Learn to Program with JavaScript John Smiley, 2008-06-29 Javascript is a powerful, object-based scripting language; JavaScript programs can be embedded directly in HTML

web pages. When combined with the Document Object Model (DOM) defined by a web browser, Javascript allows you to create Dynamic HTML (DHTML) content and interactive client-side web applications. JavaScript syntax is similar to that of other popular programming languages such as C, C++ and Java, which makes it easy to learn for experienced programmers. At the same time, JavaScript is an interpreted scripting language, providing a flexible, forgiving environment in which new programmers can learn. There's no need to buy a JavaScript compiler or interpreter---the JavaScript interpreter is shipped as part of your Internet Browser.

Call to Action Bryan Eisenberg, Jeffrey Eisenberg, 2006-10-29 Call to Action includes the information businesses need to know to achieve dramatic results from online efforts. Are you planning for top performance? Are you accurately evaluating that performance? Are you setting the best benchmarks for measuring success? How well are you communicating your value proposition? Are you structured for change? Can you achieve the momentum you need to get the results you want? If you have the desire and commitment to create phenomenal online results, then this book is your call to action.
