Energy Law in Taiwan Anton Ming-Zhi Gao,2021-05-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a systematic approach to legislation and legal practice concerning energy resources and production in Taiwan. The book describes the administrative organization, regulatory framework, and relevant case law pertaining to the development, application, and use of such forms of energy as electricity, gas, petroleum, and coal, with attention as needed to the pervasive legal effects of competition law, environmental law, and tax law. A general introduction covers the geography of energy resources, sources and basic principles of energy law, and the relevant governmental institutions. Then follows a detailed description of specific legislation and regulation affecting such factors as documentation, undertakings, facilities, storage, pricing, procurement and sales, transportation, transmission, distribution, and supply of each form of energy. Case law, intergovernmental cooperation agreements, and interactions with environmental, tax, and competition law are explained. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting Taiwan. It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law.

A Manual for American Servicemen in the Arab Middle East William D. Wunderle,2008-05-01 The Global War on Terrorism (GWOT) has sent U.S. diplomats and troops around the world. In the current security environment, understanding foreign cultures is crucial to defeating adversaries and working with allies. Lt. Col. William D. Wunderle explains how U.S. soldiers and commanders can look at military interventions—from preparation to execution—through the lens of cultural awareness, while always minding post-conflict stability operations. He also suggests much-needed changes to the traditional intelligence preparation of the battlefield (IPB) and the military decision-making process (MDMP). Fascinating, concise, and timely, this is a must-read for military personnel, the intelligence community, and anyone seeking to grasp the motivations and decision-making styles of people all over the globe.

Successful ICT Projects in FrontPage Robert S. U. Heathcote,Bonie Ngowi,2002 This book is designed to help students on an 'A' Level, Advanced VCE or similar course to design and implement a Web site using Microsoft FrontPage 2002. FrontPage is a suitable software package for the project component in 'AS' level and Advanced VCE courses. Parts 1 to 2 of the book take the reader through the steps in creating and publishing a Web site both with and without the use of a wizard. Part 3 gives advice on all stages of project work from the definition of a suitable problem through to documentation. The book was written primarily for 'AS' and 'A' Level Information and Communication Technology students and contains in Appendix B the AQA mark scheme for 'AS' Module 3: Coursework. It will also be suitable for students on many other courses at different levels since the mark scheme, with minor variations, is one which applies to projects in many ICT courses. For a second year project in an 'A' Level course, data collected from a Web site can be exported and used in an Access database. This aspect could be developed further to fulfil the requirements of, for example, Module 6 of the AQA ICT specification.A sample project is included to show students how a complete project report may be laid out.

Cyndi's List Cyndi Howells,1999 REF This is a multi-title review. The titles include: 'Cyndi's List (880 pg)', 'Instant Information on the Internet (117 pg)', and 'Instant Information on the Internet (86 pg)' - Although Internet directories such as Howells's wildly popular site, (www.cyndislist. com), offer well-organized access to genealogy sites online, many researchers still want to plan searches with a book in hand. Now Howells (Netting Your Ancestors) has created a print version, with some exceptions, of her web site. Including over 100 categories and over 40,000 links (most with brief annotations), this book has something for nearly any genealogy-related topic that comes to mind.Schaefer's 'Instant Information' series offers pared-down compilations of basic information search sites. Her book on the United States categorizes web sites by state and includes vital records information sites, prominent research libraries and societies, indexes and databases, and general information sites. In the British Isles book, Schaefer discusses British counties and expands her lists to include major sites for churches and the Celtic language as well as a place-name index.All three books provide easy access to useful genealogy sites. While Howells strives for exhaustive coverage of genealogy links, Schaefer offers very general site lists. Though Howells's book comes with a solid price tag, the purchase of each new (and planned) title in Schaefer's series would quickly rack up the same price or more. Still, for those who want only a brief, focused guide, Schaefer's books are an economical alternative. Elaine M. Kuhn, Allen Cty. P.L., Fort Wayne,

The Four Lenses of Innovation Rowan Gibson, 2015-03-12 Ever wonder where big, breakthrough ideas come from? How do innovators manage to spot the opportunities for industry revolution that everyone else seems to miss? Contrary to popular belief, innovation is not some mystical art that's forbidden to mere mortals. The Four Lenses of Innovation thoroughly debunks this pervasive myth by delivering what we've long been hoping for: the news that innovation is systematic, it's methodical, and we can all achieve it. By asking how the world's top innovators—Steve Jobs, Richard Branson, Jeff Bezos, and many others—came up with their game-changing ideas, bestselling author Rowan Gibson identifies four key business perspectives that will enable you to discover groundbreaking opportunities for innovation and growth: Challenging Orthodoxies—What if the dominant conventions in your field, market, or industry are outdated, unnecessary, or just plain wrong? Harnessing Trends—Where are the shifts and discontinuities that will, now and in the future, provide the energy you need for a major leap forward? Leveraging Resources—How can you arrange existing skills and assets into new combinations that add up to more than the sum of their parts? Understanding Needs—What are the unmet needs and frustrations that everyone else is simply ignoring? Other books promise the keys to innovation—this one delivers them. With a unique full-color design, thought-provoking examples, and features like the 8-Step Model for Building a Breakthrough, The Four Lenses of Innovation will teach you how to reverse-engineer creative genius and make radical business innovation an everyday reality inside your organization. “Rowan Gibson has done a superb job of ‘unpacking’ what it takes to innovate.” —Philip Kotler, S. C. Johnson Distinguished Professor of International Marketing at the Kellogg School of Management at Northwestern University “Can you develop an innovative mind? Yes, you can. And this book is the manual.” —John and Doris Naisbitt, authors of China's Megatrends and The Global Game Change “An excellent piece of work for practitioners and organizations who seek to have innovation as part of their DNA.” —Camille Mirshokrai, Managing Director of Leadership Development, and Partner at Accenture “Rowan Gibson's The Four Lenses of Innovation will inspire you to think big, look afresh at the challenges you face, and take bold action to change the world.” —Robert B. Tucker, author of Driving Growth Through Innovation

Beginning ASP.NET 1.0 with Visual Basic.NET Chris Goode, John Kauffman, Christopher L. Miller, Neil Raybould, Rob Birdwell, S. Srinivasa Sivakumar, Dave Sussman, Ollie Cornes, Matt Butler, Gary Johnson, Ajoy Krishnamoorthy, Juan T. Llibre, Chris Ullman, 2002-06-04 What is this book about? ASP.NET 1.0 is the final release of Microsoft's Active Server Pages (ASP). It is a powerful server-based technology designed to create dynamic, interactive, HTML pages for web sites and corporate intranets. ASP.NET is a core element of Microsoft's exciting .NET vision, building on the strengths of the .NET Framework to provide many new features not seen in previous versions of ASP. This book, entirely revised and updated for the final release, will provide you with a step-by-step introduction to ASP.NET using VB.NET, with plenty of worked examples to help you to gain a deep understanding of what ASP.NET is all about, and how you can harness it to build powerful web applications. What does this book cover? In this book, you will learn how to Create basic ASP.NET pages with VB .NET Understand the concepts of Object Oriented Programming Work with data and XML Debug and handling errors in your code Use ASP.NET Server Controls Create user controls and components Explore the world of Web services Optimize performance Secure your application Who is this book for? This book is aimed at relatively inexperienced web builders who are looking to enrich their sites with dynamically-generated content, and want to learn how to start building web applications using ASP.NET. Developers who have a

little experience with previous versions of ASP (and are looking to move over to ASP.NET), may also find this book helpful in getting a simple grasp on what ASP.NET is, what it does, and how it can be used. Experience of basic HTML is required, but previous experience of ASP or VBScript is not essential. We'll be teaching the basics of VB .NET in this book, so prior experience of the language is not required.
