**The Crash of A Civilization** Kanchan Banerjee, 2022-07-13 The Current condition of each citizen, the society, and the nation are the result of a deeply complex history. But what we know from history books, especially academic textbooks, are constructs based on the narratives of political powers, colonists, and outdated socioeconomic analysts. The time has come to know and understand our true history from fresh and updated perspectives. The subject of this book is how foreign ideologies and forces Christian, Islamic, and later colonists, western and Marxists' profound and long-term influence have impacted India, her society, and people. With a computer science background, Kanchan Banerjee makes this remarkable and significant contribution, attempting to depict the current era with unique and lively storytelling using carefully studied evidence, logical deduction, and analysis. He has given detailed and comprehensive descriptions and assessments from pre-Islamic Arabia's history, foreign attacks and invasions of the Huns, the Turks to the Islamic rule and occupation in Delhi, and the British colonial and imperial atrocities. How did the crash and fall of a great ancient civilization happen? How has it been wounded the body and soul of a nation to break into several pieces? And what is the way to change the direction to the path of recovery and revival? This book is an effort to find the answers to these questions from our true history. If we know our past, we can change our future as well.

**Facebook Nation** Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

**Traffic Safety and Human Behavior** David Shinar, 2017-06-22 This comprehensive 2nd edition covers the key issues that relate human behavior to traffic safety. In particular it covers the increasing roles that pedestrians and cyclists have in the traffic system; the role of infotainment in driver distraction; and the increasing role of driver assistance systems in changing the driver-vehicle interaction.

**Myths of Leadership** Jo Owen, 2017-10-03 WINNER: CMI Management Book of the Year 2019 - Aspiring Leaders Category The best leaders are born, not made. The best leaders are always in control. The best leaders are those with the highest IQs. But are they really? The thinking surrounding what makes the greatest leaders is increasingly muddled by stereotypes, snake oil promises and pseudo-science. The best leaders rely on fact, not fads. Myths of Leadership blasts away the fluff and confronts false legends head on. Jo Owen uses the most credible research to analyze each myth, using international business case studies, leadership theory and insightful interviews, to uncover the truth. This is a compelling and practical examination of the most pervasive misconceptions about leadership that will help you elevate your own leadership abilities, better inspire your team and empower your organization by thinking differently. Entertaining but evidence-based, Myths of Leadership throws out the management jargon and skewers over-hyped leadership trends to bring you the best practical tips you need to become a better leader.

Of Ants and Men David G. Green, 2014-05-12 Why do things go wrong? Why, despite all the planning and care in the world, do things go from bad to worse? This book argues that it is because we are like the ants. Just as ants create an anthill without being aware of it, unintended side effects of human activity create all manner of social trends and crises. The book traces the way these trends emerge and the role they play in some of the major issues of our time. One of the greatest challenges today is the complexity of our social and economic systems. Every action has side effects that people often ignore or fail to see. The book examines the ways in which limitations in our thinking and behaviour lead to unintended side effects. It looks at the role played by complex networks of interactions. Finally, it looks at the way side effects of new technologies, especially computers and communication, have created an Information Revolution, the full repercussions of which are yet to be seen. In our race to create new technologies and sustain indefinite economic growth, we are at best dimly aware of the ways in which we are transforming society and threatening our environment.

**Design Exception Practices** John Michael Mason, Kevin M. Mahoney, National Cooperative Highway Research Program, 2003 This report describes the range of design exception practices among state transportation agencies (STAs) and discusses the problems and suggested improvements based on the experience of state agency personnel. All STAs are required to comply with the same federal regulation pertaining to design exceptions. However, the number of design exceptions, the circumstances under which they are prepared, and the methods employed vary considerably, with many factors contributing to this wide range of practice. This synthesis characterizes (1) conditions that require a design exception, (2) data collection and analysis techniques, and (3) internal STA and external rules. The report also describes benefits and problems experienced by STAs and identifies suggestions for improving and streamlining the design exception process. In addition, the innovative practices of two states (New Jersey and Wisconsin) are identified and discussed.
