99 Jumpstarts for Kids' Science Research Peggy Whitley,Susan Williams Goodwin,2005-12-30

This third entry in the Jumpstarts series focuses on Science topics for upper elementary and middle school students. Maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids Science Research is divided into ten broad topical sections. Each topic is arranged in alphabetical order under its section. Topics include Body Parts, Energy, Animals, Heavens, Weather, Matter, Medicine, Technology, Environment, and Geology. This pathfinder approach aides students in the research process, helping them define important terms, offer beginning questions to help narrow their topic, furnish source ideas and some fun activities to explore each topic. Grades 4-8.

Agile Java Development with Spring, Hibernate and Eclipse Anil Hemrajani,2006-05-09 Agile

Java™ Development With Spring, Hibernate and Eclipse is a book about robust technologies and effective methods which help bring simplicity back into the world of enterprise Java development. The three key technologies covered in this book, the Spring Framework, Hibernate and Eclipse, help reduce the complexity of enterprise Java development significantly. Furthermore, these technologies enable plain old Java objects (POJOs) to be deployed in light-weight containers versus heavy-handed remote objects that require heavy EJB containers. This book also extensively covers technologies such as Ant, JUnit, JSP tag libraries and touches upon other areas such as logging, GUI based debugging, monitoring using JMX, job scheduling, emailing, and more. Also, Extreme Programming (XP), Agile Model Driven Development (AMDD) and refactoring are methods that can expedite the software development projects by reducing the amount of up front requirements and design; hence these methods are embedded throughout the book but with just enough details and examples to not sidetrack the focus of this book. In addition, this book contains well separated, subjective material (opinion sidebars), comic illustrations, tips and tricks, all of which provide real-world and practical perspectives on relevant topics. Last but not least, this book demonstrates the complete lifecycle by building and following a sample application, chapter-by-chapter, starting from conceptualization to production using the technology and processes covered in this book. In summary, by using the technologies and methods covered in this book, the reader will be able to effectively develop enterprise-class Java applications, in an agile manner!

Hibernation John Lockyer,2018 Sleep is a part of our lives. Why do we need sleep? What happens if we don't get enough sleep? Do animals need sleep? Some animals like a leopard need a

lot of sleep. Why is that? Hibernation is a very long sleep. Do you know any animals that hibernate? Why do animals hibernate?

White Magic Elissa Washuta,2021-04-27 Finalist for the PEN Open Book Award Longlisted for the PEN/Jean Stein Award A TIME, NPR, New York Public Library, Lit Hub, Book Riot, and Entropy Best Book of the Year Beguiling and haunting. . . . Washuta's voice sears itself onto the skin. —The New York Times Book Review Bracingly honest and powerfully affecting, *White Magic* establishes Elissa Washuta as one of our best living essayists. Throughout her life, Elissa Washuta has been surrounded by cheap facsimiles of Native spiritual tools and occult trends, “starter witch kits” of sage, rose quartz, and tarot cards packaged together in paper and plastic. Following a decade of abuse, addiction, PTSD, and heavy-duty drug treatment for a misdiagnosis of bipolar disorder, she felt drawn to the real spirits and powers her dispossessed and discarded ancestors knew, while she undertook necessary work to find love and meaning. In this collection of intertwined essays, she writes about land, heartbreak, and colonization, about life without the escape hatch of intoxication, and about how she became a powerful witch. She interlaces stories from her forebears with cultural artifacts from her own life—Twin Peaks, the Oregon Trail II video game, a Claymation Satan, a YouTube video of Stevie Nicks and Lindsey Buckingham—to explore questions of cultural inheritance and the particular danger, as a Native woman, of relaxing into romantic love under colonial rule.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell...

Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Hiders Seekers Finders Keepers Jessica Kulekjian, 2022-10-04 A beautiful exploration of how animals face the challenges of winter. When the autumn days grow shorter and temperatures cool, animals prepare for winter. The hiders find someplace to rest and wait for spring, huddled under the ground or snuggled in a sheltered spot. The seekers migrate to new locations with milder weather and better food sources. And the finders keep warm and fed by adapting to the harsh conditions. Every creature knows just what to do to survive winter — following an ingenious plan that's just right for them! The perfect book to curl up with on a snowy day. Readers will be transported through the magic of the seasons alongside the animals.

At overleve undergang - en mosaik af eksistensens stemninger - le Berthéline, 2022-11-02
Uddrag fra del I: Byen Prolog: Alle folk har et liv, det er deres enestående, unikke liv. Det føler de. Ingen andre er centrum i deres liv som de: kun jeg er mig - og jeg er særlig. Det er parolen. Det er individets slagord. Det er en schlager, tænker jeg. Se mig, se mig! siger de. Ikke højlydt, men det runger alligevel ud over ruinmarkerne. Verden optæller milliarder af enkeltmennesker, af myrer, de kravler af sted, gør deres gerning. Arbejdsmyrer. De er flittige. De løber mellem hinanden, bærer, kravler - hen over hinanden - de tisser. Det kræves. Altid i bevægelse. For sig. Solo. En myretue er et fascinerende syn, så megen mylder, så mange tusinder, et virvar intet menneskeligt intellekt kan finde hoved eller hale i, krydsende, frem og tilbage - dog altid hen imod et fælles mål. Den samlede tues vel

og overlevelse. Mennesker har to ben og går oprejst. De er mere udviklede, siger evolutionsbiologer. Hvad gør de med disse to ben? tænker jeg. De spankulerer rundt i deres egen lilleputthistorie, deres enestående fortælling, hvor de nyder at være midtpunkt: Her hersker jeg. Dette er min beretning. Jeg er hovedpersonen og dette territorium er mit - mit! Passage 6 - Det er ikke det værste ... jeg... - Carl, se på mig! Det gjorde du ikke. Det gjorde du bare ikke! - Desværre, jeg fortalte om vores togt ... og om... - Åh nej! - Jeg forsøgte at undgå det, men hun havde gennemskuet mig. Hun vidste, at noget var hændt, og jo mere jeg benægtede, des mere mistroisk blev hun ... til sidst lød det løgnagtigt selv i mine egne ører. De tre brede trin fejler jeg aldrig ... Passage 8 De glaner vinduet. Jeg med. På frosten og de udeblevne trækfugle. De ser gennem vinduet. Og? - hvad ser vi egentligt? Det vore øjne ser, eller det vi ønsker at se, når vi ser gennem vore øjne, i al forfængelighed. ... I al forgængelighed, tilføjer De. Intelligent. ... Jeg må først, - jo tak. Jeg skuer havari og henstand, sønderskudte mure og menneskehed. ... Altså en almindelig søndag morgen,- netop, når en menneskeuge. Efter mange år. Passage 9 De og Jeg taler om intimitet, slibrigheder og hjerteblood, og nu ... skal jeg bløde, siger De, bogfører jeg. ... Jeg misforstår? - det er ikke nødvendigvis mig, der skal bløde, men en eller anden! - herligt, så er De havnet det rette sted, hold Dem tæt. Passage 21 Han holder armene ud for sin æres skyld. Vifter, vipper, tipper ... woow ... usikkerhed, som er en sikkerhed, man ikke skal omgåes uforsigtig.

Pollinators are in trouble, but our gardens can help. Gardens represent a vast, varied 'nature reserve' packed with plants rich in nectar and pollen to sustain these delicate creatures. This book explores the role that pollinators play and how gardeners and people with gardens can do something to help attract and support them. From butterflies (and their caterpillars - with host plant information) to surprising pollinators (moths, wasps, beetles flies and hornets) and of course including honeybees, hoverflies and bumblebees, this book will offer an insight into their fragile existence, lifecycles and their vital role in the food chain and the natural cycle. Jean Vernon is the Best-Selling author of The Secret Lives of Garden Bees.

Hibernate Search in Action Emmanuel Bernard, John Griffin, 2008-12-20 Enterprise and web applications require full-featured, Google-quality search capabilities, but such features are notoriously difficult to implement and maintain. Hibernate Search builds on the Lucene feature set and offers an easy-to-implement interface that integrates seamlessly with Hibernate--the leading data persistence solution for Java applications. Hibernate Search in Action introduces both the principles of enterprise search and the implementation details a Java developer will need to use Hibernate Search effectively. This book blends the insights of the Hibernate Search lead developer with the practical techniques required to index and manipulate data, assemble and execute search queries, and create smart filters for better search results. Along the way, the reader masters performance-boosting concepts like using Hibernate Search in a clustered environment and integrating with the features already in your applications. This book assumes you're a competent Java developer with some experience using Hibernate and Lucene. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

The Book of the Damned Charles Fort, 2020-09-28 Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's *Book of the Damned* was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you--Taken from Good Reads website.
