**Routledge Handbook of Civil Wars** Edward Newman, Karl DeRouen, Jr., 2014-02-18 This comprehensive new Handbook explores the significance and nature of armed intrastate conflict and civil war in the modern world. Civil wars and intrastate conflict represent the principal form of organised violence since the end of World War II, and certainly in the contemporary era. These conflicts have a huge impact and drive major political change within the societies in which they occur, as well as on an international scale. The global importance of recent intrastate and regional conflicts in Afghanistan, Pakistan, Iraq, Somalia, Nepal, Cote d'Ivoire, Syria and Libya – amongst others – has served to refocus academic and policy interest upon civil war. Drawing together contributions from key thinkers in the field who discuss the sources, causes, duration, nature and recurrence of civil wars, as well as their political meaning and international impact, the Handbook is organised into five key parts: Part I: Understanding and Explaining Civil Wars: Theoretical and Methodological Debates Part II: The Causes of Civil Wars Part III: The Nature and Impact of Civil Wars Part IV: International Dimensions Part V: Termination and Resolution of Civil Wars Covering a wide range of topics including micro-level issues as well as broader debates, Routledge Handbook of Civil Wars will set a benchmark for future research in the field. This volume will be of much interest to students of civil wars and intrastate conflict, ethnic conflict, political violence, peace and conflict studies, security studies and IR in general.

**Preventing Violent Conflict** Lawrence S. Woocher, 2009 New wars will continue to erupt if greater and smarter efforts are not made to prevent them. Current dangers stem from factors such as rise of unstable regimes, global economic turbulence, climate change, and shift in global power distribution. Preventing relapse after wars end is insufficient to prevent most new conflicts, because post-conflict recurrences constitute only a minority of all conflict outbreaks. A wide range of governments, including United States, and many intergovernmental and nongovernmental organizations have made commitments to take serious efforts to prevent violent conflicts. These commitments represent a more than adequate normative foundation and a supportive political environment for development of more effective conflict prevention strategies.

International Business Strategy and Entrepreneurship: An Information Technology Perspective Ordóñez de Pablos, Patricia, 2013-11-30 There is a high demand in our society to adopt emerging technologies in all aspects of business and economic activity. As traditional business practices and economic activity are occurring in a global context, new areas of economic development are being recognized as the key enablers of wealth and income production. International Business Strategy and Entrepreneurship: An Information Technology Perspective discusses innovative solutions to research problems and high performance systems while emphasizing the role of IT and management for sustainable development. This book brings together academics, researchers, entrepreneurs, policy makers and government officers aiming to contribute to the debate of technology related to international business and strategic management.

**Climate Change and International Trade** Rafael Leal-Arcas, 2013-01-01 Rafael Leal-Arcas expertly examines the interface of climate change mitigation and international trade law with a view to addressing the question: How can we make best use of the international trading system experience to aim at a global climate change agreement? The insightful book contributes to developing the architecture for a post- 2012 global climate agreement and, in doing so, seeks and proposes new approaches to climate change mitigation by linking it to the international trade system. The author suggests the adoption of a bottom-up approach to climate change

negotiations by using the evolution of multilateral trade agreements as a model for reaching a global climate treaty. He discusses the innovative approach of inserting climate goals within regional trade agreements, given their proliferation – especially bilateral – in the international trading system. He explains the trade implications of climate change mitigation policies by analyzing a couple of areas where the international regimes for trade and climate change mitigation may potentially clash. Climate Change and International Trade will strongly appeal to undergraduate and graduate students of international and European trade law, international and European environmental law as well as social science academics. NGOs, think tanks, practitioners, researchers, and international organizations will also find plenty of valuable information in this timely resource.

**Self-Handicapping Leadership** Phillip J. Decker, Jordan Paul Mitchell, 2015-11-12 Every day, millions of employees watch their leaders sabotage themselves. They watch, they learn, and then they do it, too. Next thing you know, everyone's lost motivation, and nobody takes ownership. That's how organizations fail. This book will help you break the vicious cycle of self-handicapping leadership in your organization, stop the excuses, and unleash all the performance your team is capable of delivering. Phil and Jordan reveal how and why people handicap themselves even when they know better. Next, they offer real solutions from their own pioneering research and consulting. You'll find practical ways to strengthen accountability and self-awareness, recognize the "big picture," improve decision-making, deepen trust and engagement, develop talent, escape micromanagement, and focus relentlessly on outcomes. Your colleagues can be far more effective, and so can you. In fact, it starts with you—right here, right now, with this book. Many leaders inadvertently create cultures of failure. They model and promote "selfhandicapping" actions, where people withdraw effort or create new problems, in order to maintain their own self-images of competence. Self-Handicapping Leadership shines the spotlight on this widespread and destructive phenomenon and presents real action plans for overcoming it.

**Writing Genre Fiction** H. Thomas Milhorn, Howard T. Milhorn, 2006-03 Several years ago, after many years of writing nonfiction, I decided to write a novel—a medical thriller in the mold of Robin Cook, Michael Crichton, and Michael Palmer. The problem was that, although I knew how to write and had received a number of awards for nonfiction works, I didn't know how to write fiction. So, before putting fingers to keyboard I did a thorough search of the literature, which included reading numerous books and hundreds of website articles. What I discovered was that there simply wasn't one good source from which to learn the craft of writing genre fiction. Writing Genre Fiction: A Guide to the Craft is the book I was looking for when I set out on my quest to learn how to write fiction. It is an attempt to share what I learned from my research. It covers the six key elements of genre fiction; the various genres and subgenres; a large number of genre-fiction writing techniques; plot, subplots, and parallel plots; structure; scene and sequel; characterization; dialogue; emotions; and body language. It also covers additional information about copyrighting and plagiarism, where to get ideas, manuscript formatting and revision, and query letters and synopses. In addition, an appendix covers a large number of grammar tips.

**Just or Unjust War?** Mohammad Taghi Karoubi, 2017-11-30 This study examines the traditional theory of just war in the light of modern principles of international law relating to the prohibition on the use of force repeatedly stressed by UNGA (United Nations General Assembly) resolutions and accepted by the ICJ (International Court of Justice). The author expresses doubts as to whether actions by some permanent members of the Security Council starting from September 1996 until April 2003, in the Balkans and the Persian Gulf, are legitimate under the just war theory, or any other rules of international law, and analyses in detail the claims made by the allied powers to justify their actions. The book also examines the significance of the transformation in the limitation and prohibition

of the use of force in the contemporary legal system, by studying the origin of those tenets and their reflection in both the national laws of individual states and the international laws of armed conflict.

Language, Identity and Conflict Diarmait Mac Giolla Chríost, 2004-03-01 This innovative study of language and identity in recent and contemporary cases of ethnic conflict in Europe and Eurasia sets out a response to the limitations in the fields of linguistics and political science. Using examples of language policy and planning in conflict situations, it examines the functions of language as a marker of identity in ethnic conflict, and the extent to which language may be a causal factor in ethnic conflict.

Balancing on the brink Maarten Gehem, Philipp Marten, Matthijs Maas, Menno Schellekens, 2014-06-12 Since the Arab Spring, conflict in the Middle East and North Africa (MENA) has rapidly intensified. The drivers of these conflicts are still present and could spark future violence. This report looks at the vulnerability of MENA states to future conflict, and how this may impact Europe. We look at the four types of vulnerability

*The Destruction of Cultural Heritage in Iraq* Peter G. Stone, Joanne Farchakh Bajjaly, 2008 Discussion of the issues surrounding the destruction of cultural property in times of conflict has become a key issue for debate around the world. This book provides an historical statement as of 1st March 2006 concerning the destruction of the cultural heritage in Iraq. In a series of chapters it outlines the personal stories of a number of individuals who were - and in most cases continue to be - involved. These individuals are involved at all levels, and come from various points along the political spectrum, giving a rounded and balanced perspective so easily lost in single authored reports. It also provides the first views written by Iraqis on the situation of archaeology in Iraq under Saddam and an overview and contextualisation of the issues surrounding the looting, theft and destruction of the archaeological sites, the Iraqi National museum and the libraries in Baghdad since the war was launched in 2003. Beyond this, it examines our attitudes towards the preservation of cultural and heritage resources and, in particular, the growing political awareness of their importance. Although related to a single conflict, taking place at a specific time in history, the relevance of this work goes far beyond these self-imposed boundaries. PETER STONE is Professor of Heritage Studies and Head of School of Arts and Cultures at Newcastle University; JOANNE FARCHAKH BAJJALY is a Lebanese archaeologist and Middle East correspondent for the French magazine Archéologia.
