Cancer Resources on the Internet M Sandra Wood, Eric P De Lozier, 1997-09-11 Cancer Resources on the Internet shows cancer patients, their families, and oncology health care professionals how the Internet can be used to locate information about the diagnosis, treatment, and prognosis of different forms of cancer; to locate specialized treatment centers around the world; to facilitate support groups; and to provide a mechanism for individuals to share experiences and stories. This book includes a discussion of the quality of information on the Net (and how to assess it); evaluations of Web sites in terms of content, clarity, and user-friendliness; and advice on how to conduct a focused, subject-specific search. Arranged in an order that gives a general starting point and then leads to more specific needs, Cancer Resources on the Internet helps you by: providing an overview of cancer resources available on the WWW--how to overcome the sheer quantity of information and find the most relevant sites discussing the National Cancer Institute's

CancerNet, including ways to access the network and links to other resources detailing OncoLink, the first multimedia cancer information resource on the Internet offering state-of-the-art, quality information reviewing NCI's comprehensive cancer center's 26 web sites--from patients' and referring physicians' viewpoints showing how to find information on breast cancer on the Internet--Web-based resources on risk factors, early detection, treatment, psychological aspects, and breast cancer in men discussing different types of Internet resources (mailing lists, newsgroups, and real-time communication) and using cancer information to show how health care information can be transferred from physician to patient and back again illustrating a practical use of Internet Relay Chat (IRC)--how it offers accessibility to shut-in and convalescing patients and instant, real-time support guiding you through the process a newly diagnosed Hodgkin's Disease patient might use to find information and support on the Internet reviewing resources found on the Web about alternative and complementary therapies for cancer Information resources on the Internet about cancer, from Web sites to listservs and chat groups, are plentiful. In fact, cancer patients and oncology health care professionals were some of the earliest users of the Internet as a health information resource. Using cancer as the focus of this book provides a helpful overview of the various health care uses of the Net.

Uruguay International Monetary Fund. Western Hemisphere Dept.,2018-01-31 This Selected Issues paper investigates the impact of exchange rate movements on private consumption in Uruguay. Uruguay is a highly dollarized economy, which makes the relationship between exchange rate movements and private consumption particularly complex. The paper shows that a large share of Uruguayan households is liquidity constrained, which allows the transitory real income shocks brought about by exchange rate pass-through to have a significant impact on consumption. Moreover, exchange rate pass-through is highly heterogenous, with relative prices of durables increasing (decreasing) following a depreciation (appreciation). This creates incentives for households to engage in intertemporal substitution where they buy durables when they are relatively cheaper. Data from Input-Output tables show that Uruguay produces a nontrivial amount of the tradable, durable goods it consumes, opening the door to contractionary depreciations. The results offer a potential explanation for the often noted 'excess volatility of consumption' in emerging markets for the case of Uruguay.

The Online Teaching Survival Guide Judith V. Boettcher, Rita-Marie Conrad, 2010-05-13 The Online Teaching Survival Guide offers faculty a wide array of theory-based techniques designed for online teaching and technology-enhanced courses. Written by two pioneers in distance education, this guidebook presents practical instructional strategies spread out over a four-phase timeline that covers the lifespan of a course. The book includes information on a range of topics such as course management, social presence, community building, and assessment. Based on traditional pedagogical theory, The Online Teaching Survival Guide integrates the latest research in cognitive processing and learning outcomes. Faculty with little knowledge of educational theory and those well versed in pedagogy will find this resource essential for developing their online teaching skills. Praise for The Online Teaching Survival Guide At a time when resources for training faculty to teach online are scarce, Judith Boettcher and Rita-Marie Conrad have presented a must-read for all instructors new to online teaching. By tying best practices to the natural rhythms of a course as it unfolds, instructors will know what to do when and what to expect. The book is a life raft in what can be perceived as turbulent and uncharted waters. —Rena M. Palloff and Keith Pratt, program directors and faculty, Teaching in the Virtual Classroom Program, Fielding Graduate University Developed from years of experience supporting online faculty, Judith Boettcher and Rita-Marie Conrad's book provides practical tips and checklists that should especially help those new to online teaching hit the ground running. —Karen Swan, Stukel Distinguished Professor of Educational Leadership, University of Illinois Springfield This book blends a fine synthesis of research

findings with plenty of practical advice. This book should be especially valuable for faculty teaching their first or second course online. But any instructor, no matter how experienced, is likely to find valuable insights and techniques. —Stephen C. Ehrmann, director, Flashlight Program for the Study and Improvement of Educational Uses of Technology; vice president, The Teaching, Learning, and Technology Group

Companion to Primary Care Mental Health Gabriel Ivbijaro, 2022-03-01 Companion to Primary Care Mental Health is the result of a major collaboration of an international group of general practitioners, psychiatrists, policy-makers, mental health professionals and mental health advocates. This extraordinary guide provides the best available evidence for the management of patients with mental health conditions in primary care. It draws on the wisdom of a range of experts from primary and secondary care, who have translated information from the literature and

their own clinical experience to apply it across the globe to everyday family practice. With the emphasis on practical application it presents family doctors and their teams with the evidence-based knowledge necessary to support the development of fully integrated systems to promote good mental health using tables and figures to illustrate complex matters. This includes the need to harness the wider determinants of health and mental health and to tackle stigma through advocacy, spirituality and ethical practice. The role of public health and the management of the many interfaces associated with providing good mental health are also covered. It includes tools for assessment, including classification and risk assessment, and the general principles required to enable a biopsychosocial approach to care. The book also considers the individual mental health conditions that family doctors and their teams are likely to encounter. As comorbidity and the management of complexity are very common in primary care mental health, these are also explored in the final chapters of the book.

Cotton Precision Breeding Mehboob-ur- Rahman, Yusuf Zafar, Tianzhen Zhang, 2021-06-08 Cotton, the most important natural fiber crop, has been improved by conventional breeding—largely through planned hybridization of different cotton genotypes, since the discovery of Mendelian genetics. All these efforts resulted in the development of resilient high yielding cotton varieties. However, the progress through conventional breeding procedures is slow because of long lag periods for developing a variety, little control over the new genetic combinations, unwanted traits and lack of foolproof performance testing system. Genomic assays discovered over the last two decades have made it possible to understand the “language” of the genome by associating the genes with specific traits. Together with the more recently established gene-editing tools like CRISPR-Cas9, the cotton genome can be tailored much more precisely than ever before. In this regard, genetic information has been harnessed, through (i) sequencing of the progenitor and cultivated cotton species, (ii) ongoing mega pan-genome sequencing projects, (iii) genetic and physical mapping, and (iv) introgression of genes from alien sources, that resulted in the development of resilient cotton cultivars. These technologies have been deployed or are attempting to overcome the challenges of

water shortage, excessive heat in most cotton growing regions, infectious diseases and infestation of insect pests, as well as rising production cost, for sustainable cotton production beyond 2030. In this book, new knowledge generated by the cotton research community and its application for developing resilient cotton are comprehensively summarized. This book contributed by well-known cotton researchers is a timely collection of the challenges and successes of precision cotton breeding in a changing environment.

Rad-hard Semiconductor Memories Calligaro, Cristiano, Gatti, Umberto, 2019-01-30 Rad-hard Semiconductor Memories is intended for researchers and professionals interested in understanding how to design and make a preliminary evaluation of rad-hard semiconductor memories, making leverage on standard CMOS manufacturing processes available from different silicon foundries and using different technology nodes. In the first part of the book, a preliminary overview of the effects of radiation in space, with a specific focus on memories, will be conducted to enable the reader to understand why specific design solutions are adopted to mitigate hard and soft errors. The second part will be devoted to RHBD (Radiation Hardening by Design) techniques for semiconductor components with a specific focus on memories. The approach will follow a top-down scheme starting from RHBD at architectural level (how to build a rad-hard floor-plan), at circuit level (how to mitigate radiation effects by handling transistors in the proper way) and at layout level (how to shape a layout to mitigate radiation effects). After the description of the mitigation techniques, the book enters in the core of the topic covering SRAMs (synchronous, asynchronous, single port and dual port) and PROMs (based on AntiFuse OTP technologies), describing how to design a rad-hard flash memory and fostering RHBD toward emerging memories like ReRAM. The last part will be a leap into emerging memories at a very early stage, not yet ready

for industrial use in silicon but candidates to become an option for the next wave of rad-hard components. Technical topics discussed in the book include: Radiation effects on semiconductor components (TID, SEE) Radiation Hardening by Design (RHBD) Techniques Rad-hard SRAMs Rad-hard PROMs Rad-hard Flash NVMs Rad-hard ReRAMs Rad-hard emerging technologies
