America's Environmental Report Card, second edition Harvey Blatt, 2011-02-25

An accessible overview of the most important environmental issues facing the United States, with new and updated material. Americans are concerned about the state of the environment, and yet polls show that many have lost faith in both scientists' and politicians' ability to solve environmental problems. In *America's Environmental Report Card*, Harvey Blatt sorts through the deluge of conflicting information about the environment and offers an accessible overview of the environmental issues that are most important to Americans today. Blatt has thoroughly updated this second edition, revising and adding new material. He looks at water supplies and new concerns about water purity; the dangers of floods (increased by widespread logging and abetted by glacial melting); infrastructure problems (in a new chapter devoted entirely to this subject); the leaching of garbage buried in landfills; soil, contaminated crops, and organic food; fossil fuels; alternative energy sources (in another new chapter); controversies over nuclear energy; the increasing pace of climate change; and air pollution. Along the way, he outlines ways to deal with these problems—workable and reasonable solutions that map the course to a sustainable future. America can lead the way to a better environment, Blatt argues. We are the richest nation in the world, and we can afford it—in fact, we can't afford not to.

Bill Clifton Bill C Malone, 2016-09-20 The most atypical of bluegrass artists, Bill Clifton

has enjoyed a long career as a recording artist, performer, and champion of old-time music. Bill C. Malone pens the story of Clifton's eclectic life and influential career. Born into a prominent Maryland family, Clifton connected with old-time music as a boy. Clifton made records around earning a Master's degree, fifteen years in the British folk scene, and stints in the Peace Corps and Marines. Yet that was just the beginning. Closely allied with the Carter Family, Woody Guthrie, Mike Seeger, and others, Clifton altered our very perceptions of the music--organizing one of the first outdoor bluegrass festivals, publishing a book of folk and gospel standards that became a cornerstone of the folk revival, and introducing both traditional and progressive bluegrass around the world. As Malone shows, Clifton clothed the music of working-class people in the vestments of romance, celebrating the log cabin as a refuge from modernism that rang with the timeless music of Appalachia. An entertaining account by an eminent music historian, Bill Clifton clarifies the myths and illuminates the paradoxes of an amazing musical life.

Searching for Eternity Donald R. Morse, 2000 What happens when we die? Do we simply cease to exist with our consciousness obliterated for all eternity? Or do we have an enduring soul that can continue to experience awareness and some form of ongoing 'life.' Does God exist? Without a creator, how can the universe exist? What is the purpose of the universe and what is its ultimate fate? Does our behavior in day-to-day life really influence what happens to us after we die? Why do many people believe in a heaven and a hell? What is the basis of these beliefs? Should we be anxious about our death or just enjoy life in the here-and-now? Can these ultimate mysteries be solved by science? What does science already know about the mysteries of creation? Sooner or later, all of us will face the stark reality of death. Many people go through life with an increasing awareness -- and increasing anxiety -- about their eventual fate. Dr. Don Morse, a scientist who believed in the absolute finality of death, did, too. Then his near-death experience led him on a quest to uncover what science knows about the nature of death. Dr. Morse's subsequent spiritual journey led him through the entire realm of science and religious beliefs until he came to an inescapable conclusion: Some form of an afterlife must exist. Join Dr. Morse as he summarizes the vast research and data leading to this conclusion. Near-death and out-of-body experiences, experiments creating apparitions, research attempting to weight the soul, and the wide range of ancient and modern spiritual concepts are all covered in this masterful, comprehensive scientific quest for truth.--back cover.

Colorado and the Silver Crash John F. Steinle,2021-07-05 A catastrophic depression engulfed Colorado in 1893. The government's decision to adopt the gold standard and stop buying silver hit the mining industry like a cave-in. Unemployment reached 90 percent in Leadville, a city built on silver. Strikes by union miners in Cripple Creek and Leadville led to destruction and death. Political parties split along battle lines of gold versus silver. By 1898, the country had begun to recover, but silver mining was never the same. Using firsthand commentary and more than one hundred historic photographs, John Steinle skillfully commemorates the story of Coloradans trapped in the unprecedented social, economic and political conflict of America's first great depression.

Coping with the Collapse of the Old Order: Kenneth Hall,Myrtle Chuck-A-Sang,2013-02-19 On July 4, 2009, the region celebrated thirty-six years as a formal Caribbean Community (CARICOM). The analyses contained in this publication in the The Integrationist Series all tend to suggest that CARICOM now, more than ever, needs to transform its experiences over these years into a more structured foundation for maximising the multiplier effects of collective representation, and for leveraging CARICOMs diplomatic efforts and resources in a more coordinated and integrated manner. This imperative is necessitated by the rapidly changing international environment which has far too often impacted negatively on small developing countries, leaving them increasingly vulnerable and marginalized.

Business and Management Practices in South Asia Arijit Sikdar,Vijay Pereira,2018-09-04 This book presents case studies of South Asian companies that have strategic business implications, highlighting the complex interplay of business and social dynamics in South Asia. This region is a wide agglomeration of very different countries that share somewhat common cultures and issues and yet it is torn apart by religion and politics. There is an abundance of local entrepreneurship but a widespread institutional void. The book investigates how local companies survive and thrive in this environment and discusses those companies that have withstood the competitive pressure of MNCs, depicting their management and business practices. In today's world, where multinationals are so omnipresent that their management and business practices are considered as the de facto recipe for success, there is a need to have an alternative view that challenges the

ubiquitousness of multinational management practices. The case studies in this book focus on the business and management practices of local organizations in South Asia and thus provide that alternative viewpoint of how to achieve success in South Asia. Exposing readers to a local perspective on doing business in South Asia, it is a valuable resource for students and practitioners of management.
