New Source Review for Stationary Sources of Air Pollution National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on Changes in New Source Review Programs for Stationary Sources of Air Pollutants,2006-11-30 The Clean Air Act established a pair of programsâ€known as New Source Review (NSR)â€that regulate large stationary sources of air pollution, such as factories and electricity-generating facilities. Congress then asked the National Research Council to estimate the effects of NSR rule changes made in 2002 and 2003 in terms of the effects on

emissions and human health, and changes in operating efficiency (including energy efficiency), pollution prevention, and pollution-control activities. New Source Review for Stationary Sources of Air Pollution provides insights into the potential effects of the rule changes on national emissions from the electric power industry. Although this book focuses on the 2002 and 2003 rules, its analytic framework applies to other possible changes in NSR and to other regulatory contexts. Helpful, in that it outlines the data-collection efforts needed to assess the impact of the NSR rules, the book recommends EPA and other government agencies undertake and sustain the recommended methods.

Interim Report of the Committee on Changes in New Source Review Programs

for Stationary Sources of Air Pollutants National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee on Changes in New Source Review Programs for Stationary Sources of Air Pollutants, 2005-02-14 The U.S. Environmental Protection Agency's New Source Review (NSR) programs are designed to help ensure that the construction or modification of factories, electric-generating facilities and other large stationary sources of pollutants will meet emissions criteria. EPA revised the programs in order to provide flexibility and allow for improved energy efficiency in American industry without damaging the environment. However, critics argue the revisions could slow progress in cleaning the nation's air, potentially damaging human health. This interim report provides a synthesis of relevant background information and describes the approach the committee will use to assess the potential impact of the NSR revisions. Conclusions will be issued in a final report later this year.
