Civil Servants on the Silver Screen Michelle C. Pautz,2017-12-29 This book demonstrates how government bureaucracy is portrayed in the top ten box office grossing films from 2000–2015. Panel to the Screen Drew Morton,2016-11-28 Over the past forty years, American film has entered into a formal interaction with the comic book. Such comic book adaptations as Sin City, 300, and Scott Pilgrim vs. the World have adopted components of their source materials' visual style. The screen has been fractured into panels, the photographic has given way to the graphic, and the steady rhythm of cinematic time has evolved into a far more malleable element. In other words, films have begun to look like comics. Yet, this interplay also occurs in the other direction. In order to retain cultural relevancy, comic books have begun to look like films. Frank Miller's original Sin City comics are indebted to film noir while Stephen King's The Dark Tower series could be a Sergio Leone spaghetti western translated onto paper. Film and comic books continuously lean on one another to reimagine their formal attributes and stylistic possibilities. In Panel to the Screen, Drew Morton examines this dialogue in its intersecting and rapidly changing cultural, technological, and industrial contexts. Early on, many questioned the prospect of a low art form suited for children translating into high art material capable of drawing colossal box office takes. Now the naysayers are as quiet as the queued crowds at Comic-Cons are massive. Morton provides a nuanced account of this phenomenon by using formal analysis of the texts in a real-world context of studio budgets, grosses, and audience reception.

Writing Online George Pullman,2016-02-11 Contrary to the old adage about finding new names for old things, Writing Online: Rhetoric for the Digital Age gives new life and new meaning to old

names. The book and its companion website transform ancient rhetoric as a process of oral composition—invention, arrangement, memory, style, and delivery—into a digital rhetoric, a dynamic process of writing for the World Wide Web: dynamic because it shows not only how to write in a Web-based medium but, more importantly, how to learn and adapt to a medium that is constantly evolving and changing. Unlike conventional books that provide specific solutions to specific problems, Writing Online reenacts the process of solving Web-based writing problems, explaining everything from how to create a simple web page to how to develop a sophisticated content management system and everything in between: HTML, HTML5, CSS, JavaScript, PHP, and much more. As a digital rhetoric, moreover, Writing Online recreates the ancient processes of oral composition for a digital era. Digital invention becomes a push-pull process of transmitting information via searches, alerts, news aggregators, and read-write algorithms. Digital arrangement becomes a question-and-answer process inviting multiple responses via intuitive navigation systems and dynamic patterns of organization. Digital memory transforms the ancient memory palace into a dynamic, programmable content management system. Digital style provides computer-based tools to enhance writers' word choice, argumentative structures, and feedback. Digital delivery resituates speakers and writers in onscreen environments that balance functionality and aesthetics for optimum responsiveness and usability. —James P. Zappen, Professor, Department of Communication and Media, Rensselaer Polytechnic Institute

Screen Shots Rebecca L. Stein,2021-06-01 In the last two decades, amid the global spread of smartphones, state killings of civilians have increasingly been captured on the cameras of both bystanders and police. Screen Shots studies this phenomenon from the vantage point of the Israeli occupation of Palestinian territories. Here, cameras have proliferated as political tools in the hands of a broad range of actors and institutions, including Palestinian activists, Israeli soldiers, Jewish settlers, and human

rights workers. All trained their lens on Israeli state violence, propelled by a shared dream: that advances in digital photography—closer, sharper, faster—would advance their respective political agendas. Most would be let down. Drawing on ethnographic work, Rebecca L. Stein chronicles Palestinian video-activists seeking justice, Israeli soldiers laboring to perfect the military's image, and Zionist conspiracy theorists accusing Palestinians of playing dead. Writing against techno-optimism, Stein investigates what camera dreams and disillusionment across these political divides reveal about the Israeli and Palestinian colonial present, and the shifting terms of power and struggle in the smartphone age.

The Scene of Violence Alison Young,2009-12-04 In the contemporary fascination with images of crime, violence gets under our skin and keeps us enthralled. The Scene of Violence explores the spectator's encounter with the cinematic scene of violence – rape and revenge, homicide and serial killing, torture and terrorism. Providing a detailed reading of both classical and contemporary films – for example, Kill Bill, Blue Velvet, Reservoir Dogs, The Matrix, Psycho, The Accused, Elephant, Seven, Thelma & Louise, United 93, Zodiac, and No Country for Old Men – Alison Young returns the affective processes of the cinematic image to the study of law, crime and violence. Engaging with legal theory, cultural criminology and film studies, the book unfolds both our attachment to the authority of law and our identification with the illicit. Its original contribution is to bring together the cultural fascination of crime with a nuanced account of what it means to watch cinema. The Scene of Violence shows how the spectator is bound by the laws of film to the judgment of the crime-image.

Dark Matters Simone Browne,2015-09-17 In Dark Matters Simone Browne locates the conditions of blackness as a key site through which surveillance is practiced, narrated, and resisted. She shows how contemporary surveillance technologies and practices are informed by the long history of racial formation and by the methods of policing black life under slavery, such as branding, runaway slave notices, and lantern laws. Placing surveillance studies into conversation with the archive of transatlantic slavery and its afterlife, Browne draws from black feminist theory, sociology, and cultural studies to analyze texts as diverse as the methods of surveilling blackness she discusses: from the design of the eighteenth-century slave ship Brooks, Jeremy Bentham's Panopticon, and The Book of Negroes, to contemporary art, literature, biometrics, and post-9/11 airport security practices. Surveillance, Browne asserts, is both a discursive and material practice that reifies boundaries, borders, and bodies around racial lines, so much so that the surveillance of blackness has long been, and continues to be, a social and political norm.
