Disability in Higher Education Nancy J. Evans, Ellen M. Broido, Kirsten R. Brown, Autumn K. Wilke, 2017-03-06

Create campuses inclusive and supportive of disabled students, staff, and faculty

Disability in Higher Education: A Social Justice Approach examines how disability is conceptualized in higher education and ways in which students, faculty, and staff with disabilities are viewed and served on college campuses. Drawing on multiple theoretical frameworks, research, and experience creating inclusive campuses, this text offers a new framework for understanding disability using a social justice lens. Many institutions focus solely on legal access and accommodation, enabling a system of exclusion and oppression. However, using principles of universal design, social justice, and other inclusive practices, campus environments can be transformed into more inclusive and equitable settings for all constituents. The authors consider the experiences of students, faculty, and staff with disabilities and offer strategies for addressing ableism within a variety of settings, including classrooms, residence halls, admissions and orientation, student organizations, career development, and counseling. They also expand traditional student affairs understandings of disability issues by including chapters on technology, law, theory, and disability services. Using social justice principles, the discussion spans the entire college experience of individuals with disabilities, and avoids any single-issue focus such as physical accessibility or classroom accommodations. The book will help readers:

Consider issues in addition to access and accommodation

Use principles of universal design to benefit students and

employees in academic, cocurricular, and employment settings Understand how disability interacts with multiple aspects of identity and experience. Despite their best intentions, college personnel frequently approach disability from the singular perspective of access to the exclusion of other important issues. This book provides strategies for addressing ableism in the assumptions, policies and practices, organizational structures, attitudes, and physical structures of higher education.

Paying for College Howard R. Greene,Matthew W. Greene,2004-10-05 Two of the country's leading educational consultants examine the escalating costs of college and provide effective, timely, and reassuring solutions to help parents of every income level save for, finance, and find financial aid for their child's higher education. Learn how you can: ·Find an LGBT-friendly school ·Evaluate administrative policies related to LGBT student life ·Deal with homo/bi/transphobia on campus ·Participate in LGBT student activism ·Get support for your health and safety needs ·Fully integrate yourself into the campus community

Academic Library Outreach Nancy D.

Courtney,2008-12-30 Traditionally, academic library outreach has meant reaching out to the campus community, providing services to faculty and students. Many universities and colleges, however, now have a new or renewed emphasis on outreach beyond the campus, seeking to ensure their institutions' relevance to the community at large. How can and do academic libraries participate in this type of outreach? What types of collaborations or partnerships are academic libraries forming with schools, public libraries, or community groups? How do academic librarians partner with faculty or campus departments on their community projects? What role does service-learning play? Nancy Courtney has assembled a sampling of approaches, from the innovative to the tried-and-true, each written in the voice of its strongest champion.

Saving for College & the Tax Code Andrew P.

Roth,2001 Placing the recent rush to use tax incentives as a new source of student financial assistance in both its historical and theoretical contexts, this book documents the rise of tax-advantaged college savings plans and how they signal the shift to solving the challenge of middle-

class affordability and its replacement of the twin goals of access and equity as public policy's greatest higher education funding priority. Including an in-depth analysis of the affordability crisis, a detailed encapsulation of the public-versus-private responsibility to pay for higher education debate and its historic roots, and the theoretical studies of student aid and the tax code, the book develops concrete definitions of the various types of tax-advantaged college savings plans, their origin and development and a detailed taxonomy of all such state-sponsored programs in the United States. Unique to this book, the taxonomy is based upon detailed State Profiles of all tax-advantaged college savings plans in existence circa 1999. Building upon the State Profiles and their taxonomic summary, the book analyzes the rhetoric of the documents surrounding each state's program's adoption in order to understand what the state's say such programs mean. Further, each program's characteristics are evaluated against a Continuum of Publicness in order to ascertain the state's position regarding the public-versus-private responsibility debate. The results is both a rhetorical and behavioral data set documenting the states' policy position elevating solving the challenge of middle-class affordability above the issues of access and equity. Although the concept of publicness is discovered to be highly ambiguous, the book concludes with a Best Practices description of an ideal tax-advantaged college savings plan that maximizes public responsibility to pay for higher education. Such a program will be of great interest to all policy analysts and public officials concerned about maintaining the historic American commitment to access and equity.

Gender, Sexuality and Peace Education Laura L. Finley, Robin Cooper, 2018-06-01 This edited volume, authored by scholars, students, and activists, focuses on

how peace educators at the collegiate level can more effectively address gender and sexuality. Chapters focus on the classroom and the campus at large, and emphasize the importance of interdisciplinary practice, thoughtful approaches that offer both challenges and safety, and solidarity and support. The volume includes entries on hot and important topics, including trigger warnings, using popular culture in the classroom, sex trafficking, campus sexual assault, and more. Contributors come from a variety of disciplinary areas, making the volume eclectic in nature. Further, most entries include student voices, providing much-needed agency for college youth. While the book does offer a critical perspective, importantly, chapters also offer hope and possibility.

A New World of Knowledge International Development Research Centre (Canada), 1999 In communications, health care, and economics, events, discoveries, and decisions that originate beyond national borders today routinely influence national policies and practices. But how are our system of education, and particularly our universities, affected by globalization? *A New World of Knowledge* examines how globalization has obliged universities in Canada to reassess and rethink the international dimension of their mission and practice. All now include an international dimension in their mission statement. Is this a true statement of educational principles? Or is it simply a marketing message intended to position the university to cope with budget reductions through the sale of educational services? *A New World of Knowledge* looks at the important role that Canadian universities have played in shaping Canada's response to the problems of international development. It provides the historical backdrop and level of analysis needed to properly inform choices for the future of higher education in Canada and

abroad. The book will interest teachers and administrators in institutions of higher education, especially in international affairs and educational studies; practitioners in organizations that depend on university linkages (such as in NGOs and research-granting organizations); government officials in the education sector; and students looking for an international education.

The Christian College (RenewedMinds) William C. Ringenberg, 2006-04-01 When it first appeared in 1984 The Christian College was the first modern comprehensive history of Protestant higher education in America. Now this second edition updates the history, featuring a new chapter on the developments of the past two decades, a major introduction by Mark Noll, a new preface and epilogue, and a series of instructive appendixes.

Writing and Developing Your College Textbook Mary Ellen Lepionka, 2008 This is the comprehensively revised second edition of a popular professional book on textbook writing and finding one's way in the higher education publishing world--for academic authors and editors, college instructors, and instructional designers. The second edition has two new chapters on the latest industry trends--such as the pricing revolt, open access movement, and wiki-textbook phenomenon, and on the use of learning objectives to structure textbook package development. Every chapter features new sections, links, forms, models, or examples from an even greater range of college courses. Contains updated and expanded appendices, glossary entries, references, bibliography entries, and index. BISAC: Language Arts & Disciplines/Authorship and Publishing

Inclusive Education for Students with Intellectual Disabilities Rhonda G. Craven,Alexandre J. S.

Morin,Danielle Tracey,Philip D. Parker,Hua Flora

Zhong,2015-02-01 As a social justice endeavor, one of the goals of inclusive education is to bolster the education of all students by promoting equal opportunities for all, and investing sufficient support, curriculum and pedagogy that cultivates high self-concepts, emphasizes students' strengths rather than weaknesses, and assists students to reach their optimal potential to make a contribution to society. Dedicated to the identification of international strategies to achieve this goal, Inclusive Education for Students with Intellectual Disabilities presents examples of theory, research, policy, and practice that will advance our understanding of how best to educate and more generally structure educational environments to promote social justice and equity. Importantly, this discussion transcends research methodology, context, and geographical locations and may lead to far-reaching applications. As such, the focus is placed on research-derived educational and psycho-educative practices that seed success for students

with intellectual disabilities in inclusive educational settings and the volume showcases new directions in theory, research, and practice that may inform the education and psychosocial development of students with intellectual disabilities globally. The chapter contributors in this volume consist of 31 scholars from ten different countries, and they come from a great variety of research areas (i.e., teacher education, educational psychology, special education and disability policy, special needs and inclusive education, health sciences). This volume, with a series of subsections, offers insights and useful strategies to promote meaningful advances for students with intellectual disabilities globally.

Battleground: Government and Politics [2 volumes] Lori A. Johnson, Kathleen Uradnik, Sara Beth Hower Ph.D., 2011-09-23 Through a detailed exploration of the viewpoints involved, this balanced and incisive work promotes understanding of the most divisive issues in American government today. Government and politics is an area in which there are no right answers, but much room for debate. Battleground: Government and Politics allows students and general readers alike to consider key political debates from all sides and to arrive at their own considered convictions, based on a firm understanding of the issues and points of view involved. This two-volume work explores dozens of the most contentious issues in contemporary life, issues that impact how our government is run today and how it will be run in the future. Each topic is examined in a balanced way, providing not only an overview of the issues involved, but an objective assessment of the stance of all sides. Readers can use these entries as thorough and solid summaries of the most contentious controversies in contemporary society, or as starting points for more in-depth research into the debates.

Going Beyond Google Again Jane Devine, Francine Egger-Sider, 2014 The Invisible Web, also known as the Deep Web, is a huge repository of underutilized resources that can be richly rewarding to searchers who make the effort to find them. Since Jane Devine and Francine Egger-Sider explored the educational potentials of this realm in *Going Beyond Google: The Invisible Web in Learning and Teaching*, the information world has grown even more complex, with more participants, more content, more formats, and more means of access. Demonstrating why teaching the Invisible Web should be a requirement for information literacy education in the 21st century, here the authors expand on the teaching foundation provided in the first book and persuasively argue that the Invisible Web is still relevant not only to student research but also to everyday life. Intended for anyone who conducts research on the web, including students, teachers, information professionals, and general users, their book Defines the characteristics of the Invisible Web, both technologically and cognitively Provides a literature review of students' information-seeking habits, concentrating on recent research Surveys the theory and practice of teaching the Invisible Web Shows ways to transform students into better researchers Highlights teaching resources such as graphics, videos, and tutorials Offers an assortment of tools, both public and proprietary, for trawling the Invisible Web Looks at the future of the Invisible Web, with thoughts on how changes in search technology will affect users, particularly students learning to conduct research
