It examines interventions in the means and processes of designing the built environment as devised by public authorities and other stakeholders across the continent. In particular, the focus is on the use of soft powers and allied financial mechanisms to influence design quality in the public interest. In doing so, the book traces the scope, use and effectiveness of the range of informal (non-regulatory) urban design governance tools that governments, municipalities and others have at their disposal. Developed from the Urban Maestro project, a joint initiative of the United Nations Human Settlement programme (UN-Habitat), UCL and the Brussels Bouwmeester Maître Architecte (BMA), Urban Design Governance offers the first panorama of informal urban design governance tools from across Europe, and places the tools within a theoretical and analytical framework with the potential to be applied locally and internationally. American Criminal Law Paul H. Robinson,Sarah M. Robinson,2022-08-12 This coursebook offers an exciting new approach to teaching criminal law to graduate and undergraduate students, and indeed to the general public. Each well-organized and student-friendly chapter offers historical context, tells the story of a principal historic case, provides a modern case that contrasts with the historic, explains the legal issue at the heart of both cases, includes a unique mapping feature describing the range of positions on the issue among the states today, examines a key policy question on the topic, and provides an aftermath that reports the final chapter to the historic and modern case stories. By embedding sophisticated legal doctrine and analysis in real-world storytelling, the book provides a uniquely effective approach to teaching American criminal law in programs on criminal justice, political science, public policy, history, philosophy, and a range of other fields.

Emulating Alexander Glenn Barnett,2017-07-19 This book gives an account of the Roman relationship with Persia and how it was shaped by the actions of Alexander the Great long before the events. Numerous Roman emperors led armies eastward against the Persians, seeking to emulate or exceed the glorious conquests of Alexander. Some achieved successes but more often the result was ignominious defeat or death. Even as the empire declined, court propagandists and courtiers looked for flattering ways to compare their now-throne-bound emperors with Alexander. All the while there was a small segment of the Roman intelligentsia who disparaged Alexander and his misdeeds.While the Romans dreamed of conquering the Persian realm, the Persians of the Parthian and Sasanian dynasties dreamed of regaining the lands of the eastern Mediterranean snatched from their Achaemenid ancestors by Alexander. Echoes of this revanchist policy can be seen in Iran's support of Shiites in Iraq, Syria, Yemen and Lebanon. Glenn Barnett draws comparisons between the era-long struggle of Rome and Persia with the current wars in the Middle-East where they once fought.
