistic rage. This psychobiography of one of the world's most notorious terrorists, written by an Assistant Professor at Dartmouth Medical School, shows how understanding the psychohistory and mindset of bin Laden could help prevent the development and actions of home-grown American and Western terrorists and their cells.
