Sound Actions Alexander Refsum Jensenius,2022-12-13 A techno-cognitive look at how new technologies are shaping the future of musicking. “Musicking” encapsulates both the making of and perception of music, so it includes both active and passive forms of musical engagement. But at its core, it is a relationship between actions and sounds, between human bodies and musical instruments. Viewing musicking through this lens and drawing on music cognition and music technology, Sound Actions proposes a model for understanding differences between traditional acoustic “sound makers” and new electro-acoustic “music makers.” What is a musical instrument? How do new technologies change how we perform and perceive music? What happens when composers build instruments, performers write code, perceivers become producers, and instruments play themselves? The answers

to these pivotal questions entail a meeting point between interactive music technology and embodied music cognition, what author Alexander Refsum Jensenius calls “embodied music technology.” Moving between objective description and subjective narrative of his own musical experiences, Jensenius explores why music makes people move, how the human body can be used in musical interaction, and how new technologies allow for active musical experiences. The development of new music technologies, he demonstrates, has fundamentally changed how music is performed and perceived.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Geriatric Physical Therapy - eBook Andrew A. Guccione,Dale Avers,Rita Wong,2011-03-07

Geriatric Physical Therapy offers a comprehensive presentation of geriatric physical therapy science and practice. Thoroughly revised and updated, editors Andrew Guccione, Rita Wong, and Dale Avers and their contributors provide current information on aging-related changes in function, the impact of these changes on patient examination and evaluation, and intervention approaches that maximize optimal aging. Chapters emphasize evidence-based content that clinicians can use throughout the patient management process. Six new chapters include: Exercise Prescription, Older Adults and Their Families, Impaired Joint Mobility, Impaired Motor Control, Home-based Service Delivery, and Hospice and End of Life. Clinically accurate and relevant while at the same time exploring theory and rationale for evidence-based practice, it's perfect for students and practicing clinicians. It's also an excellent study aid for the Geriatric Physical Therapy Specialization exam. Comprehensive coverage provides all the foundational knowledge needed for effective management of geriatric disorders. Content is written and reviewed by leading experts in the field to ensure information is authoritative, comprehensive, current, and clinically accurate. A highly readable writing style and consistent organization make it easy to understand difficult concepts. Tables and boxes organize and summarize important information and highlight key points for quick reference. A well-referenced and scientific approach provides the depth to understand processes and procedures. Theory mixed with real case examples show how concepts apply to practice and help you enhance clinical decision-making skills. Standard APTA terminology familiarizes you with terms used in practice. A new chapter, Exercise Prescription, highlights evidence-based exercise prescription and the role of physical activity and exercise on the aging process. A new chapter, Older Adults and Their Families, helps physical therapists understand the role spouses/partners and adult children can play in rehabilitation, from providing emotional support to assisting with exercise programs and other daily living activities. New chapters on Impaired Joint Mobility, Impaired Motor Control, Home-based Service Delivery, and Hospice and End of Life expand coverage of established and emerging topics in physical therapy. Incorporates two conceptual models: the Guide to Physical Therapist Practice, 2nd Edition, and the International Classification of Function, Disability, and Health (ICF) of the World Health Organization (WHO) with an emphasis on enabling function and enhancing participation rather than concentrating on dysfunction and disability A companion Evolve website includes all references linked to MEDLINE as well as helpful links to other relevant websites.

Beyond Unwanted Sound Marie Thompson,2017-02-09 Noise is so often a 'stench in the ear' – an unpleasant disturbance or an unwelcome distraction. But there is much more to noise than what greets the ear as unwanted sound. *Beyond Unwanted Sound* is about noise and how we talk about it. Weaving together affect theory with cybernetics, media histories, acoustic ecology, geo-politics, sonic art practices and a range of noises, Marie Thompson critiques both the conservative politics of silence

and transgressive poetics of noise music, each of which position noise as a negative phenomenon. Beyond Unwanted Sound instead aims to account for a broader spectrum of noise, ranging from the exceptional to the banal; the overwhelming to the inaudible; and the destructive to the generative. What connects these various and variable manifestations of noise is not negativity but affectivity. Building on the Spinozist assertion that to exist is to be affected, Beyond Unwanted Sound asserts that to exist is to be affected by noise.

Spirits of our Whaling Ancestors Charlotte Côté, 2015-07-21 Following the removal of the gray whale from the Endangered Species list in 1994, the Makah tribe of northwest Washington State announced that they would revive their whale hunts; their relatives, the Nuuchah-nulth Nation of British Columbia, shortly followed suit. Neither tribe had exercised their right to whale - in the case of the Makah, a right affirmed in their 1855 treaty with the federal government - since the gray whale had been hunted nearly to extinction by commercial whalers in the 1920s. The Makah whale hunt of 1999 was an event of international significance, connected to the worldwide struggle for aboriginal sovereignty and to the broader discourses of environmental sustainability, treaty rights, human rights, and animal rights. It was met with enthusiastic support and vehement opposition. As a member of the

Nuu-chah-nulth Nation, Charlotte Cote offers a valuable perspective on the issues surrounding indigenous whaling, past and present. Whaling served important social, economic, and ritual functions that have been at the core of Makah and Nuuchahnulth societies throughout their histories. Even as Native societies faced disease epidemics and federal policies that undermined their cultures, they remained connected to their traditions. The revival of whaling has implications for the physical, mental, and spiritual health of these Native communities today, Cote asserts. Whaling, she says, “defines who we are as a people.” Her analysis includes major Native studies and contemporary Native rights issues, and addresses environmentalism, animal rights activism, anti-treaty conservatism, and the public’s expectations about what it means to be “Indian.” These thoughtful critiques are intertwined with the author’s personal reflections, family stories, and information from indigenous, anthropological, and historical sources to provide a bridge between cultures. *A Capell Family Book*

How To Be a Geek Matthew Fuller, 2017-05-15 Computer software and its structures, devices and processes are woven into our everyday life. Their significance is not just technical: the algorithms, programming languages, abstractions and metadata that millions of people rely on every day have far-reaching implications for the way we understand the underlying dynamics of contemporary societies. In this innovative new book, software studies theorist Matthew Fuller examines how the introduction and expansion of computational systems into areas ranging from urban planning and state surveillance to games and voting systems are transforming our understanding of politics, culture and aesthetics in the twenty-first century. Combining historical insight and a deep understanding of the technology powering modern software systems with a powerful critical perspective, this book opens up new ways of understanding the fundamental infrastructures of contemporary life, economies, entertainment and warfare. In so doing Fuller shows that everyone must learn ‘how to be a geek’, as the seemingly opaque processes and structures of modern computer and software technology have a significance that no-one can afford to ignore. This powerful and engaging book will be of interest to everyone interested in a critical understanding of the political and cultural ramifications of digital media and computing in the modern world.
