A Mandarin and the Making of Public Policy Tong Dow Ngiam,2006 Singapore's success story has increasingly been recognised but few have told it from the perspective of an insider. As a senior civil servant and mandarin from 1959 to 1999, Ngiam Tong Dow served with the founding generation of political leaders and contributed to the country's economic growth. In this book, he reflects on these experiences, sharing personal anecdotes and perceptive insights of Singapore's early decades. He also boldly questions some of the policies of government and emerging trends in the country to suggest how Singapore must change to survive and thrive in the future.

Beginning Ubuntu Linux Emilio Raggi,Keir Thomas,Andy Channelle,Trevor Parsons,Sander van Vugt,Adam Thomas,2011-01-10 Ubuntu Linux is the fastest growing Linux-based operating system, and Beginning Ubuntu Linux, Fifth Edition teaches all of us—including those who have never used Linux—how to use it productively, whether you come from Windows or the Mac or the world of open source. Beginning Ubuntu Linux, Fifth Edition shows you how to take advantage of Lucid Lynx. Based on the best-selling previous edition, Emilio Raggi maintains a fine balance between teaching Ubuntu and introducing new features. Whether you aim to use it in the home or in the office, you'll be introduced to the world of Ubuntu Linux, from simple word processing to using cloud services. You'll learn how to control the Ubuntu system, which you just installed from the book's DVD, as you are guided through common tasks such as configuring the system's graphical user interface (GUI), listening to audio CDs and MP3s, producing documents, using VoIP and chat, and of course, general system maintenance. This book also supplies a series of comprehensive tutorials on Ubuntu administration and security—essential for any Ubuntu user—while not neglecting matters pertaining to office applications and the cloud.

The New City Dickson D. Despommier,2023-10-10 Cities are at once among humanity's crowning achievements and core drivers of the climate crisis. Their dependence on the outside world for vital resources is causing global temperatures to rise and wildlife habitats to shrink. But we have the opportunity to make cities more sustainable by transforming the built environment. Dickson D. Despommier proposes a visionary yet achievable plan for creating a new, self-sustaining urban landscape. He argues that we can find solutions through the concept of biomimicry: emulating successful strategies found in nature. A better city is possible if we heed the lessons that forests and trees teach about how to store carbon, grow food, collect rainwater, and convert sunlight into energy. Touring established and leading-edge technologies, The New City provides a blueprint for tomorrow's urban environment. Cities built from wood will be more resilient and less destructive than concrete and steel construction; they will also encourage reforestation, boosting carbon sequestration. Vertical farms inside city limits will supply residents with a reliable, healthy food supply. Buildings will harvest moisture from the rain and air to secure a clean water supply. Renewable energy, including not only wind, solar, and geothermal but also clear photovoltaic window glass and nonpolluting hydrogen fuel cells, will power a cleaner city. The New City delivers both a passionate call to action for halting climate change and a bold vision of the sustainable future within our grasp.

Big, Hot, Cheap, and Right Erica Grieder,2014-04-22 Erica Grieder's Texas is a state that is not only an outlier but an exaggeration of some of America's most striking virtues and flaws. Big, Hot, Cheap, and Right is a witty, enlightening inquiry into how Texas works, and why, in the future, the rest of America may look a lot like Texas.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Revolutionary Wealth Alvin Toffler,Heidi Toffler,2006-04-25 Starting with the publication of their seminal bestseller, Future Shock, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today's high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless.Revolutionary Wealth is about how tomorrow's wealth will be created, and who will get it and how. But twenty-first-century wealth, according to the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and China, from everyday truth and misconceptions to what they call our "third job"—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the "surplus complexity" in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word "prosumer" for people who consume what they themselves produce. In Revolutionary Wealth they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even "mashing" music—pump "free lunch" from the "hidden" non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, Revolutionary Wealth provides readers with powerful new tools for thinking about—and preparing for—their future.

The Future of the Internet Jonathan Zittrain,2009-05-28 In The Future of the Internet: And How to Stop It Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.
