Community Capitalism in China Xiaoshuo Hou, 2013-02-18 Hou proposes to end the dichotomous view of the state and the market, and capitalism and communism, by examining the local institutional innovation in three villages in China and presents community capitalism as an alternative to the neoliberal model of development. Community is both the unit of redistribution and the entity that mobilizes resources to compete in the market; collectivism creates the boundary that sets the community apart from the outside and justifies and sustains the model. Community capitalism differs from Mao-era collectivism, when individual interests were buried in the name of collective interests and market competition was not a concern. This book demonstrates the embeddedness of the market in community, showing how social relations, group solidarity, power, honor, and other values play an important role in these villages' social and economic organization.

Discourse, Rhetoric and Shifting Political Behaviour in China Una Aleksandra Bērziņa-Čerenkova, 2023-10-02 Using political discourse analysis, this book examines the extent to which the salient approaches of previous leadership generations have translated into present day policies shepherded in by Xi Jinping. On the strategic political level, the book includes comparisons of China's recent leadership periods with a focus on Xi Jinping's era, and contains examples of whether and how specific topics and tactics reoccur across generations. The state development strategy section then goes on to include chapters on shaping China's strategic narratives, neoliberal discourse within state developmentalism, and keyword evolution. The practical policies part looks at the issues of re-education, health, class, and ethnicity, analysing how the leaders talk about China's poor, frame the representations of megaprojects on social media, and discursively display diplomatic strength. As a study of the rule of Xi Jinping and the rhetoric of the contemporary Chinese political system, this book will be of huge interest to students and scholars of Chinese politics and political science more broadly.

Intellectual Property Law in China Christopher Heath, 2021-02-19 Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today, judicial and administrative application of law plays a major role, and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner, the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China, including the adaptation of the legal framework to new technologies, broadened scope of protected subject matter, improved quality of filings, and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China – including analysis of IP-related provisions of China's new Civil Code – the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection; protection of trademarks, including Chinese character and Roman script trademarks, well-known marks and bad faith applications; technology transfer; enforcement of trade secret and patent protection; criminal liability for infringement; unfair competition and antitrust law; role of the binding

interpretations of the Supreme People's Court; administrative regulations that supplement the laws; co-operation with administrative authorities; protection of geographical indications; protection of trade names; domain name dispute resolution; special patent-related laws protecting such areas as plant varieties, integrated circuit layout designs,; and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP-related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up-to-date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment, as well as for practitioners counselling their clients on strategies. In addition, officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are. "...the 2021 IPLCN is a recommended read for those who seek a well-written English textbook which covers the main principles of Chinese IP Law. Clearly outlined, it is probably one of the best of its kind on the market. Its existence is welcome and necessary in the current era, where languages are still obstacles." By Tian Lu, Book Review for The IP Kitten, September 2021.

China's Gambit Ketian Zhang, 2023-10-31 This book theorizes China's coercion decisions in response to perceived threats to its national security. It leverages empirical evidence, including primary documents and interviews with Chinese and foreign officials and offers policy implications for understanding China's grand strategy, managing China's rise, and avoiding great power conflicts.

The Geology of the Modern Cancer Epidemic Tai Lahans, 2013-07-24 Cancers are on the rise across the world. Except for viral-based cancers, overall cancers are diseases that may be preventable. This book looks at the many levels of determined, probable, and possible causation for several common cancers. These causes include realities found in culture, anthropology, sociology, politics, the environment, agriculture and food, beliefs, and the modern lifestyle. These realities are filtered through the perennial science of Chinese medicine – an ecological system of knowing and understanding the human body as it relates to the world around us. The book covers lung, colorectal, breast, prostate, and virally-caused cancers. It interweaves conventional medical knowledge of these cancers with modern realities of everyday life we all live, and with Chinese medicine interpretations and strategies for treating probable pre-cancerous conditions. This makes it a book that is useful for the practitioner of Chinese medicine. It is also useful for the patient suffering a cancer diagnosis in terms of survivorship and for other medical practitioners who wish to understand how integrated care for cancerous diseases and conditions may relate to Chinese medicine and prevention. The final chapters of the book are dedicated to finding answers for a cure for cancer through making connections between how we live, what we believe, the environment we are creating based on those beliefs, and the social and political mechanisms we now have in place that keep us from change and, therefore, from the cure for cancer. The Sinews of State Power Juan Wang,2017-03-16 The Sinews of State Power seeks to explain why rural China has been so unstable since 2000, despite numerous national reforms. Using original fieldwork, it traces the rise and demise of cohesive local states in rural China since the Maoist era. It shows that, the county, township, and village levels of government, when in alliance, have facilitated economic growth and caused social grievances. However, national reforms redressing local deviation, together with individual responses from each level of administration, have dismantled elite alliances, and consequentially undermined the extractive, coercive, and responsive capacity of the state. This book forms dialogue with two fields of inquiry in China studies and comparative politics. First, researches on farmer protest often either focus on farmers' grievances, organizations, and strategies, or examine responses from the state as a uniform entity. This book, instead, highlights the anthropology of the state by looking into elite cohesion across administrative levels that determines the exercise of state capacity. Second, studies of regime stability or endurance have stressed holistic factors, such as institutional adaptability, political culture, or epidemic corruption. The Sinews of State Power instead revisits the fundamental components of a capable government - a coherent and robust local leadership that enables the function of a state.

Beginner's Chinese Yong Ho,2005-03 This popular introduction to Mandarin Chinese is now accompanied by 2 audio CDs covering each of the ten lessons with a special section devoted to the Pinyin dialect. Each lesson uses dialogues to teach the basics of grammar, vocabulary, everyday speech, and the written language. Exercises reinforce the material covered in the dialogues, and each lesson ends with a 'Cultural Insights' section that offers a deeper view into the Chinese people. Their way of thinking and the constants of their daily life.

Development of the Constitutions in China and the Visegrad States Lu Da,2021-08-30 This book deals with the development of constitutional law in China and Visegrad states by employing a comparative perspective. It is the first time that the researcher compared the constitutional development in the China and the Visegrad states. It offers a few glimpses of development of constitution in the (former) socialist states to readers who are interested in the constitutional law or China-V4 relations. With the increased cooperation between China and V4 countries, this book gives the undergraduates in the university to think about the BRI and 17+1 network from a Chinese perspective. Last, compared to the previous works which mainly focus on North America and/or Western Europe, this book provides a new angle on comparative constitutional law.

China-Taiwan Rapprochement Min-Hua Chiang,2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China. It goes beyond a consideration of trade and investment flows, and discusses also the large population flows, the growing integration of the two financial

systems and the nature of the deep economic integration at the industry and firm level. It considers the impact of growing economic integration on society and politics, assesses how China-Taiwan economic integration is affecting the East Asian region more widely, and explores the implications for international relations, including the United States dominance in the region. Overall, the book presents a comprehensive analysis of all the issues.

Chinese Nationalism in the Global Era Christopher R. Hughes, 2006-04-07 Presenting an analysis of the tension between nationalism and globalization in China since the beginning of the 'reform and opening' period in the late 1970s to the present day, this book makes a unique contribution to the on-going debate on the nature of Chinese nationalism. It shows how nationalism is used to link together key areas of policy-making, including economic policy, national unification and foreign policy. Hughes provides historical context to the debate by examining how nationalism became incorporated into the ideology of the Chinese Communist Party in the 1980s and the ways in which this strengthened and combined with globalization discourse through the domestic crisis of the Tiananmen Massacre and the external shock of the Cold War's conclusion. The different perspectives towards this resulting orthodoxy are discussed, including those of the state and dissent in mainland China and the alternative views from Taiwan and Hong Kong. Based on Chinese sources throughout, this book offers a systematic treatment of Chinese nationalism, providing conceptual insights that allow the reader to grasp the complex weave of Chinese nationalist sentiment today and its implications for the future.

Corporate Social Responsibility in China Benoît Vermander, 2014 Over the years, many corporations have been trying to determine what they can and should do to contribute to the sustainability of the economic, social and ecological environment within which they operate. Corporate social responsibility has become a key senior management issue worldwide and an increasingly debated topic in China. This book aims at helping companies operating in China to better assess and exercise their corporate social responsibility (CSR) in specific contexts. The purpose of this book is to show that CSR has a strong economic pay back in the long run, that it is a key success factor in nurturing corporate excellence, and that a sense of urgency and accrued inventiveness are required from companies operating in China. Cross-disciplinary in scope, the book aims at helping students and analysts in political science, governance, international relations and Chinese studies to understand and appreciate the unique role that firms play in shaping a new China. It focuses on the relationship between the state, civil society and corporations in the Chinese context. It researches the conditions under which this relationship might result in redefining China's developmental model. This practical, business-oriented book takes into account China's classical and contemporary thought on CSR. It is the result of a long research and collaborative process with several institutions and industry leaders .

The Routledge Handbook of Chinese Translation Chris Shei, Zhao-Ming Gao, 2017-10-16 The Routledge Handbook of Chinese Translation presents expert and new research in analysing and solving translation problems centred on the Chinese language in translation. The Handbook includes both a review of and a distinctive approach to key themes in Chinese translation, such as translatability and equivalence, extraction of collocation, and translation from

parallel and comparable corpora. In doing so, it undertakes to synthesise existing knowledge in Chinese translation, develops new frameworks for analysing Chinese translation problems, and explains translation theory appropriate to the Chinese context. The Routledge Handbook of Chinese Translation is an essential reference work for advanced undergraduate and postgraduate students and scholars actively researching in this area.

Hidden Tibet Sergius L. Kuzmin, 2011-01-01 This book traces the history of Tibetan statehood from ancient times to our days, describes the life of the Tibetans at the times of Feudalism and Socialism, the coercive inclusion of Tibet into People's Republic of China, the suppression of the national liberation movement, the Cultural Revolution, and subsequent reforms. Many pictures and data concerning these events are being published for the first time.

Law and Policy for China's Market Socialism John Garrick, 2012-05-04 This edited volume presents fresh empirical research on the emerging outcomes of China's law reforms. The chapters examine China's 'going out' policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power. The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders. This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms. The contributors ask probing questions about doing business with China and highlight the astonishing escalation of China's outbound foreign direct investment (OFDI). *Law and Policy for China's Market Socialism* includes contributions from leading China-law scholars and specialist practitioners from the People's Republic of China, Hong Kong, the United States, the United Kingdom and other countries who all extend the examination of powerful influences on China's law reforms into new areas. Given the forecast for the growth of China's domestic market, those wishing to gain a better understanding and seeking success in the world's most dynamic marketplace will benefit greatly from reading this book. This book is essential reading for anyone interested in Chinese economics and business, Chinese Law, Chinese politics and commercial law.

Proceedings of the National Science Council, Republic of China, 2001

STEM in the Technopolis: The Power of STEM Education in Regional Technology Policy Cliff Zintgraff, Sang C. Suh, Bruce Kellison, Paul E. Resta, 2020-05-27 This book addresses how forward-thinking local communities are integrating pre-college STEM education, STEM pedagogy, industry clusters, college programs, and local, state and national policies to improve educational experiences, drive local development, gain competitive advantage for the communities, and lead students to rewarding careers. This book consists of three sections: foundational principles, city/regional case studies from across the globe, and state and national context. The authors explore the hypothesis that when pre-college STEM education is integrated with city and regional development, regions can drive a virtuous cycle of education, economic development, and quality of life. Why should pre-college STEM education be included in regional technology policy? When local leaders talk about regional policy, they usually

talk about how government, universities and industry should work together. This relationship is important, but what about the hundreds of millions of pre-college students, taught by tens of millions of teachers, supported by hundreds of thousands of volunteers, who deliver STEM education around the world? Leaders in the communities featured in STEM in the Technopolis have recognized the need to prepare students at an early age, and the power of real-world connections in the process. The authors advocate for this approach to be expanded. They describe how STEM pedagogy, priority industry clusters, cross-sector collaboration, and the local incarnations of global development challenges can be made to work together for the good of all citizens in local communities. This book will be of interest to government policymakers, school administrators, industry executives, and non-profit executives. The book will be useful as a reference to teachers, professors, industry professional volunteers, non-profit staff, and program leaders who are developing, running, or teaching in STEM programs or working to improve quality of life in their communities.

An Integrative Approach to Counseling Robert G. Santee, 2007-05-18 *An Integrative Approach to Counseling: Bridging Chinese Thought, Evolutionary Theory, and Stress Management* offers a global and integrative approach to counseling that incorporates multiple concepts and techniques from both eastern and western perspectives. The book identifies commonalities rather than the differences between them. The book also compares and contrasts the underlying cultural assumptions of western counseling with those of the Chinese perspectives of Confucianism, Daoism, and Buddhism, relative to integrating and applying a more global approach to helping individuals functionally adapt to challenges in their environments. The book will be used by faculty and students in those advanced undergraduate and graduate courses in psychology, counseling, or social work that cover such areas as introduction to counseling, counseling skills and techniques, counseling theories, multi-cultural awareness and counseling, and stress management.

The Chinese Army Today Dennis J. Blasko, 2013-06-17 *The Chinese Army Today* is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People's Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People's Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

Law and the Market Economy in China Perry Keller, 2017-07-05 This volume concerns several aspects of China's

changing market based economy. These include commercial contract enforcement, corporate structures, competition law and other issues related to China's membership in the WTO. In the past two decades, the rapid integration of China's economy into the global marketplace has created obligations and expectations of non-discrimination and regulatory transparency in domestic markets. The Chinese government has responded by demanding better governance within major companies, market sectors and public administration generally. However, as the articles in this volume show, it has struggled to find a corporate structure capable of absorbing external equity investment and participation but still amenable to direct and indirect state guidance. It has also moved cautiously in creating legal controls over unfair competition. Moreover, the protection of state owned enterprises, which serve as vehicles for domestic economic, social and political policy, has been a recurring issue in China's WTO trade disputes.

China, Arms Control, and Non-Proliferation Wendy Frieman, 2014-04-08 China, Arms Control, and Non-Proliferation is an empirically and conceptually path-breaking book that documents China's participation in international arms control and non-proliferation regimes from 1985 to 2001. The book focuses on the distinction between US expectations of Chinese compliance, which China has not always met, and international standards, against which Chinese performance is acceptable. This will be the standard staple work dealing with China and international arms control and will be invaluable to those dealing with Chinese security studies, foreign policy, international relations and arms control and disarmament.
