The Future of Identity in the Information Society Simone Fischer-Hübner, Penny Duquenoy, Albin Zuccato, Leonardo Martucci, 2010-08-25 The increasing diversity of Information Communication Technologies and their equally diverse range of uses in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. Each communication exchange contains an identifier which may, or may not, be intended by the parties involved. What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked information society? From the 6 to the 10 August 2007, IFIP (International Federation for Information Processing) working groups 9. 2 (Social Accountability), 9. 6/11. 7 (IT rd

Misuse and the Law) and 11. 6 (Identity Management) hold their 3 International Summer School on The Future of Identity in the Information Society in cooperation with the EU Network of Excellence FIDIS at Karlstad University. The Summer School addressed the theme of Identity Management in relation to current and future technologies in a variety of contexts. The aim of the IFIP summer schools has been to introduce participants to the social implications of Information Technology through the process of informed discussion. Following the holistic approach advocated by the involved IFIP working groups, a diverse group of participants ranging from young doctoral students to leading researchers in the field were encouraged to engage in discussion, dialogue and debate in an informal and supportive setting. The interdisciplinary, and international, emphasis of the Summer School allowed for a broader understanding of the issues in the technical and social spheres.

Energy Law in Taiwan Anton Ming-Zhi Gao, 2021-05-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a systematic approach to legislation and legal practice concerning energy resources and production in Taiwan. The book describes the administrative organization, regulatory framework, and relevant case law pertaining to the development, application, and use of such forms of energy as electricity, gas, petroleum, and coal, with attention as needed to the pervasive legal effects of competition law, environmental law, and tax law. A general introduction covers the geography of energy resources, sources and basic principles of energy law, and the relevant governmental institutions. Then follows a detailed description of specific legislation and regulation affecting such factors as documentation, undertakings, facilities, storage, pricing, procurement and sales, transportation, transmission, distribution, and supply of each form of energy. Case law, intergovernmental cooperation agreements, and interactions with environmental, tax, and competition law are explained. Its

succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting Taiwan. It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law.

The Business of Neuropsychology Mark Barisa, 2010-03-01 The purpose of this text is to provide an overview of basic business principles and how they can be used to enhance the stability and fiscal responsibility of neuropsychological practice. The principles discussed are defined and information is provided to guide practical application of the concepts. The book is designed to benefit professionals at varying levels of practice regardless of their work setting, but focuses primarily on the issues related to neuropsychological practice. Graduate school catalogs and training program brochures reveal a broad array of educational opportunities designed to prepare future professionals for independent practice in neuropsychology. However, little is offered to prepare neuropsychologists for the business realities that await them in the workplace. The expectation that they will simply see patients and do quality clinical work is often in conflict with institutional goals of making money so that the doors can remain open. The result can be a cataclysmic crash when altruistic ideals meet capitalistic needs. The concepts of cash is king and no margin, no mission are

foreign to most neuropsychologists until our own fiscal bottom line is affected. The Business of Neuropsychology also contains an overview of business basics, such as budget and fiscal tracking, strategies for communicating with stakeholders in the business, front and back office flow and processes, billing, coding, marketing, referral relationship development, and staff growth and development. The Business of Neuropsychology is part of the Oxford AACN Workshop series.

Making a Difference Micki M. Caskey, 2006-07-01 Volume V of The Handbook of Research in Middle Level Education highlights action research in middle grades education. As a method of inquiry, action research compels educators to take action and think reflectively about those actions in order to effect positive educational change (Mills, 2000). Teachers, administrators, university professors, and other professionals conduct action research in different ways to examine classroom practices and school issues. Educational action researchers initiate their inquiries in various

contexts: alone, in small peer teams, or larger faculty groups (Zeichner, 2001). Using individual and collaborative approaches, educators gain insights into teaching and learning processes. As evidenced throughout this volume, action research in the middle grades occurs in a variety of configurations. This volume examines the dynamic ways that preservice and inservice teachers, school administrators, university faculty, and educational consortia use action research.

Indigenous Peoples, Customary Law and Human Rights – Why Living Law Matters Brendan Tobin, 2014-08-27 This highly original work demonstrates the fundamental role of customary law for the realization of Indigenous peoples' human rights and for sound national and international legal governance. The book reviews the legal status of customary law and its relationship with positive and natural law from the time of Plato up to the present. It examines its growing recognition in constitutional and international law and its dependence on and at times strained relationship with human rights law. The author analyzes the role of customary law in tribal, national and international governance of Indigenous peoples' lands, resources and cultural heritage. He explores the challenges and opportunities for its recognition by courts and alternative dispute resolution mechanisms, including issues of proof of law and conflicts between customary practices and human rights. He throws light on the richness inherent in legal diversity and key principles of customary law and their influence in legal practice and on emerging notions of intercultural equity and justice. He concludes that Indigenous peoples' rights to their customary legal regimes and states' obligations to respect and recognize customary law, in order to secure their human rights, are principles of international customary law, and as such binding on all states. At a time when the self-determination, land, resources and cultural heritage of Indigenous peoples are increasingly under

threat, this accessible book presents the key issues for both legal and non-legal scholars, practitioners, students of human rights and environmental justice, and Indigenous peoples themselves.
