Handbook of Finsler geometry. 1 (2003) Peter L. Antonelli, 2003 There are several mathematical approaches to Finsler Geometry, all of which are contained and expounded in this comprehensive Handbook. The principal bundles pathway to state-of-the-art Finsler Theory is here provided by M. Matsumoto. His is a cornerstone for this set of essays, as are the articles of R. Miron (Lagrange Geometry) and J. Szilasi (Spray and Finsler Geometry). After studying either one of these, the reader will be able to understand the included survey articles on complex manifolds, holonomy, sprays and KCC-theory, symplectic structures, Legendre duality, Hodge theory and Gauss-Bonnet formulas. Finslerian diffusion theory is presented by its founders, P. Antonelli and T. Zastawniak. To help with calculations and conceptualizations, a CD-ROM containing the software package FINSLER, based on MAPLE, is included with the book.

Finslerian Geometries P.L. Antonelli, 2012-12-06 The International Conference on Finsler and Lagrange Geometry and its Applications: A Meeting of Minds, took place August 13-20, 1998 at the University of Alberta in Edmonton, Canada. The main objective of this meeting was to help acquaint North American geometers with the extensive modern literature on Finsler geometry and Lagrange geometry of the Japanese and European schools, each with its own venerable history, on the one hand, and to communicate recent advances in stochastic theory and Hodge theory for Finsler manifolds by the younger North American school, on the other. The intent was to bring together practitioners of these schools of thought in a Canadian venue where there would be ample opportunity to exchange information and have cordial personal interactions. The present set of refereed papers begins with the Pedagogical Section I, where introductory and brief survey articles are presented, one from the Japanese School and two from the European School (Romania and Hungary). These have been prepared for non-experts with the intent of explaining basic points of view. The Section III is the main body of work. It is arranged in alphabetical order, by author. Section II gives a brief account of each of these contributions with a short reference list at the end. More extensive references are given in the individual articles.

**Fundamentals of Finslerian Diffusion with Applications** P.L. Antonelli, T.J. Zastawniak, 2012-12-06 The erratic motion of pollen grains and other tiny particles suspended in liquid is known as Brownian motion, after its discoverer, Robert Brown, a botanist who worked in 1828, in London. He turned over the problem of why this motion occurred to physicists who were investigating kinetic theory and thermodynamics; at a time when the existence of molecules had yet to be established. In 1900, Henri Poincaré lectured on this topic to the 1900 International Congress of Physicists, in Paris [Wic95]. At this time, Louis Bachelier, a thesis student of Poincaré, made a monumental breakthrough with his Theory of Stock Market Fluctuations, which is still studied today, [Co064]. Norbert Wiener (1923), who was first to formulate a rigorous concept of the Brownian path, is most often cited by mathematicians as the father of the subject, while physicists will cite A. Einstein (1905) and M. Smoluchowski. Both considered Markov diffusions and realized that Brownian behaviour could be formulated in terms of parabolic 2 order linear p. d. e. 'so Furthermore, from this perspective, the covariance of changes in position could be allowed to depend on the position itself, according to the invariant form of the diffusion introduced by Kolmogorov in 1937, [KoI37]. Thus, any time homogeneous Markov diffusion could be written in terms of the Laplacian, intrinsically given by the symbol (covariance) of the p. d. e. , plus a drift vector. The theory was further advanced in 1949, when K.

The book also includes appendixes, notes, and a world map of coups d'état.

**Religions of the Stars** Richard Abanes, 2009-07-01 Today's culture is saturated with news about celebrities and their beliefs. Oprah Winfrey, Tom Cruise, and Madonna all promote their own brand of spirituality. What do they really believe, and does it line up with what the Bible teaches? This book answers these questions, appealing to those curious about the religions of the rich and famous while holding up their beliefs to the light of the gospel. Concerned parents will also gain insight into the religious influences their kids may be exposed to in the media.

**Full Stack GraphQL Applications** William Lyon, 2022-09-27 Build hyper-fast and hyper-efficient web applications with GraphQL! **Lagrange and Finsler Geometry** P.L. Antonelli,R. Miron,2013-03-09 The differential geometry of a regular Lagrangian is more involved than that of classical kinetic energy and consequently is far from being Riemannian. Nevertheless, such geometries are playing an increasingly important role in a wide variety of problems in fields ranging from relativistic optics to ecology. The present collection of papers will serve to bring the reader up-to-date on the most recent advances. Subjects treated include higher order Lagrange geometry, the recent theory of -Lagrange manifolds, electromagnetic theory and neurophysiology. Audience: This book is recommended as a (supplementary) text in graduate courses in differential geometry and its applications, and will also be of interest to physicists and mathematical biologists.

**The Diverse World of PDEs** I. S. Krasil'shchik,A. B. Sossinsky,A. M. Verbovetsky,2023-08-21 This volume contains the proceedings of the Alexandre Vinogradov Memorial Conference on Diffieties, Cohomological Physics, and Other Animals, held from December 13-17, 2021, at the Independent University of Moscow and Moscow State University, Moscow, Russia. The papers are devoted to various interrelations of nonlinear PDEs with geometry and integrable systems. The topics discussed are: gravitational and electromagnetic fields in General Relativity, nonlocal geometry of PDEs, Legendre foliated cocycles on contact manifolds, presymplectic gauge PDEs and Lagrangian BV formalism, jet geometry and high-order phase transitions, bi-Hamiltonian structures of KdV type, bundles of Weyl structures, Lax representations via twisted extensions of Lie algebras, energy functionals and normal forms of knots, and differential invariants of inviscid flows. The companion volume (Contemporary Mathematics, Volume 789) is devoted to Algebraic and Cohomological Aspects of PDEs.

**"An Arch Rebel Like Myself"** Gene C. Armistead,Robert D. Arconti,2018-07-19 Dan Showalter was Speaker Pro Tem of the California State Assembly at the outbreak of the Civil War and the exemplar of treason in the Far West among the pro-Union press. He gained notoriety as the survivor of California's last political (and actual, fatal) duel, for his role in the display of a Confederate flag in Sacramento, and for his imprisonment after an armed confrontation with Union troops. Escaping to Texas, he distinguished himself in the Confederate service in naval battles and in pursuit of Comanche raiders. As commander of the 4th Arizona Cavalry, he helped recapture the Rio Grande Valley from the Union and defended Brownsville against a combined Union and Mexican force. Refusing to surrender at war's end, he fled to Mexico, where he died of a wound sustained in a drunken bar fight at age 35.

**Women's Equality in America** Nancy Hendricks,2024-01-25 Written in vivid prose and with a keen eye for detail, Women's Equality in America is a valuable resource for understanding the issues and trends that dominate public discourse in discussions of women's rights and gender equality in America. Since its inception, the women's equality movement in America has been criticized for moving too slowly, moving too quickly, being too demanding, or not being demanding enough. Some of its goals have aroused passionate opposition in those who believed women's equality contradicted not only basic human biology, but also the word of God. Meanwhile, Americans voice starkly different opinions about where women stand in their quest for equality in American workplaces, classrooms, boardrooms, and homes. Women's Equality in America: Examining the Facts presents sensibly organized and accurate summaries of the relevant facts concerning all of these claims and counterclaims. But while the volume is primarily concerned with providing an accurate picture of the state of women's equality in the 21st century, it also provides vital contextual coverage of major historical turning points and important historical figures, from leaders of the Seneca Falls women's rights convention in 1848 to the organizers of the #MeToo movement.

*What if There's Nothing Wrong?* Alison J. Kay, PhD,2012-11-27 Have you been feeling like life has become less reliable and stable? Are you looking for more hope, health and calm in your life? You're not alone. There are external factors causing these feelings. You will be completely unable to remain the same as this book weaves you through the world as we have known it, into a world where anything is possible! No stone is left unturned through this thoroughly researched exploration of mostly unexamined factors inherent to Western society that set us up to feel more uncomfortable at this time in the West, particularly in the U.S., as we undergo a macroshift globally. Written at the tail end of her ten years living and working in Asia to understand why it seems now that we're less equipped to create vibrantly healthy, happy lives in the West, Alison J. Kay, Phd, documents an eye-opening, sometimes humorous, sometimes raw contrast of modern, globalized, Western culture with Asian. Feel the freedom as she gently guides you to more ease!

**Soul Food** Adrian Miller,2013-08-15 2014 James Beard Foundation Book Award, Reference and Scholarship Honor Book for Nonfiction, Black Caucus of the American Library Association In this insightful and eclectic history, Adrian Miller delves into the influences, ingredients, and innovations that make up the soul food tradition. Focusing each chapter on the culinary and social history of one dish--such as fried chicken, chitlins, yams, greens, and red drinks--Miller uncovers how it got on the soul food plate and what it means for African American culture and identity. Miller argues that the story is more complex and surprising than commonly thought.

Four centuries in the making, and fusing European, Native American, and West African cuisines, soul food--in all its fried, pork-infused, and sugary glory--is but one aspect of African American culinary heritage. Miller discusses how soul food has become incorporated into American culture and explores its connections to identity politics, bad health raps, and healthier alternatives. This refreshing look at one of America's most celebrated, mythologized, and maligned cuisines is enriched by spirited sidebars, photographs, and twenty-two recipes.

**The Coloniality of Modern Taste** Zilkia Janer,2022-12-30 This book analyzes the coloniality of the concept of taste that gastronomy constructed and normalized as modern. It shows how gastronomy’s engagement with rationalist and aesthetic thought, and with colonial and capitalist structures, led to the desensualization, bureaucratization and racialization of its conceptualization of taste. The Coloniality of Modern Taste provides an understanding of gastronomy that moves away from the usual celebratory approach. Through a discussion of nineteenth-century gastronomic publications, this book illustrates how the gastronomic notion of taste was shaped by a number of specifically modern constraints. It compares the gastronomic approach to taste to conceptualizations of taste that emerged in other geographical and philosophical contexts to illustrate that the gastronomic approach stands out as particularly bereft of affect. The book argues that the understanding of taste constructed by gastronomic texts continues to burden the affective experience of taste, while encouraging patterns of food consumption that rely on an exploitative and unsustainable global food system. This book will appeal to students and scholars interested in cultural studies, decoloniality, affect theory, sensory studies, gastronomy and food studies.
