Autonomous Systems: Developments and Trends Herwig Unger,Kyandoghere Kyamaky,Janusz Kacprzyk,2011-11-22 The Workshops on Autonomous Systems emanated from a gathering with the doctoral students of just three chairs at Fernuniversität in Hagen, which we organise twice per year for a number of years now. Their purpose is to discuss on-going research and to create a community spirit. Furthermore, they serve as a means of structuring the students' research processes. The workshop has grown and matured in several respects. The doctoral students presenting their work do not come from a single university anymore, but from three. Besides them and their supervisors, also other scientists became interested in the event and contribute to its programme. Following the model of Advanced Study Institutes, they are available on the premises for relaxed, informal discussions outside the formal sessions. Finally, with the co-sponsorship of Gesellschaft für Informatik, the German Computer Society, and this surprisingly comprehensive volume of contributions published by Springer-Verlag the workshop turned into a visible scientific event.

**Islam Unveiled** Robert Spencer,2003-11-25 In *Islam Unveiled*, Robert Spencer dares to face the hard questions about what the Islamic religion actually teaches--and the potentially ominous implications of those teachings for the future of both the Muslim world and the West. Going beyond the shallow distinction between a true peaceful Islam and the hijacked Islam of terrorist groups, Spencer probes the Koran and Islamic traditions (as well as the history and present-day situation of the Muslim world) as part of his inquiry into why the world's fastest growing faith tends to arouse fanaticism. *Islam Unveiled* evaluates the relationship between Islamic fundamentalism and mainstream Islam; the fixation with violence and jihad; the reasons for Muslims' disturbing treatment of women; and devastating effects of Muslim polygamy and Islamic divorce laws. Spencer explores other daunting questions--why the human rights record of Islamic countries is so unrelievedly grim and how the root causes of this record exist in basic Muslim beliefs; why science and high culture died out in the Muslim world--and why this is a root cause of modern Muslim resentment. He evaluates what Muslims learn from the life of Muhammad, the man that Islam hails as the supreme model of human behavior. Above all, this provocative work grapples with the question that most preoccupies us today: can Islam create successful secularized societies that will coexist peacefully with the West's multicultural mosaic?

Brehm,2015-06-10 This thorough one-stop resource draws on solid science and the latest research to play a dual educational role—providing background for students while answering general readers' questions about a wide range of nutrition-related topics. Nutrition is a popular but often misunderstood topic, one about which there is a great deal of interest as evidenced by the plethora of available advice. Because nutrition is a key factor in health, it is important that the public have a source of information they can trust. This is that source: a comprehensive overview that will help readers make sense of conflicting information they find in the media regarding what is healthy and what is not. Organized alphabetically, the two-volume work covers the most important topics in human nutrition including nutrients, nutrition-related health concerns, aging and nutrition, eating disorders, and the value of dietary supplements. The digestive system and its organs are discussed, with particular attention to health issues such as irritable bowel syndrome and the role of helpful bacteria. The physiology of hunger and the psychology of appetite and eating behaviors are explained. The work also delves into data on foods that have been featured in recent research, such as garlic, ginger, and turmeric, and it offers consumers a clearer understanding of nutrition-related practices such as organic farming, genetically modified foods, and the use of food additives.

Christopher Payne and Rob Barnett are two formerly obese economists who met while working at Bloomberg. They faced the same problems that so many others face today: long hours, frequently eating out for lunch and dinner, and snacking out of boredom. When they finally lost weight by applying what they know best—economics—to their waistlines. By carefully considering economic theories, real-world data, and their own personal experiences, they developed behavioral best practices that helped them control their impulses to overeat and approach food

in a healthier way. Full of Barnett and Payne’s personal weight-loss stories, The Economists' Diet is a practical guide that explains how to control those ever-present impulses to overeat and, in the process, lose weight and keep it off. It is “[a] uniquely themed and user-friendly guide” (Publisher’s Weekly), and “full of advice [that] makes a lot of sense and is habit-forming (Charles Duhigg, bestselling author of The Power of Habit).
