*China's Soft Power and International Relations* Hongyi Lai,Yiyi

Lu,2012-05-23 China's soft power has attracted considerable attention in the recent decade. In this volume scholars from the U.K., Europe, the U.S., Singapore, Australia, Hong Kong and mainland China, including a number of well established and well known analysts on China, examine main areas where China has made noticeable advances in its appeal and influence. They include China's foreign policy discourse, international communication, cultural diplomacy, and foreign assistance. In addition, Chinese concept of soft power, foreign policy strategy, and the relationship between its international standing and that of the U.S. are also closely analysed. The volume covers some of the most recent development and assesses China's soft power critically. This book offers an assessment of China's efforts to cultivate its international image, as well as a critique of Nye's theory of soft power. It draws on case studies of the Chinese diplomatic practice and utilizes world opinion polls. This volume offers a theoretical and empirical perspective on the discussion on soft power with a particular focus on China's soft power.

Theater Missile Defense (TMD) in East Asia Lars Assmann, 2007 As East Asia is entering the 21st Century, Japan, in reassessing its security environment and thus its strategic calculus, is on the verge of deploying latest jointly-researched theater missile defenses (TMD) to counter the threat of ballistic and cruise missiles. In parallel, the People's Republic of China is constantly modernizing its ballistic missile forces and is gearing up for a possible contingency with its self-proclaimed high-tech adversaries. *Evaluation in English Tourism Texts on Chinese, British and American Websites* KANG NING, 2016-06-22 Informed by the APPRAISAL Theory, this book analyses the construction of evaluative meanings in web-based English tourism texts (ETTs). It investigates the semantic potentiality of evaluative meaning in English tourism texts on Chinese, British and American websites, as well as the similarities and differences in constructing evaluation among the three varieties of ETTs. It is aimed to discover the characteristic preferences for particular appraisal resources in constructing evaluation in native ETTs, and to find out the deficiencies in using evaluation in ETTs on

Chinese websites. Two analytical procedures are adopted: first, based on large corpus files, it discusses the semantic potentiality for evaluative meaning in the three types of ETTs; then, various evaluation features are explored in detail concerning resources of ATTITUDE, ENGAGEMENT and GRADUATION under the APPRAISAL framework. All discussions are conducted by combining quantitative statistics with qualitative analyses. Theoretically, the study modifies and extends some aspects of the APPRAISAL Theory so as to facilitate the analysis of evaluation in tourism discourse. The study is also instructive for Chinese ESL/EFL writers in writing English tourist texts or translating Chinese tourism texts into English.

*China-Taiwan Rapprochement* Min-Hua Chiang, 2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China. It goes beyond a consideration of trade and investment flows, and discusses also the large population flows, the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level. It considers the impact of growing economic integration on society and politics, assesses how China-Taiwan economic integration is affecting the East Asian region more widely, and explores the implications for international relations, including the United States dominance in the region. Overall, the book presents a comprehensive analysis of all the issues.

Cyber China F. Mengin, 2004-11-26 The essays in this volume explore the new power struggles created in China, Taiwan, and Hong Kong through information technology. The contributors analyze the interaction between the development of information technologies and social logic on the one hand and processes of unification and fragmentation on the other. They seek to highlight the

strategies of public and private actors aimed at monopolizing the benefits created by the information society – whether for monetary gain or bureaucratic consolidation – as well as the new loci of power now emerging. The book is organized around two main themes: One exploring societal change and power relations, the second examining the restructuring of Greater China's space. In so doing, the book seeks to shed light on both the state formation process as well as international relations theory.

The remaining chapters explore topics of language assessment, technology enhanced instruction, teaching materials and resources, Chinese for specific purposes, classroom implementation, social contexts of language teaching and language teaching policies, and pragmatics and culture. Ideal for scholars and researchers of Chinese language teaching, the Handbook will benefit educators and teacher training programs. This is the first comprehensive volume exploring the growing area of Chinese language pedagogy.

In Pursuit of Gold Sue Fawn Chung, 2011-08-01 Both a history of an overlooked community and a well-rounded reassessment of prevailing assumptions about Chinese miners in the American West, *In Pursuit of Gold*

brings to life in rich detail the world of turn-of-the-century mining towns in the Northwest. Sue Fawn Chung meticulously recreates the lives of Chinese immigrants, miners, merchants, and others who populated these towns and interacted amicably with their white and Native American neighbors, defying the common perception of nineteenth-century Chinese communities as insular enclaves subject to increasing prejudice and violence. While most research has focused on Chinese miners in California, this book is the first extensive study of Chinese experiences in the towns of John Day in Oregon and Tuscara, Island Mountain, and Gold Creek in Nevada. Chung illustrates the relationships between miners and merchants within the communities and in the larger context of immigration, arguing that the leaders of the Chinese and non-Chinese communities worked together to create economic interdependence and to short-circuit many of the hostilities and tensions that plagued other mining towns. Peppered with fascinating details about these communities from the intricacies of Chinese gambling games to the techniques of hydraulic mining, *In Pursuit of Gold* draws on a wealth of historical materials, including immigration records, census manuscripts, legal documents, newspapers, memoirs, and manuscript collections. Chung supplements this historical research with invaluable first-hand observations of artifacts that she experienced in archaeological digs and restoration efforts at several of the sites of the former booming mining towns. In clear, analytical prose, Chung expertly characterizes the movement of Chinese miners into Oregon and Nevada, the heyday of their mining efforts in the region, and the decline of the communities due to changes in the mining industry. Highlighting the positive experiences and friendships many of the immigrants had in these relatively isolated mining communities, *In Pursuit of Gold* also suggests

comparisons with the Chinese diaspora in other locations such as British Columbia and South Africa.

**Chinese Myth: A Treasury of Legends, Art, and History** Philip Wilkinson, 2016-04-15 In 1978, faced with the pressure to modernize and a declining budget, the Chinese People's Liberation Army (PLA) reluctantly agreed to join China's economic reform drive, expanding its internal economy to market-oriented civilian production. This work examines PLA's role in the economy up to 1998.

**Taiwan and China** Lowell Dittmer, 2017-09-26 At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. China's relation to Taiwan has been in constant contention since the founding of the People's Republic of China in October 1949 and the creation of the defeated Kuomintang (KMT) exile regime on the island two months later. The island's autonomous sovereignty has continually been challenged, initially because of the KMT's insistence that it continue to represent not just Taiwan but all of China—and later because Taiwan refused to cede sovereignty to the then-dominant power that had arisen on the other side of the Taiwan Strait. One thing that makes Taiwan so politically difficult and yet so intellectually fascinating is that it is not merely a security problem, but a ganglion of interrelated puzzles. The optimistic hope of the Ma Ying-jeou administration for a new era of peace and cooperation foundered on a landslide victory by the Democratic Progressive Party, which has made clear its intent to distance Taiwan from China's political embrace. The Taiwanese are now waiting with bated breath as the relationship tautens. Why did détente fail, and what chance does Taiwan have without it? Contributors to this volume focus on three aspects of the evolving quandary: nationalistic identity, social economy, and political strategy.

**Cross-Cultural Differences** Veronica Wellein, 2008-10-24  
Inhaltsangabe: Introduction: We are living in an internationalized world; global trade keeps increasing and more companies from many countries around the world are going national at an astounding rate. This is a reflection of strong economic growth around the world and the globalization of the economy and corporations. Offices are spread from one continent to another and travel is essential to business. This is the reason why business travel is increasing, states Hubert Joly, president and chief executive officer of CWT. In today's business world, you might well find yourself as an international

manager in a foreign subsidiary of an American firm, facing on a daily basis all aspects of international management. Or you could end up at the home office in Germany coordinating operations with foreign affiliates. Or you could travel to countries like Japan or China, negotiating export sales or dealing with suppliers, customers, or franchise parties. Many different kinds of positions are available in the global arena, and training in international and cross-cultural management and negotiation styles is becoming a critical ingredient in moving up to high-level positions in global organizations. In 2006, a record 30.1 million U.S. travelers visited overseas markets, an increase of five percent from 2005. One of the top five overseas markets visited by U.S. travelers in 2006 was Germany. China (if combining travel the PRC and Hong Kong) would have tied as second. Contributing to the new record for outbound travel, seven of the top 20 U.S. outbound destination markets posted records in 2006, including Japan and China. Hundreds of thousands of jobs in the Germany owe their existence and sustainment to business travel. In Germany, the effects of a growing European Union and worldwide business travel create a stable demand for modern transport infrastructures and services. The USA is one of the two most important business travel destinations for the German economy, closely followed by China. Two markets will dominate travel interests in the future: the USA and China. No other countries will be as important for business trips as these two different giants. China's economy still enjoys a huge growing potential although its gross domestic product (GDP) has maintained a double-digit growth for four straight years and hit a new high of 10.7 in the first three quarters of 2006. The growth rate of China's labor productivity stood at 9.5 percent last year, [...]
