Tears of laughter Nigel Mather,2019-01-04 *Tears of laughter'* examines the interactions of comedy and drama in three vital thematic strands of British cinema during the 1990s: comedies exploring issues of class, culture and community in British society, 'ethnic' comedy-dramas engaging with complex issues of identity and allegiance in modern Britain, and romantic comedies featuring characters searching (somewhat desperately or frantically) for a suitable and desirable long-term or short-term partner. The study discusses these specific films and a range of other 1990s British comedy-drama films within the context of community-orientated Ealing comedy classics, contentious situation comedies treating race relations as both a

Introducing the latest neuroscience research, it gives practitioners essential data—in an easily accessible form—with which to take on the challenges of increasingly complex human problems and diagnoses. Key Features Takes readers on a tour of the brain and makes dense scientific material more engaging Provides a framework for how human service professionals can understand and implement

**Creating Cyber Libraries** Kathleen W. Craver, 2002-05-30 As prices of traditional library materials increase, and space to house them shrinks, savvy school library media specialists are creating cyber libraries, or school libraries on the Internet. These libraries offer students and their parents 24-hour access and are invaluable for providing up-to-date information in a way traditional materials cannot. This guide outlines the steps library media specialists can take to create a cyber library, provide content and policies for use, and maintain it for maximum efficiency. Craver justifies the need for cyber libraries in the 21st century, and how they can help librarians to meet the standards in *Information Power* (1998). She explains the different types of cyber libraries available, along with their advantages and disadvantages. She discusses how to construct them using portals or by acquiring fee-based cyber libraries, and what policies should be in place to protect both the school and its students. Also included are instructions for

establishing remote access to subscription databases, creating cyber reading rooms, and providing instructional services to student users. Once a cyber library is created, it must be maintained and evaluated to keep it useful and current, and this book provides guidelines to do so. Finally, there is a chapter on promoting the cyber library, so the school community is aware of its features and participates in its growth process. No school library should be without this volume!
