Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

This Side of Paradise F. Scott Fitzgerald, 2012-03-12 Definitive novel of the Lost Generation focuses on the coming of age of Amory Blaine, a handsome, wealthy Princeton student. Fitzgerald's first novel and an immediate, spectacular success. Note.

Advancements in Computer Vision and Image

Processing Garcia-Rodriguez, Jose, 2018-04-06 Interest in computer vision and image processing has grown in recent years with the advancement of everyday technologies such as smartphones, computer games, and social robotics. These advancements have allowed for advanced algorithms that have improved the processing capabilities of these technologies. *Advancements in Computer Vision and Image Processing* is a critical scholarly resource that explores the impact of new technologies on computer vision and image processing methods in everyday life. Featuring coverage on a wide range of topics including 3D visual localization, cellular automata-based structures, and eye and face recognition, this book is geared toward academicians, technology professionals, engineers, students, and researchers seeking current research on the development of sophisticated algorithms to process images and videos in real time.

Tables Turned on Them Dr. Michael Greenberg, Imagetriping LLC, 2019-03-07 As the systematic murder of six million Jews by Nazi Germany and its collaborators was taking place, Jewish soldiers in the United States Army participated in guarding, healing, and reeducating of some of the four hundred thousand German prisoners of war (PW) held in camps scattered across the United States. History has paid little attention to the participation of Jewish GIs at these camps and the role they played in preparing PWs to return and participate in a postwar democratic Germany. Very little is known about the experiences of these Jewish soldiers that prepared them to go face-to-face with German PWs, some of which were hardened Nazi party members. In addition, little is known about how the tour of duty in these camps affected the GIs' postwar lives. It was fifty years after the German PWs returned home that I found an unexpected gift my late parents left me that became a portal to discover stories of individual Jewish men whose deeds should inspire future generations on confronting anti-Semitism and racism.

These men did not feel sorry for themselves being assigned to PW camps, did not request transfers, and embraced the change and focused on the things they could control. They viewed their roles not as custodians or babysitters of prisoners but as role models of Jewish men who were fit, trim, educated, held rank, and wanted to do more than just “ride out the war” in the zone of the interior. Their stories are about affecting positive change in the PWs’ thinking and behaviors. Their mission of *tikkun olam*—“repair of the world—” is the subject of this book. How, where, and when they started and completed this mission is unique to each Jewish GI despite them having common basic training in Jewish upbringing and values. It is hoped that this book will inspire other Jewish soldiers who served at PW camps or their family members knowledgeable about their service to step forward and share their experiences. This could lead to a future updated edition of this book.

America’s Arab Refugees Marcia C. Inhorn, 2018-01-09
America's Arab Refugees is a timely examination of the world's worst refugee crisis since World War II. Tracing the history of Middle Eastern wars—especially the U.S. military interventions in Iraq and Afghanistan—to the current refugee crisis, Marcia C. Inhorn examines how refugees fare once resettled in America. In the U.S., Arabs are challenged by discrimination, poverty, and various forms of vulnerability. Inhorn shines a spotlight on the plight of resettled Arab refugees in the ethnic enclave community of Arab Detroit, Michigan. Sharing in the poverty of Detroit's Black communities, Arab refugees struggle to find employment and to rebuild their lives. Iraqi and Lebanese refugees who have fled from war zones also face several serious health challenges. Uncovering the depths of these challenges, Inhorn's ethnography follows refugees in Detroit suffering reproductive health problems requiring in vitro fertilization (IVF). Without money to afford costly IVF services, Arab refugee couples are caught in a state of reproductive exile—unable to return to war-torn countries

with shattered healthcare systems, but unable to access affordable IVF services in America. America's Arab Refugees questions America's responsibility for, and commitment to, Arab refugees, mounting a powerful call to end the violence in the Middle East, assist war orphans and uprooted families, take better care of Arab refugees in this country, and provide them with equitable and affordable healthcare services.

Twenty-Five Sides of a Post-Communist Mafia State Balint Magyar, Julia Vasarhelyi, 2017-02-28 The twenty-five essays accompany, illustrate and underpin the conceptual framework elaborated in *Post-Communist Mafia State*, published in conjunction with this volume. Leading specialists analyze the manifestations of the current political regime in Hungary from twenty-five angles. Topics discussed include the ideology, constitutional issues, social policy, the judiciary, foreign relations, nationalism, media, memory politics, corruption, civil society, education, culture and so on. Beyond the basic features of the economy the domains of taxation, banking system, energy policies and the agriculture are treated in dedicated studies. The essays are based on detailed empirical investigation about conditions in today's Hungary. They nevertheless contribute to the exploration of the characteristic features of post-communist authoritarian regimes, shared by an increasing number of countries in Europe and Central Asia. The Handbook of Creativity & Innovation in Business

Rouxelle de Villiers, 2022-08-04 This book enables readers to develop their own creative thinking and their teams' creative problem-solving skills to generate novel, useful and surprising ideas. The vast majority of companies believe that a culture of innovation and renewal impacts performance and ultimately business results. In contrast, many managers feel ill-equipped to promote a culture of creative endeavour for this type of work-environment and lack the know-how to put it into practice. This book covers theory, practice, and impact metrics of both convergent and divergent thinking tools and provide managers with the ideas, tools and guidance to develop a corporate culture conducive to intrapreneurial thinking, idea creation and testing and moving inventions from ideas to viable business concepts, products and profitable innovations. This book includes numerous step-by-step tutorials to help the reader to learn concepts quickly.

Oxford Handbook of Neuroethics presents a pioneering review of a topic central to the biosciences. It breaks new ground in bringing together leading neuroscientists, philosophers, and lawyers to tackle some of the most significant ethical issues that face us now and will continue to do so.

Entertainment Computing - ICEC 2010 Hyun Seung Yang, Rainer Malaka, Junichi Hoshino, Jung Hyun Han, 2010-08-26
The 9th International Conference on Entertainment Computing (ICEC 2010) was held in September 2010 in Seoul Korea. After Pittsburgh (2008) and Paris (2009), the event returned to Asia. The conference venue was the COEX Exhibition Hall in one of the most vivid and largest cities of the world. This amazing mega-city was a perfect location for the conference. Seoul is on the one hand a metropolitan area with modern industries, universities and great economic power. On the other hand, it is also a place with a very fascinating historical and cultural background. It bridges the past and the future as well as east and west. Entertainment computing also aims at building bridges from technology to leisure, education, culture and work. Entertainment computing at its core has a strong focus on computer games. However, it is not only about computer games. The last ICEC conferences have shown that entertainment computing is a much wider field. For instance in games, technology developed for games can be used for a wide range of applications such as therapy or education. Moreover, entertainment does not necessarily have to be understood as games. Entertainment computing finds its way to stage performances and all sorts of new interactive installations.
