Digital Identities Rob Cover, 2015-10-06 Online Identities: Creating and Communicating the Online Self presents a critical investigation of the ways in which representations of identities have shifted since the advent of digital communications technologies. Critical studies over the past century have pointed to the multifaceted nature of identity, with a number of different theories and approaches used to explain how everyday people have a sense of themselves, their behaviors, desires, and representations. In the era of interactive, digital, and networked media and communication, identity can be understood as even more complex, with digital users arguably playing a more extensive role in fashioning their own self-representations online, as well as making use of the capacity to co-create common and group narratives of identity through interactivity and the proliferation of audio-visual user-generated content online. Makes accessible complex theories of identity from the perspective of today's contemporary, digital media environment Examines how digital media has added to the complexity of identity Takes readers through examples of online identity such as in interactive sites and social networking Explores implications of inter-cultural access that emerges from globalization and world-wide networking

Genascent Cj Canna, 2011-08 For the general public it is what they might want to know before using or investing in the science; journal articles in common language, ethical/legal questions, funny stories that tell something about the science or the research environment. The author has written a trilogy of movie scripts named *Genascent: Footprints in Time* which covers Gregor Mendel through 1993; *Genascent II: the Living*

Code the start-up through the completion of sequencing; and Genascent III: So It Is Written Genome's impact in fighting disease.

When Biospheres Collide: A History of NASA's Planetary Protection Programs Michael Meltzer, 2012-01-27 PRINT FORMAT ONLY NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT- OVERSTOCK SALE -- Significantly reduced list price This new book from the NASA History Series tackles an interesting duo of biological problems that will be familiar to anybody who has seen photos of Apollo astronauts quarantined after their return to Earth. Namely, how do we avoid contaminating celestial bodies with Earthly germs when we send spacecraft to study these bodies, and how do we avoid spreading foreign biological matter from space when our robotic and human spacefarers return to Earth? Biological matter from an external system could potentially cause an unchecked epidemic either on Earth or in space so strict precautions are necessary. Each time a space vehicle visits another world it runs the risk of forever changing that extraterrestrial environment. We are surrounded on Earth by a mélange of different microorganisms, and if some of these hitchhike onboard a space mission, they could contaminate and start colonies on a different planet. Such an occurrence would irrevocably alter the nature of that world, compromise all future scientific exploration of the body, and possibly damage any extant life on it. By inadvertently carrying exotic organisms back to Earth on our spacecraft, we also risk the release of biohazardous materials into our own ecosystem. Such concerns were recognized by scientists even before the 1957 launch of Sputnik. This book presents the history of planetary protection by tracing the responses to the above concerns on NASA's missions to the Moon, Mars, Venus, Jupiter, Saturn, and many smaller

bodies of our solar system. The book relates the extensive efforts put forth by NASA to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own. To protect irreplaceable environments, NASA has committed to conducting space exploration in a manner that is protective of the bodies visited, as well as of our own planet.

Returning People to the Moon After Apollo Pat Norris, 2019-06-04 July 2019 marks 50

years since Neil Armstrong took his famous first steps on the surface of the Moon. As people around the world celebrate the anniversary of this great American achievement, they might wonder why there have been no further human missions to the Moon since Apollo 17 in 1972. This book assesses the legacy of the Apollo missions based on several decades of space developments since the program's end. The question of why we haven't sent humans back to the Moon is explored through a multidisciplinary lens that weaves together technological and historical perspectives. The nine manned Apollo missions, including the six that landed on the Moon, are described here by an author who has 50 years of experience in the space industry and whose work spanned the Apollo 8-13 missions. The final section of the book provides a comprehensive assessment of today's programs and current plans for sending humans to the Moon.

The Soil Fixers Harold B. Rudy, 2018-09-24 Are they human, biological, extraterrestrial? The future of our food, our waterways, our climate, and our civilization depend upon soil. How we conserve, or repair damage to this essential resource is one of the most important commitments of our generation! This author leads us on a 30-year journey of discovery working with those closest to the land as they tackle significant challenges of soil protection, restoration, and sustainability.

Diamonds and Conflict Arthur V. Levy, 2003 The mining and sales of diamonds by parties to participants of armed conflicts, notably in Africa, are regarded as a significant factor fuelling such hostilities. These diamonds, labelled 'conflict diamonds', make up an estimated 3.7 per cent to 15 per cent of the value of the global diamond trade. In response to public pressure to halt the trade of conflict diamonds and due to the persistence of

diamond-related conflicts, governments and multi-lateral organisations have taken diplomatic action to combat the trade. Several international policy making forums, including the UN, have addressed the problem, and the international diamond industry and non-governmental organisations have proposed a range of reforms and legislative initiatives to halt the illicit trade. This new book examines the diamond-related African conflicts, the various methods that are being researched and used to 'tag' diamonds with microscopic markings, and the efforts taken to regulate the marketing and exporting of diamonds.

Calculated Risk George Leopold, 2016-06-15 Unlike other American astronauts, Virgil I. Gus Grissom never had the chance to publish his memoirs. Killed along with his crew in a launch pad fire on January 27, 1967, Grissom also lost his chance to walk on the moon and return to describe his journey. Others went in his place. The stories of the moon walkers are familiar. Less appreciated are Grissom's contributions. The international prestige of winning the Moon Race cannot be understated, and Grissom played a pivotal and enduring role in securing that legacy for the United States. Indeed, Grissom was first and foremost a Cold Warrior, a member of the first group of Mercury astronauts whose goal it was to beat the Soviet Union into space and eventually to the moon. Drawing on extensive interviews with fellow astronauts, NASA engineers, family members, and friends of Gus Grissom, George Leopold delivers a comprehensive and corrective account of Grissom's life that places his career in the context of the Cold War and the history of human spaceflight. *Calculated Risk: The Supersonic Life and Times of Gus Grissom* adds significantly to our understanding of that tumultuous and ultimately triumphant period in

American history.

Capital and Knowledge in Asia Heidi Dahles, Otto van den Muijzenberg, 2003-09-02
Global economic integration, widening communication networks and government policies supportive of private enterprise are changing opportunities for accumulating wealth, status and power. In varying degrees throughout Asia, this process is accompanied by the development of service enterprises such as banking, insurance, legal firms and IT firms, which provide access to the resources required for a profitable connection to the wider world. This book focuses on the key role played by producer services in shaping new business areas and new patterns for social mobility, and their interdependence with the State as either a facilitator of, or an obstacle to, the emergence and flourishing of the new professions.

The State at War in South Asia Pradeep Barua, 2005-01-01 This study offers a panoramic view of the evolution of the South Asian state's military system and its contribution to the effectiveness of the state itself.--BOOK JACKET.
