Cyber Operations Mike O'Leary,2015-10-23 Cyber Operations walks you through all the processes to set up, defend, and attack computer networks. This book focuses on networks and real attacks, offers extensive coverage of offensive and defensive techniques, and is supported by a rich collection of exercises and resources. You'll learn how to configure your network from the ground up, starting by setting up your virtual test environment with basics like DNS and active directory, through common network services, and ending with complex web applications involving web servers and backend databases. Key defensive techniques are integrated throughout the exposition. You will develop situational awareness of your network and will build a complete defensive infrastructure—including log servers, network firewalls, web application firewalls, and intrusion detection systems. Of course, you cannot truly understand how to defend a network if you do not know how to attack it, so you will attack your test systems in a variety of ways beginning with elementary attacks against browsers and culminating with a case study of the compromise of a

defended e-commerce site. The author, who has coached his university's cyber defense team three times to the finals of the National Collegiate Cyber Defense Competition, provides a practical, hands-on approach to cyber security.

How To Be An In Home Care Provider For The Disabled & Elderly Marie Spaulding,2016-08-09 When you hear "in home care provider," what is your first thought? I am hoping to provide some answers for that question in this book. I hope that you find the information helpful, and that your loved one gets the best care that they deserve. Okay, you hire someone to come in to be an in home care provider to a dependent family member or loved one. What type of things are you expecting them to know how to do—this is really something that you need to think about. Do you expect them to be able to cook meals without having to teach them? Do you expect them to be able to use a toaster to make toast? Wonder why I ask this question, the answers are inside this book. Do these professionals know basic safety? Do they really know what to do in an emergency? Can the care providers read and write? Can they understand what you say when you speak? An in-home care provider is not a nurse. An in-home care provider is not a medical professional. An in-home care provider is someone who is hired to provide aide to someone, who is unable to provide for their own basic needs. An in-home care provider is a person who is hired to be essentially a helper to the person they are with. To help them do the things that they are no longer able to do by themselves. The in-home care provider is hired so that the client, who is elderly or disabled, can stay in their own home, rather than in a care facility.
