Icon Design Steve Caplin, 2001 Though design for computer applications is a relatively new phenomenon, the boom in the home computer marketplace means that this is now the fastest-growing area of design. While providing boundless creative opportunities for the graphic designer, the challenge of designing interface icons - the symbols that represent applications, documents, functionality, and any other facet of the software that gives it a graphic identity - has often been underestimated. icon design offers practical, comprehensible, jargon-free advice for designing cutting-edge icons, and includes an inspirational showcase of contemporary icon designs.

Cyber Worship in Multifaith Perspectives Mohamed Taher, 2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Crash Course in Library Services to People with Disabilities Ann Roberts,Richard J. Smith,2010-03-23 This book helps libraries identify and implement new ways to serve their physically or mentally disabled patients. Authors Ann Roberts and Dr. Richard Smith work at the state level with persons with disabilities. They find that very few librarians feel comfortable with providing services addressed to the needs of the disabled, yet those who do offer services and programs other libraries can adopt and adapt. Crash Course in Library Services to People with Disabilities will help librarians get up to speed in understanding disabled persons and what they can do to make library premises and holdings more accessible to them. It provides basic information on the different types of mental and physical disabilities a librarian might encounter, then offers a range of exemplary policies, services, and programs for people with disabilities—efforts that are in place and working across the country.
