Pedagogy of the Heart Paulo Freire, 2021-05-20 Pedagogy of the Heart represents some of the last writings by Paulo Freire. In this work, perhaps more so than any other, Freire presents a coherent set of principles for education and politics. For those who have read Freire's other works the book includes new discussions of familiar subjects including community, neoliberalism, faith, hope, the oppressed, and exile. For those coming to Freire for the first time, the book will open up new ways of looking at the interrelations of education and political struggle. Freire reveals himself as a radical reformer whose lifelong commitment to the vulnerable, the illiterate and the marginalised has had a profound impact on society and education today. The text includes substantive notes by Ana Maria Araújo Freire, a foreword by Martin Carnoy, a preface by Ladislau Dowbor, as well as a substantive new introduction by Antonia Darder, who holds the Leavey Presidential Endowed Chair in Ethics and Moral Leadership in the School of Education at Loyola Marymount University, USA. Translated by Donald Macedo and Alexandre Oliveira.

Climate Change and Human Responses Gregory Monks, 2017-03-21 This book contributes to the current discussion on climate change by presenting selected studies on the ways in which past human groups responded to climatic and environmental change. In particular, the chapters show how these responses are seen in the animal remains that people left behind in their occupation sites. Many of these bones represent food remains, so the environments in which these animals lived can be identified and human use of those environments can be understood. In the case of climatic change resulting in environmental change, these animal remains can indicate that a change has occurred, in climate, environment and human adaptation, and can also indicate the specific details of those changes.

Learn to Code HTML and CSS Shay Howe, 2014-04-22 HTML and CSS can be a little daunting at first but fear not. This book, based on Shay Howe's popular workshop covers the basics and breaks down the barrier to entry, showing readers how they can start using HTML and CSS through practical techniques today. They'll find accompanying code examples online, while they explore topics such as the different structures of HTML and CSS, and common terms. After establishing a basic understanding of HTML and CSS a deeper dive is taken into the box model and how to work with floats. The book includes an exercise focused on cleaning up a web page by improving the user interface and design, solely using HTML and CSS. With a few quick changes the web page changes shape and comes to life. Interactive, technically up-to-the-minute and easy-to-understand, this book will advance a student's skills to a professional level.

Justice in Climate Action Planning Brian Petersen, H       B. Ducros, 2021-12-01 This edited

volume examines how climate action plans engage justice at the scale of the city. Recent events in the United States make the context particularly ripe for a discussion of justice in urban climate politics. On the one hand, the emergence of the Black Lives Matter movement, George Floyd's death, and the prominence of racial discrimination in the public realm have mainstreamed the notion of justice. On the other hand, the dire consequences of increased frequency and severity of climate events on vulnerable segments of urban populations are undeniable. While some cities have been proactive about integrating justice in their climate action planning, in most places an explicit and systematic link between both spheres has been lacking. This book explores this interface as it seeks to understand how cities can respond to climate change in a just way and for just outcomes. While resilience strategies based on "development" may engage historic inequities, they may at the same time result in marginalizing certain populations through various processes, from mismatched solutions to outright exclusion and climate gentrification. By identifying how certain populations are included in or excluded from climate action planning practices, the chapters in this volume draw on case studies to outline the differential outcomes of climate action in American cities, also proposing a template for comparative work beyond the US. The authors tackle the debate about how justice is or is not integrated in climate action plans and assess practical implications, while also making theoretical and methodological contributions. As it fills a gap in the literature at the intersection of justice and climate action, the book produces new insights for a wide-ranging audience: students, practitioners, policy-makers, planners, the non-profit sector, and scholars in geography, urban planning, urban studies, environmental studies, ecology, political science, or anthropology. Along five axes of investigation—theory, resilience, equity, community, and comparison as method—the contributors offer various pathways into the intersection between urban climate action and different

understandings of justice. Collectively, they invite a reflection that can lead to practical initiatives in climate mitigation, while also advancing the theorization of social justice to account for the urban as a node where (in)justice plays out and can be addressed with significant results.
