Languages in Great Britain Silvia Broglia,2002-06-17 Seminar paper from the year 2001 in the subject English Language and Literature Studies - Linguistics, grade: 1.0 (A), RWTH Aachen University (Political Science), language: English, abstract: At the beginning of the third millennium English has clearly established itself as the leading language of the world. It is spoken around the globe as either first or second language and this widespread use and distribution has quite led to the emergence of several distinct varieties so that the global situation today is comparable to the fragmentation of single countries, like Great Britain, into dialect areas. The Forest of the Lacandon Maya Suzanne Cook,2016-03-15 The Forest of the Lacandon Maya: An Ethnobotanical Guide, with active links to audio-video recordings, serves as a comprehensive guide to the botanical heritage of the northern Lacandones. Numbering fewer than 300 men, women, and children, this community is the most culturally conservative of the Mayan groups. Protected by their hostile environment, over many centuries they maintain autonomy from the outside forces of church and state, while they continue to draw on the forest for spiritual inspiration and sustenance. In The Forest of the Lacandon Maya: An Ethnobotanical Guide, linguist Suzanne Cook presents a bilingual Lacandon-English ethnobotanical guide to more than 450 plants in a tripartite organization: a botanical inventory in which main entries are headed by Lacandon names followed by common English and botanical names, and which includes plant descriptions

and uses; an ethnographic inventory, which expands the descriptions given in the botanical inventory, providing the socio-historical, dietary, mythological, and spiritual significance of most plants; and chapters that discuss the relevant cultural applications of the plants in more detail provide a description of the area's geography, and give an ethnographic overview of the Lacandones. Active links throughout the text to original audio-video recordings demonstrate the use and preparation of the most significant plants.
