Surviving Accidents and Crashes Marcia Amidon Lusted,2014-03-01 Most people don't have to worry about being buried alive or falling into a sinkhole. And when you travel by plane, you don't usually end up plunging to the ground after takeoff. But accidents happen. How you react to them can mean the difference between life and death. See how these people kept their wits in stressful situations and survived.

They were organized in topical sections named: authentication mechanism; cloud computing security; data mining for security application; privacy-preserving technologies; network security and forensics; searchable encryption; security policy and access control; security protocols, symmetric key cryptography; system security; Web security. The volume also contains one invited paper.

Bulls, Bears and the Ballot Box Bob Deitrick,Lew Goldfarb (Lawyer),2012 The authors review 80 years of our nation's economic history from the Great Depression and Herbert Hoover, to the Great Recession and George W. Bush. They explain the economic stumbles and triumphs posted by these 13 presidents as CEO's of the American economy.

Fadó Rónán Gearóid Ó Domhnaill,2013-11-01 With Fadó, long forgotten about episodes from Irish history are presented in easy to follow short chapters. Who was Crom Cruach and what are Holy Wells? Who were the priest catchers and why were corpses stolen? How did a Cork woman become a feared pirate of the Caribbean and why is William Melville not loved by all in his native county? For such a small island, Ireland has history and archaeology in abundance and much of this is often only known to people in the locality. The author has travelled the island extensively and researched long forgotten characters and events, some of whom are stranger than fiction. Irish men and women of all hues and generations are examined here as the reader is guided through a land of heroes and villains, saints and scholars, pestilence and prosperity. Fadó is a book that can be read with ease and the author's passion for his subject is infectious. It is a must read for anyone interested in Irish history.

Little Minnesota in World War II Jill A. Johnson,Deane L. Johnson,2017-09-05 During World War II, a total of 165 men from Minnesota's smallest towns gave their lives for our country. Several were awarded the Distinguished Service Cross, Distinguished Flying Cross, Silver Star, and Bronze Star. All received the award no one wanted: the Purple Heart. Most of their stories have never been told publicly. Little Minnesota in World War II, by Jill A. Johnson and Deane L. Johnson, honors these brave men from the smallest rural towns. From John Emery (who died December 7, 1941, on board the USS Arizona) to Herman Thelander (who was lost in the Bermuda Triangle, a mystery unsolved to this day), this unique book allows you to experience the war through personal accounts of the men and their families. With photos from the war, scans of actual letters, journal excerpts, and family memories, this one-of-a-kind book brings history to life and will make you feel prouder than ever to be Minnesotan.

Flying in the Face of Criminalization Sofia Michaelides-Mateou,Andreas Mateou,2016-04-15 Two parallel investigations take place after every aviation accident: one technical, one judicial. The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents. The judicial investigation, however, has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability. Consequently, this results in a predicament for those parties that have been identified as having played a role in the accident, a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and, on the other hand, supplying such information which may possibly be used against them in subsequent criminal prosecution. The situation is compounded by inconsistent approaches between different legal systems; aviation professionals may find themselves faced with criminal charges in one country but not in another, and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law. Aviation safety is, to a large extent, built upon the trust placed by pilots, ATCOs and other aviation professionals in the process of accident investigation. This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety.

NATIONAL HIGHWAYS AND MOTORWAY POLICE IN PAKISTAN: An Illuminative Study Saima Manzoor Arain,Akif Manzoor Arain,2016-07-07 The Motorway Police System in Pakistan is designed in a manner which enables law enforcement and does not encourage corruption. Enforcement action is transparent because of the tools made available and the manner in which SOPs have been prepared. It operates a traffic law which is as good as any in the world. The officers work in eight hour shifts and get weekly holidays by rotation. They live and work on the highway and are well compensated to be able to run two kitchens. In view of this, the Motorway Police has become a model for policing in Pakistan. Asad Jahangir Khan Ex-IG NH&MP. Thus it is thought provoking: it is revolutionary, opening new vistas and bold horizons of intellectual endeavors. This book is scholarly written and exquisitely presented.

Handbook for the Amateur UFO Investigator Brian D. Parsons,2017-07-06 The Handbook for the Amateur UFO Investigator explores the historical and cultural side of UFOs as it ties into our current beliefs in UFO and related experiences. From there it pulls back the curtain to reveal some of the logical explanations behind an overwhelming majority of UFO sightings. This book provides a balanced view of Unidentified Flying Objects and attempts to arm the reader with a skeptical mind and an eye for detail. A thorough interviewing methodology, basic investigation and research methods, as well as a variety of additional resources will help get you started on your way to becoming a successful UFO researcher and investigator.

The Next Crash Amy L. Fraher, 2014-05-13 If you are one of over 700 million passengers who will fly in America this year, you need to read this book. The Next Crash offers a shocking perspective on the aviation industry by a former United Airlines pilot. Weaving insider knowledge with hundreds of employee interviews, Amy L. Fraher uncovers the story airline executives and government regulators would rather not tell. While the FAA claims that this is the Golden Age of Safety, and other aviation researchers assure us the chance of dying in an airline accident is infinitesimal, The Next Crash reports that 70 percent of commercial pilots believe a major airline accident will happen soon. Who should we believe? As one captain explained, Everybody wants their \$99 ticket, but you don't get [Captain] Sully for ninety-nine bucks. Drawing parallels between the 2008 financial industry implosion and the post-9/11 airline industry, The Next Crash explains how aviation industry risk management processes have not kept pace with a rapidly changing environment. To stay safe the system increasingly relies on the experience and professionalism of airline employees who are already stressed, fatigued, and working more while earning less. As one copilot reported, employees are so distracted it's almost a miracle that there wasn't bent metal and dead people at his airline. Although opinions like this are pervasive, for reasons discussed in this book, employees' issues do not concern the right people—namely airline executives, aviation industry regulators, politicians, watchdog groups, or even the flying public—in the right way often enough. In contrast to popular notions that airliner accidents are a thing of the past, Fraher makes clear America is entering a period of unprecedented aviation risk.

No Accident Neil Arason, 2014-04-29 It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions, the European Union, centres in the United States, and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though, citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by-product of human carnage is relegated to history. No Accident examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers; human-related driving errors related to fatigue, speed, alcohol, and distraction and roads; pedestrians, cyclists, and public transit; road engineering; motor vehicle regulation; auto safety design; and collision-avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.

Disaster Planning and Control William Michael Kramer, 2009 In this new book, Bill Kramer examines the complexities of disaster planning and control, covering the concepts of disaster management, development of disaster and emergency operation plans, and much more. Through examples and case studies, the book is designed to allow the fire officer to study how the fire service has been involved with responding to various disasters and, by learning from the past and understanding the concepts presented, make a difference in the overall outcome of future events. Disaster Planning and Control will be an invaluable resource for anyone involved in disaster response—from the frontline worker to the highest elected official. This book is written to the FESHE model curriculum for the Disaster Planning and Recovery course.

Bracing for Impact Robin Suerig Holleran, Lindy Philip, 2015-10-27 "Surviving is a true blessing that few get to experience." Being strapped in the seat of a plane as it plunges into a nosedive midair is everyone's worst nightmare. Bracing for Impact's compilers and contributors know. They have both lived out that fear and survived, albeit badly hurt, in their own plane crashes. In this collection of true-life survivor tales, people from all walks of life—a freelance writer, a crew member of the Lynyrd Skynyrd band, a naval flight surgeon, a teenager, and a newlywed on her honeymoon, among others—recount their traumatic narrow escapes as engines stalled, fuel ran out, hazardous weather conditions descended, and landings did not go according to plan. In the face of death, as life flashed before their eyes—or not, as some wryly note—these survivors encountered the terrific split of before and after the crash. Their lives, though preserved, would change forever. Perhaps more significant than the crash itself is how each story plays out in the aftermath of the ordeal. In heart-wrenching, unrelenting honesty, these stories explore the wide spectrum of impacts on survivors—ranging from debilitating fear, post-traumatic stress disorder, and substance abuse, to a renewed sense of urgency, where survivors swear to live each day to the fullest and rededicate their lives to helping others. Including the 1977 story of the Lynyrd Skynyrd plane crash that killed lead singer Ronnie Van Zant, guitarist Steve Gaines, and vocalist Cassie Gaines, Bracing for Impact is as much a horrific account of air disasters as it is a celebration and recognition of the people who survived them. Fans of the 2016 Clint Eastwood film Sully starring Tom Hanks will enjoy this edge-of-your-seat read!

Crashing the Net Samantha Wayland, 2019-11-01 Mike comes to Moncton wanting nothing more than to play for the Ice Cats and finally live on his own terms. He's broke, bruised, and covered from head to toe in cheap lube, but he isn't going to let that stop him. All he needs is a place to live and some time to figure out how to reconcile who he really is with who everyone wants him to be. Dumping three gallons of lube on the new kid is just another day at the office for Alexei. He knows exactly who he is: a goalie on the ice, a prankster in the locker room, and a man who knows better than to share his private life with anyone. He's let people in before and it's taught him that if he can't have what he really wants, it's better to be alone. Despite their apparent differences, an unlikely friendship grows. Neither of them could ever have guessed how much they really have in common.
