Paul Émile Lévy

The Rational Education of the Will Paul Émile Lévy,1920

Life is a Dream Pedro Calderón de la Barca, Life is a Dream, a work by Pedro Calderón de la Barca, is centered on issues of freedom and predestination. The play unfolds around Segismundo, Prince of Poland, imprisoned since birth by his father, King Basilio, due to a prophecy predicting the ruin of the kingdom under his rule. When Basilio decides to test fate by releasing Segismundo, the plot explores the consequences of this decision. The narrative addresses Segismundo's internal struggle with his destiny and the nature of reality, questioning whether life is a dream from which one can awaken. Other characters, such as Rosaura and Astolfo, weave subplots that interconnect personal desires and social duties, reflecting on justice, honor, and love. Set in a context that blends elements of drama, philosophy, and politics, the play investigates the complexity of the human condition, the ethics of leadership, and the power of repentance and personal transformation. With a structure that includes intrigue, plot twists, and reflections on being and seeming, Life is a Dream invites the audience to ponder freedom and determinism.

Coincidence Or Destiny? Phil Cousineau,2002-08-01 Why coincidences happen and what they mean has long been an object of fascination. Here, Cousineau collects episodes of chance that defy explanation from the lives of real people. The author shows that recognizing synchronicity creates a deeper appreciation for the bonds that connect our lives.

The Committee of Sleep Deirdre Barrett,2001 Drawing on examples of artists, scientists, writers, and others who have used dreams to solve problems, the author of The Pregnant Man explains how dreams can foster creativity, enhance inspiration, and resolve problems.

The Ego Tunnel Thomas Metzinger,2010-05-21 We're used to thinking about the self as an independent entity, something that we either have or are. In The Ego Tunnel, philosopher Thomas Metzinger claims otherwise: No such thing as a self exists. The conscious self is the content of a model created by our brain - an internal image, but one we cannot experience as an image. Everything we experience is "a virtual self in a virtual reality." But if the self is not "real," why and how did it evolve? How does the brain construct it? Do we still have souls, free will, personal autonomy, or moral accountability? In a time when the science of cognition is becoming as controversial as evolution, The Ego Tunnel provides a stunningly original take on the mystery of the mind.

The Seinfeld Scripts Jerry Seinfeld,Larry David,1998-04-30 Jerry. George. Elaine. Kramer. We've followed their misadventures for nearly ten years on Thursday nights. Here, finally, are the scripts of the first two seasons that will take you back to the beginning of Seinfeld. Featuring the first 17 episodes ever aired, The Seinfeld Scripts contains all the great lines that have kept us laughing for years: the pilot episode, The Seinfeld Chronicles, where it all began; George introduces his importer/exporter altar ego Art Vanderlay in The Stakeout; Kramer becomes obsessed with cantaloupe in The Ex-Girlfriend; Jerry and George meet Elaine's dad in The Jacket; is Jerry responsible for a poor Polish woman's death when he makes The Pony Remark?; Jerry and Elaine decide to become intimate again in The Deal; what will George do when he is banned from the executive bathroom in The Revenge?; and Jerry, George, and Elaine wait for a table in The Chinese Restaurant. It's all here: the award-winning writing of Seinfeld, the defining sitcom of our age. Created by Larry David and Jerry Seinfeld. Elaine: My roommate has Lyme disease. Jerry: Lyme disease? I thought she had Epstein-Barr syndrome? Elaine: She has this in addition to Epstein-Barr. It's like Epstein-Barr with a twist of Lyme disease. George: She calls me up at my office she says, We have to talk. Jerry: The four worst words in the English language. Kramer: What a body. Yeeaaaah...that's for me. Jerry: Yeah and you're just what she's looking for, too--a stranger, leering through a pair of binoculars ten floors up.

Emily of New Moon L. M. Montgomery,2007-08-01 Lucy Maud Montgomery has been beloved by generations of readers for her Anne of Green Gables stories. In the celebrated Emily trilogy, of which Emily of New Moon is the first volume, Montgomery draws a more realistic portrait of a young girl's life on Prince Edward Island. The twin threads of bright and dark, love and cruelty, hope and despair intertwine in a pattern as significant as it is enduring. Along with Emily Climbs and Emily's Quest, Emily of New Moon insightfully portrays the beauty and anguish of growing up. From the Paperback edition.

Psychedelic Horizons Thomas B. Roberts,2006 Tom Roberts demolishes what he nicely titles the 'singlestate fallacy': the idea that our usual waking state embodies all worthwhile abilities. And one of the most rapid inducers of dramatic alternate states? The answer, clear and simple, is 'psychedelics'. As William James concluded over a century ago, on psychology or science that ignores such curious chemicals and the states they induce can be complete. Likewise, most social scientists now agree that no society that tries to merely punish them out of existence can hope to understand or make use of the full array of human capacities. Tom Roberts's book points us to these capacities, and to our minds' awesome possibilities.--BOOK JACKET.

The Long Trajectory Eric M. Weiss,2012-09 The title says it all. Eric Weiss is going for the gold. I'm watching and believing. -Michael Murphy, Cofounder of Esalen Institute Author of The Future of the Body As I read Eric Weiss' The Long Trajectory, I am often lifted beyond understanding into ecstasy. Integrating the physical, transphysical, and spiritual dimensions, Weiss offers a metaphysical model that heals the past and opens the door to a new future for humanity. -Dr. Christopher M. Bache, Youngstown State University Author of Dark Night, Early Dawn What happens to us after we die? Do we cease to exist? Do we survive bodily death? Do we live again in a new body? Without answers to these questions, we cannot know who and what we really are. In The Long Trajectory, author and philosopher Eric Weiss explores these fundamental questions. Inspired by the philosophies of Alfred North Whitehead and Sri Aurobindo, Weiss develops a new metaphysical system he calls transphysical process metaphysics. It rethinks space, time, matter/energy, consciousness, and personality in ways consistent with the findings of science, while providing a coherent explanation for the survival of the personality beyond death and how it can reincarnate in a new body.

Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method Laner Cassar,2020-06-07 Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method brings together Carl Jung's active imagination and Robert Desoille's rêve éveillé dirigé/directed waking dream method (RED). It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences, proposing an integrated framework of clinical practice. The book aims to study the wider European context of the 1900s which influenced the development of both Jung's and Desoille's methods. This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional concept of inner psychic space in the waking dreams of Jung's active imagination and Desoille's RED. It also attempts a broader theoretical comparison between the procedural aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches. This book is a unique contribution to analytical psychology and will be of great interest for academics, researchers and post-graduate students interested in the use of imagination and mental imagery in analysis, psychotherapy and counselling. The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works. This book was a Grady Award nominee for 2021.

The Poetics of Reverie Gaston Bachelard,1971-06-01 In this, his last significant work, an admired French philosopher provides extraordinary meditations on the relations between the imagining consciousness and the world, positing the notion of reverie as its most dynamic point of reference. In his earlier book, The Poetics of Space, Bachelard considered several kinds of praiseworthy space conducive to the flow of poetic imagery. In Poetics of Reverie he considers the absolute origins of that imagery: language, sexuality, childhood, the Cartesian ego, and the universe. Approaching the psychology of wonder from the phenomenological viewpoint, Bachelard demonstrates the aurgentative potential of all that awareness. Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which poetry puts on the right track, the track of expanding consciousness

More Than You Know Michael J. Mauboussin,2013-06-11 Since its first publication, Michael J. Mauboussin's popular guide to wise investing has been translated into eight languages and has been named best business book by BusinessWeek and best economics book by Strategy+Business. Now updated to reflect current research and expanded to include new chapters on investment philosophy, psychology, and strategy and science as they pertain to money management, this volume is more than ever the best chance to know more than the average investor. Offering invaluable tools to better understand the concepts of choice and risk, More Than You Know is a unique blend of practical advice and sound theory, sampling from a wide variety of sources and disciplines. Mauboussin builds on the ideas of visionaries, including Warren Buffett and E. O. Wilson, but also finds wisdom in a broad and deep range of fields, such as casino gambling, horse racing, psychology, and evolutionary biology. He analyzes the strategies of poker experts David Sklansky and Puggy Pearson and pinpoints parallels between mate selection in guppies and stock market booms. For this edition, Mauboussin includes fresh thoughts on human cognition, management assessment, game theory, the role of intuition, and the mechanisms driving the market's mood swings, and explains what these topics tell us about smart investing. More Than You Know is written with the professional investor in mind but extends far beyond the world of economics and finance. Mauboussin groups his essays into four parts-Investment Philosophy, Psychology of Investing, Innovation and Competitive Strategy, and Science and Complexity Theory-and he includes substantial references for further reading. A true eye-opener, More Than You Know shows how a multidisciplinary approach that pays close attention to process and the psychology of decision making offers the best chance for long-term financial results.
