Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Outsourcing Technology Robin Hastings,2014-03-18 The care and maintenance of technology is a specialized field requiring a diverse set of skills to perform properly. Many libraries find it difficult to attract skilled people because of a lack of personnel budgets, because of a location that is rural enough to have a limited applicant pool, or because the library lacks enough technological savvy to make effective hiring decisions. Regardless of the reason for the lack of technological skill in a library's staff, there are ways to outsource major technological functions of the library so that even very small libraries can have the same access to technology as the big libraries—and big libraries can manage huge technological projects with the same resources and skills as multinational companies. Outsourcing Technology: A Practical Guide for Librarians will provide the information and guidance needed for both the smallest libraries to embrace technology and the largest libraries to get the most from their technology investments with tips and tricks for libraries of size between as well.

Loose Wire Jeremy Wagstaff,2006-09 EVER GET THE FEELING that technology is taking over your life and not asking you first? When you've mislaid that important file or can't connect your new camera, do you just want to hurl your computer out of the window? When your kids/friends/grandparents start talking about blogging, podcasting and RSS feeds do you nod as wisely as you can while wrestling with the urge to throw them out of the window too? The bad news is that technology isn't going away. The good news is that, by picking up this book, you're halfway to making it work for you - not against you. Loose Wire is a compilation of Jeremy Wagstaff's most popular weekly columns on personal technology from The Wall Street Journal Asia and the Far Eastern Economic Review. An ordinary person's primer on technology, Loose Wire explains - in jargon-free language and real sentences - what has happened over the past few years, from the rise of the mobile phone to phishing, to where we are heading, as well as hands-on, practical advice about how to enjoy the ride. ABOUT THE AUTHOR Jeremy Wagstaff has worked as a journalist since 1986 - for the BBC, Reuters, The Wall Street Journal and the Far Eastern Economic Review. Most of that time has been spent in Asia, covering uprisings, wars, colonial retreats and the odd (sometimes very odd) press conference. No techie, his interest in technology grew out of a realization that it was changing the way journalists - and the world - work, and that following it would probably be a better idea than fighting it. Since 2000 he has been writing a technology column and has since 2004 appeared regularly on the BBC World Service. He also keeps a blog at www.loosewireblog.com.
