Middleware 2010 Indranil Gupta,Cecilia Mascolo,2010-11-26 We are pleased to welcome you to the eleventh edition of the Middleware conference. The program this year is a sign of the robustness, activity, and continued growth of the Middleware community. As computing technology around us has evolved rapidly over the past decade, our notions of middleware have also adapted so that we stay focused on the most challenging and relevant problems for the present and future. As a result, this year's program features papers that belong to both traditional areas as well as new directions. Cloud computing, social middleware, and transactional memory are some of the vanguard areas that you will find in this year's selection of papers. In addition, topics that have always been central to the community are also prominent this year, including publish-subscribe, multicast, reliability, legacy, location-awareness, trust, and security. The community's wise evolution reflects the dynamic role that middleware continues to play in the development of current software systems. The program underscores the competitive selection process applied by us and the technical program committee: out of 116 papers submitted this year, we accepted 18 for regular publication. In addition Middleware 2010 also includes a new category of "Big Ideas Papers," which are bold white papers with the potential to drive longer-term innovation in the field. We selected one "big ideas" paper this year. Our industrial track once again brings forth papers that explore middleware foundations in the context of industrial practice. Finally, multiple workshops and a doctoral symposium round off Middleware this year, making it an attractive conference for students, faculty, researchers, and practitioners.

European Glacial Landscapes David Palacios, Philip D. Hughes, Vincent Jomelli, Luis M. Tanarro, 2023-10-21 European Glacial Landscapes: The Holocene presents the current state of knowledge on glacial landscapes of Europe and nearby areas over the Holocene to deduce the influence of atmospheric and oceanic currents and the insolation forcing variability and volcanic activity on Holocene paleoclimates, the existence of asynchronies in the timing of occurrence of glacier expansion and shrinkage during the Holocene, time lags between the identification of oceanic and atmospheric changes and those occurring in glacial extension during the Holocene, the role of Holocene glaciers on the climate of Europe, and on sea level variability, and the delimitation of landscapes that need special protection. Students, academics and researchers in Geography, Geology, Environmental Sciences, Physics and Earth Science departments will find this book provides novel findings of all the major European Regions in a single publication, with updated information about Holocene glacial geomorphology and paleo-climatology and clear figures that model the landscapes covered. Provides a synthesis and summary of glacial processes in Europe over the Holocene period Features research from experts in palaeo-climatology, palaeo-oceanography and palaeo-glaciology Includes access to a companion website with an interactive map, photos of glacial features, and geospatial data related to European Glacial Landscapes

Middle Egyptian James P. Allen, 2000 This book provides a thorough introduction to the writing system of ancient Egypt and the language of hieroglyphic texts. It is designed as a textbook for university and college classes, and is also suitable for individuals learning ancient Egyptian on their own. It contains 26 lessons, exercises (with answers), a list of hieroglyphic signs, and a dictionary. It also includes a series of 25 essays on the most important aspects of ancient Egyptian history, society, religion and literature. The combination of grammar lessons and cultural essays allows users not only to read hieroglyphic texts but also to understand them. The book gives readers the foundation they need to understand the texts on monuments and to read the great works of ancient Egyptian literature in the original. It can also serve as a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other related fields.

Why Not? Barry Nalebuff, Ian Ayres, 2006 A primer for fresh thinking, for problem-solving with a purpose, for bringing the world a few steps closer to the way it should be. Illustrated with examples from every aspect of life, this book offers techniques which help you take the things we all see, every day, and think about them in a new way.

The Legal Protection of Foreign Investment Wenhua Shan, 2012-06-14 The law of foreign investment is at a crossroads. In the wake of an unprecedented global financial crisis and a sharp surge of investment arbitration cases, states around the world are reflecting on the pros and cons of the current liberal investment regime and exploring new ways ahead. This book brings together leading investment lawyers from more than 20 main jurisdictions of the world to tackle the challenge of producing a first comparative study of foreign investment law. Based on the General and National Reports presented at the 'Protection of Foreign Investment' Session at the 18th International Congress of the International Academy of Comparative Law (Washington DC, July 2010), the book is a unique resource for investment lawyers. Part I of the book presents a comparative overview of key aspects of foreign investment protection in the world today, including admission, investment contracts, treatment standards, tax regime and incentives, performance requirement, property and expropriation, monetary transfer and dispute settlement. Part II presents in-depth and detailed accounts of the investment laws of more than 20 jurisdictions, including Argentina, Australia, Canada, China, Croatia, Czech Republic, Ethiopia, France, Germany, Greece, Italy, Japan, South Korea, Macau, Peru, Portugal, Russia, Singapore, Slovenia, Turkey, the UK and the USA. The book will be an invaluable guide to legal and business communities with an interest in the law and practice of foreign investment in the world in general and in these jurisdictions in particular.

Collaborative Computing: Networking, Applications and Worksharing Elisa Bertino, James Joshi, 2009-07-25 CollaborateCom is an annual international forum for dissemination of original ideas and research results in collaborative computing networks, systems, and applications. A major goal and feature of CollaborateCom is to bring researchers from networking, systems, CSCW, collaborative learning, and collaborative education areas together. CollaborateCom 2008 held in Orlando, Florida, was the fourth conference of the series and it reflects the accelerated growth of collaborative computing, both as research and application areas. Concretely, recent advances in many computing fields have contributed to the growing interconnection of our world, including multi-core architectures, 3G/4G wireless networks, Web 2.0 technologies, computing clouds, and software as a service, just to mention a few. The potential for collaboration among various components has exceeded the current capabilities of traditional approaches to system integration and interoperability. As the world heads towards unlimited connectivity and global computing, collaboration becomes one of the fundamental challenges for areas as diverse as eCommerce, eGovernment, eScience, and the storage, management, and access of information through all the space and time dimensions. We view collaborative computing as the glue that brings the components together and also the lubricant that makes them work together. The conference and its community of researchers demonstrate the concrete progress we are making towards this vision. The conference would not have been successful without help from so many people.

Poisoned Profits Philip Shabecoff, Alice Shabecoff, 2008-08-12 In this shocking and sobering book, two fearless journalists directly and definitively link industrial toxins to the current rise in childhood disease and death.

In the tradition of Silent Spring, Poisoned Profits is a landmark investigation, an eye-opening account of a country that prizes money over children’s health. With indisputable data, Philip Shabecoff and Alice Shabecoff reveal that the children of baby boomers—the first to be raised in a truly “toxified” world—have higher rates of birth defects, asthma, cancer, autism, and other serious illnesses than previous generations. In piercing case histories, the authors identify the culprit as corporate pollution. Here are the stories of such places as Dickson, Tennessee, where babies were born with cleft lips and palates after landfill chemicals seeped into the water, and Port Neches, Texas, where so many graduates of a high school near synthetic rubber and chemical plants contracted cancer that the school was nicknamed “Leukemia High.” The danger to our children isn’t just in the outside world, though. The Shabecoffs provide evidence that our homes are now infested with everything from dangerous flame retardants in crib mattresses to harmful plastic softeners in teething rings to antibiotics and arsenic in chicken-additives that are absorbed by growing and physically vulnerable kids as well as by pregnant women. Compounding the problem are chemical corporations that sabotage investigations and regulations, a government that refuses to police these companies, and corporate-hired scientists who keep pertinent secrets massaged with skewed data of their own. Poisoned Profits also demonstrates how people are fighting back, whether through grassroots parents’ groups putting pressure on politicians, the rise of “ecotheology” in the pulpits of formerly indifferent churches, or the new “green chemistry” being practiced in labs to replace bad elements with good. The Shabecoffs also include helpful tips on reducing risks to children in how they eat and play, and in how parents clean and maintain their homes. Powerful, unflinching, and eminently readable, Poisoned Profits is a wake-up call that is bound to inspire talk and force change.

Prescription for the People Fran Quigley,2017-11-15 In *Prescription for the People*, Fran Quigley diagnoses our inability to get medicines to the people who need them and then prescribes the cure. He delivers a clear and convincing argument for a complete shift in the global and U.S. approach to developing and providing essential medicines—and a primer on how to make that change happen. Globally, 10 million people die each year because they are unable to pay for medicines that would save them. The cost of prescription drugs is bankrupting families and putting a strain on state and federal budgets. Patients’ desperate need for affordable medicines clashes with the core business model of the powerful pharmaceutical industry, which maximizes profits whenever possible. It doesn’t have to be this way. Patients and activists are aiming to make all essential medicines affordable by reclaiming medicines as a public good and a human right, instead of a profit-making commodity. In this book, Quigley demystifies statistics and terminology, offers solutions to the problems that block universal access to medicines, and provides a road map for activists wanting to make those solutions a reality.

What Every American Should Know About Who's Really Running America Melissa Rossi,2007-05-29 A guide to the politicians, money men, lobbyists, and deal makers who really run America What foreign country has the power to send America crashing into a recession? Why is the USA still dangerously dependent on oil, when viable energy alternatives have existed for decades? Who made the call that we should return to nuclear energy—and then took a high-paying position with a nuclear company? Which youth group was a spawning ground for many contemporary power mongers? What lobbyists and special-interest groups are running the show on Capitol Hill—and exactly what tools of persuasion are they using? Melissa Rossi answers these questions and more in this timely and topical guide to who’s pulling the strings behind the scenes of American politics. This latest edition of Rossi’s popular *What Every American Should Know*. . . series puts the spotlight on our own backyard, covering topics like: • Which groups ensure that Americans pay more for drugs than any other nation • How our immigration laws are damaging the U.S. economy • Who’s telling the school boards what your child will learn • Who really benefits from U.S. foreign policy • How corporations and government agencies are spying on us • Why we should avoid electronic voting • Who killed the electric car and who exposed it Organized by topic for easy reference, *What Every American Should Know About Who’s Really Running America* shows Americans what is going on behind the scenes and how they can counterbalance the influence of a small, powerful elite to put the power back where it should be—in the hands of the people.

Republican Gomorrah Max Blumenthal,2009-09-01 Over the last year, award-winning journalist and videographer Max Blumenthal has been behind some of the most sensational (and funniest) exposes of Republican machinations. Whether it was his revelation that Sarah Palin was anointed by a Kenyan priest famous for casting out witches, or his confronting Republican congressional leaders and John McCain's family at the GOP convention about the party's opposition to sex education (and hence, the rise in teen pregnancies like that of Palin's daughter), or his expose of the eccentric multimillionaire theocrat behind California's Prop 8 anti- gay marriage initiative, Blumenthal has become one of the most important and most constantly cited journalists on how fringe movements are becoming the Republican Party mainstream. *Republican Gomorrah* is a bestiary of dysfunction, scandal and sordidness from the dark heart of the forces that now have a leash on the party. It shows how those forces are the ones that establishment Republicans-like John McCain-have to bow to if they have any hope of running for President. It shows that Sarah Palin was the logical choice of a party in the control of theocrats. But more than just an expose, *Republican Gomorrah* shows that many of the movement's leading figures have more in common than just the power they command within conservative ranks. Their personal lives have been stained by crisis and scandal: depression, mental illness, extra-marital affairs, struggles with homosexual urges, heavy medication, addiction to pornography, serial domestic abuse, and even murder. Inspired by the work of psychologists Erich Fromm, who asserted that the fear of freedom propels anxiety-ridden people into authoritarian settings, Blumenthal explains in a compelling narrative how a culture of personal crisis has defined the radical right, transforming the nature of the Republican Party for the next generation and setting the stage for the future of American politics.
