National Cyber Emergencies Greg Austin,2020-01-23 This book documents and explains civil defence preparations for national cyber emergencies in conditions of both peace and war. The volume analyses the escalating sense of crisis around state-sponsored cyber attacks that has emerged since 2015, when the United States first declared a national emergency in cyberspace. It documents a shift in thinking in the USA, from cooperative resilience-oriented approaches at national level to more highly regulated, state-led civil defence initiatives. Although the American response has been mirrored in other countries, the shift is far from universal. Civil defence strategies have come into play but the global experience of that has not been consistent or even that successful. Containing contributions from well-placed scholars and practitioners, this volume reviews a selection of national experiences (from the USA, Australia, India, China, Estonia, and Finland) and a number of key thematic issues (information weapons, alliance coordination, and attack simulations). These demonstrate a disconnect between the deepening sense of vulnerability and the availability of viable solutions at the national level. Awareness of this gap may ultimately lead to more internationally oriented cooperation, but the trend for now appears to be more conflictual and rooted in a growing sense of insecurity. This book will be of much interest to students of cyber security, homeland security, disaster management, and international relations, as well as practitioners and policy-makers.

Projects in the Computing Curriculum William Michael Lloyd Holcombe,1998-07-31 The role of projects in the computing curriculum is of great importance in enabling students to explore different issues when putting theory into practice. The Project 98 workshop, from which this book has evolved, was held in April 1998 at the University of Sheffield. Projects in the Computing Curriculum looks at current experiences and ideas about the many and varied types of University projects. The papers in this volume cover a broad cross-section of project styles, presented not just by staff, but by a few studen ts as well. This book provides some ideas and experiences that can be used by others in developing their use of projects in the computing curriculum. Issues addressed in the papers in this book include:- management of project work; assessment of project work; industrial projects; large group projects; individual projects.

Belonging, Identity, and Conflict in the Central African Republic Gino Vlavonou,2023 Political conflict in many parts of the world has been shaped by notions of who rightfully belongs to a place. The concept of autochthony--that a true, original people are born of a land and belong to it above all others--has animated struggles across postcolonial Africa. But is this sense of rootedness from time immemorial necessary to assertions of original being and thus political supremacy? Belonging, Identity, and Conflict in the Central African Republic examines how political conflict unfolds when the language of autochthony is detached from historical land claims. Focusing on violent struggles in the Central African Republic between 2012 and 2019, Gino Vlavonou explores the social practices, discursive strategies, and government policies that emerged in the relentless project of African state building. Conflict pitted Christian-animist communities, loosely organized as vigilante groups under the name anti-Balaka, against Muslim rebels known as the Séléka. Fighters of the anti-Balaka claimed that they were autochthonous, the true Central Africans, reframing their Muslim neighbors as foreigners to be expelled. While the country had previously witnessed episodes of violence, both peoples had lived together relatively peacefully and intermarried. The speed and ferocity with which identity was weaponized puzzled many observers. To understand this phenomenon, Vlavonou probes autochthony as a category of identity that differs from ethnicity in important ways. He argues that elites and ordinary citizens alike mobilize the language of original belonging as identity capital, a resource to be deployed. The value of that capital is lodged in what people say and do every day to give meaning to their identity, and its content changes across time and space.

2016 Li Yuming,Li Wei,2022-11-07 China, with the world's largest population, numerous ethnic groups and vast geographical space, is also rich in languages. Since 2006, China's State Language Commission has been publishing annual reports on what is called language life in China. These reports cover language policy and planning invitatives at the national, provincial and local levels, new trends in language use in a variety of social domains, and major events concerning languages in mainland China, Hong Kong, Macau and Taiwan. Now for the first time, these reports are available in English for anyone interested in Chinese languge and linguistics, China's language, education and social policies, as well as everyday language use among the ordinary people in China. The invaluable data contained in these reports provide an essential reference to researchers, professionals, policy makers, and China watchers.

Teaching to the Standards of Effective Practice Robert Wandberg,John Rohwer,2003 Using a workbook format, Teaching to the Standards of Effective Practice: A Workbook to Prepare and Guide a Successful Teaching Experience is a book designed to assist and guide a successful student teacher experience. This book uses an action and reflection approach. Using the Interstate New Teacher Assessment and Support Consortium (INTASC) standards as a base, more than 90 chapter activities support the knowledge and skill required for successful and effective teaching. In addition to these activities, self-assessments, a research-based foundation, expert commentaries, vignettes, student-to-student tips, and case studies guide the student teacher to a successful experience. Designed for student teachers and for those in the beginning years of their teaching career.

Global Chinese Cinema Gary D. Rawnsley,Ming-Yeh T. Rawnsley,2011-09 The film Hero, directed by Zhang Yimou and released in 2002, is widely regarded as the first globally successful indigenous Chinese blockbuster. A big expensive film with multiple stars, spectacular scenery, and astonishing action sequences, it touched on key questions of Chinese culture, nation and politics, and was both a domestic sensation and an international hit. This book explores the reasons for the film's popularity with its audiences, discussing the factors which so resonated with those who watched the film. It examines questions such as Chinese national unity, the search for cultural identity and role models from China's illustrious pre-communist past, and the portrayal of political and aesthetic values, and attitudes to gender, sex, love, and violence which are relatively new to China. The book demonstrates how the film, and China's growing film industry more generally, have in fact very strong international connections, with Western as well as Chinese financing, stars recruited from the East Asian region more widely, and extensive interactions between Hollywood and Asian artists and technicians. Overall, the book provides fascinating insights into recent developments in

Chinese society, popular culture and cultural production.

Copyright and the Public Interest in China G. H. Tang,2011-11 'This brilliant amalgam of law, history, social analysis and some Confucian philosophy argues for a distinctive Chinese approach to copyright and the public interest, aligning not only the Western commitment to individual creativity but also supporting public access to and use of works without the consent of the copyright holder. The argument involves fascinating analysis, not only of evolving Chinese attitudes to education, libraries, archives and censorship, but also of the profound significance of the Internet in China today.' Hector MacQueen, University of Edinburgh, UK 'Guan Hong Tang's book offers a fresh, insightful and scholarly treatment of the relationship between the law of copyright and the public interest in China. Copyright legislation in China is a novelty, dating from 1990, and Dr Tang provides a vivid overview of the historical and cultural tensions between traditional Chinese Confucianism and the very concept of copyright, tensions which more recent legislation and case law seek to address.' Gillian Davies, Hogarth Chambers, UK Guan Hong Tang expertly highlights how the multidimensional concept of public interest has influenced the development and limitations of Chinese copyright. Since 1990 China has awarded copyright individual rights but also provides for public, non-criminal enforcement. The author reveals that pressures of development, globalisation and participation in a world economy have hastened the loss of public interest from copyright. However, for a socialist country, placing the common ahead of the individual interest, the public interest also constitutes a phenomenological tool with which to limit copyright. The author also discusses how the rise of the Internet, which has had a major social and economic impact on China, raises problems for Chinese copyright law. Comparing Chinese copyright law with the USA and the UK, topical issues are presented in this unique book including those arising within education, library and archives sectors. This insightful book will strongly appeal to students and researchers in IP law, comparative law, Chinese studies, international commerce and information science. It will also prove invaluable for lawyers and consultants with expertise in IP and China.

Structure and Evolution Binxing Fang,Yan Jia,2019-08-05 The three volume set provides a systematic overview of theories and technique on social network analysis. Volume 1 of the set mainly focuses on the structure characteristics, the modeling, and the evolution mechanism of social network analysis. Techniques and approaches for virtual community detection are discussed in detail as well. It is an essential reference for scientist and professionals in computer science.

Networked Public Wei He,2016-10-18 This book coins the term “Networked Public” to describe the active social actors in new media ecology. The author argues that, in today’s network society, Networked Public Communication is different than, yet has similarities with, mass communication and interpersonal communication. As such it is the emergent paradigm for research. The book reviews the historical, technological and social context for the rising of Networked Public, analyzes its constituents and characteristics, and discusses the categories and features of social media in China. By analyzing abundant cases from recent years, the book provides answers to the key questions at micro, meso and macro-levels, including how information flows under regulation in the process of Networked Public Communication; what its features and models are; what collective action strategies and“resistance culture”have been developed as a result of Internet regulate; the nature of power games among Networked Public, mass media, political forces and capital, and the links with the development of Chinese civil society.

Urban Risk Management in China Jianping Sun,2024-01-23 This book is the culmination of the author’s research on Urban Risk Management, based on research on practical applications on risk prevention and control practice in the industry. The main goal of this book is to make clear the concept of urban risk, analyse the objects to urban risk management, form a cognitive framework, arrange the practice on Chinese urban risk management, and finally to form a workable urban risk management system. Systematically discusses urban risk prevention and control in terms of its main forces, mechanisms, systems, and capabilities and presents a multidimensional pyramidal management framework between society, market, and government Improves the typology of academic courses related to urban risk management and clarifies different branches of theoretical concepts and practical applications Provides a solid foundation for an understanding of how urban risks evolve from accidents or incidents and identifies characteristics and patterns in risk sources Proposes three mechanisms: co-governance, refined prevention and control, and multilayered guarantees as part of the full-lifecycle perspective in risk prevention, control, and management

Proceedings of the 2022 International Conference on Economics, Smart Finance and Contemporary Trade (ESFCT 2022) Faruk Balli,Au Yong Hui Nee,Sikandar Ali Qalati,2022-12-28 This is an open access book. As a leading role in the global megatrend of scientific innovation, China has been creating a more and more open environment for scientific innovation, increasing the depth and breadth of academic cooperation, and building a community of innovation that benefits all. Such endeavors are making new contributions to the globalization and creating a community of shared future. To adapt to this changing world and China's fast development in the new era, The 2022 International Conference on Economics, Smart Finance and Contemporary Trade to be held in July 2022. This conference takes bringing together global wisdom in scientific innovation to promote high-quality development as the theme and focuses on cutting-edge research fields including Economics, Smart Finance and Contemporary Trade. This conference aims to boost development of the Greater Bay Area, expand channels of international academic exchange in science and technology, build a sharing platform of academic resources, promote scientific innovation on the global scale, strengthen academic cooperation between China and the outside world, enhance development of new energy and materials and IT, AI, and biomedicine industries. It also aims to encourage exchange of information on frontiers of research in different areas, connect the most advanced academic resources in China and the world, turn research results into industrial solutions, and bring together talents, technologies and capital to boost development.

China and Cybersecurity Jon R. Lindsay,Tai Ming Cheung,Derek S. Reveron,2015-03-02 China's emergence as a great power in the twenty-first century is strongly enabled by cyberspace. Leveraged information technology integrates Chinese firms into the global economy, modernizes infrastructure, and increases internet penetration which helps boost export-led growth. China's pursuit of informatization reconstructs industrial sectors and solidifies the transformation of the Chinese People's Liberation Army into a formidable regional power. Even as the government censors content online, China has one of the fastest growing internet populations and most of the technology is created and used by civilians. Western political discourse on cybersecurity is dominated by news of Chinese military development of cyberwarfare capabilities and cyber exploitation against foreign governments, corporations, and non-governmental organizations. Western accounts, however, tell only one side of the story. Chinese leaders are also concerned with cyber insecurity, and Chinese authors frequently note that China is also a victim of foreign cyber -- attacks -- predominantly from the United States. China and Cybersecurity: Espionage, Strategy, and Politics in the Digital Domain is a comprehensive analysis of China's cyberspace threats and policies. The contributors -- Chinese specialists in cyber dynamics, experts on China, and experts on the use of information technology between China and the West -- address cyberspace threats and policies, emphasizing the vantage points of China and the U.S. on cyber exploitation and the possibilities for more positive coordination with the West. The volume's multi-disciplinary, cross-cultural approach does not pretend to offer wholesale resolutions. Contributors take different stances on how problems may be analyzed and reduced, and aim to inform the international audience of how China's political, economic, and security systems shape cyber activities. The compilation provides empirical and evaluative depth on the deepening dependence on shared global information infrastructure and the growing willingness to exploit it for political or economic gain.

Église, politique et démocratie Solomon Andria,2022-09-05 Quel est le rôle du chrétien et de l’Église dans la société africaine francophone ? Comment contribuer à la stabilité sociale pour le bien-être de tout citoyen et au développement du citoyen, corps et âme ? Les auteurs de cet ouvrage cherchent à encourager les chrétiens

africains à réfléchir à ces questions importantes au regard des instabilités politiques qui traversent l'Afrique. Ils donnent des précisions sur certains concepts et termes clés comme démocratie, politique, théologie. Ils font également référence à l'histoire pour faire comprendre la situation politique actuelle en Afrique. C'est en connaissant et en comprenant mieux la situation politique de son pays que chaque croyant et citoyen pourra s'engager à bâtir la société dans la vérité et la justice, dans la sainteté et la consécration.

Collaborative Networks and Their Breeding Environments Luis M. Camarinha-Matos,Hamideh Afsarmanesh,Angel Ortiz,2006-03-09 Progress in collaborative networks continues showing a growing number of manifestations and has led to the acceptance of Collaborative Networks (CN) as a new scientific discipline. Contributions to CN coming from multiple reference disciplines has been extensively investigated. In fact developments in CN have benefited from contributions of multiple areas, namely computer science, computer engineering, communications and networking, management, economy, social sciences, law and ethics, etc. Furthermore, some theories and paradigms defined elsewhere have been suggested by several research groups as promising tools to help define and characterize emerging collaborative organizational forms. Although still at the beginning of a long way to go, there is a growing awareness in the research and academic world, for the need to establish a stronger theoretical foundation for this new discipline and a number of recent works are contributing to this goal. From a utilitarian perspective, agility has been pointed out as one of the most appealing characteristics of collaborative networks to face the challenges of a fast changing socio-economic context. However, during the last years it became more

evident that finding the right partners and establishing the necessary preconditions for starting an effective collaboration process are both costly and time consuming activities, and therefore an inhibitor of the aimed agility. Among others, obstacles include lack of information (e.g. non-availability of catalogs with normalized profiles of organizations) and lack of preparedness of organizations to join the collaborative process. Overcoming the mismatches resulting from the heterogeneity of potential partners (e.g. differences in infrastructures, corporate culture, methods of work, and business practices) requires considerable investment. Building trust, a pre-requisite for any effective collaboration, is not straight forward and requires time. Therefore the effective creation of truly dynamic collaborative networks requires a proper context in which potential members are prepared to rapidly get engaged in collaborative processes. The concept of breeding environment has thus emerged as an important facilitator for wider dissemination of collaborative networks and their practical materialization. The PRO-VE'05 held in Valencia, Spain, continues the 6th event in a series of successful working conferences on virtual enterprises. This book includes selected papers from that conference and should become a valuable tool to all of those interested in the advances and challenges of collaborative networks.

Artificial Intelligence and Security Xingming Sun,Jinwei Wang,Elisa Bertino,2020-09-12 The 3-volume set CCIS 1252 until CCIS 1254 constitutes the refereed proceedings of the 6th International Conference on Artificial Intelligence and Security, ICAIS 2020, which was held in Hohhot, China, in July 2020. The conference was formerly called “International Conference on Cloud Computing and Security” with the acronym ICCCS. The total of 178 full papers and 8 short papers presented in this 3-volume proceedings was carefully reviewed and selected from 1064 submissions. The papers were organized in topical sections as follows: Part I: artificial intelligence; Part II: artificial intelligence; Internet of things; information security; Part III: information security; big data and cloud computing; information processing.

AI Development and the ‘Fuzzy Logic' of Chinese Cyber Security and Data Laws Max Parasol,2021-12-16 The book examines the extent to which Chinese cyber and network security laws and policies act as a constraint on the emergence of Chinese entrepreneurialism and innovation. Specifically, how the contradictions and tensions between data localisation laws (as part of Network Sovereignty policies) affect innovation in artificial intelligence (AI). The book surveys the globalised R&D networks, and how the increasing use of open-source platforms by leading Chinese AI firms during 2017–2020, exacerbated the apparent contradiction between Network Sovereignty and Chinese innovation. The drafting of the Cyber Security Law did not anticipate the changing nature of globalised AI innovation. It is argued that the deliberate deployment of what the book refers to as 'fuzzy logic' in drafting the Cyber Security Law allowed regulators to subsequently interpret key terms regarding data in that Law in a fluid and flexible fashion to benefit Chinese innovation.

Artificial Intelligence: From Beginning To Date Zixing Cai,Lijue Liu,Baifan Chen,Yong Wang,2021-05-25 This English edition monograph is developed and updated from China's best-selling, and award-winning, book on Artificial Intelligence (AI). It covers the foundations as well as the latest developments of AI in a comprehensive and systematic manner. It is a valuable guide for students and researchers on artificial intelligence.A wide range of topics in AI are covered in this book with four distinct features. First of all, the book comprises a comprehensive system, covering the core technology of AI, including the basic theories and techniques of 'traditional' artificial intelligence, and the basic principles and methods of computational intelligence. Secondly, the book focuses on innovation, covering advanced learning methods for machine learning and deep learning techniques and other artificial intelligence that have been widely used in recent years. Thirdly, the theory and practice of the book are highly integrated. There are theories, techniques and methods, as well as many application examples, which will help readers to understand the artificial intelligence theory and its application development. Fourthly, the content structure of the book is quite characteristic, consisting of three parts: (i) knowledge-based artificial intelligence, (ii) data-based artificial intelligence, and (iii) artificial intelligence applications.It is closely related to the core elements of artificial intelligence, namely knowledge, data, algorithms, and computing powers. This reflects the authors' deep understanding of the artificial intelligence discipline.

Chinese Media, Global Contexts Lee Chin-Chuan,2003-09-02 This book provides the most expert, up-to-date, and multidisciplinary analyses on how the contemporary media function in that is rapidly becoming the world's largest market. As the West, particularly the United States, tries to integrate China into the 'civilized world' through the extension of global capitalism, Chinese Media, Global Contexts examines how globalizing forces clash with Chinese nationalism to shape China's media discourses and ideology. Conversely, this book also asks if the media provide a site and forum for contestation between different social classes and ideologies in China.--Back cover.
