**Blindsight** Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Unconscious Branding Douglas Van Praet, 2012-11-13 For too long marketers have been asking the wrong question. If consumers make decisions unconsciously, why do we persist in asking them directly through traditional marketing research why they do what they do? They simply can't tell us because they don't really know. Before marketers develop strategies, they need to recognize that consumers have strategies too . . . human strategies, not consumer strategies. We need to go beyond asking why, and begin to ask how, behavior change occurs. Here, author Douglas Van Praet takes the most brilliant and revolutionary concepts from cognitive science and applies them to how we market, advertise, and consume in the modern digital age. Van Praet simplifies the most complex object in the known universe - the human brain - into seven codified actionable steps to behavior change. These steps are illustrated using real world examples from advertising, marketing, media and business to consciously unravel what brilliant marketers and ad practitioners have long done intuitively, deconstructing the real story behind some of the greatest marketing and business successes in recent history, such as Nike's Just Do It campaign; Got Milk?; Wendy's Where's the Beef? ;and the infamous Volkswagen Punch Buggy launch as well as their beloved The Force (Mini Darth Vader) Super Bowl commercial.

Driver Behaviour and Training Dr Lisa Dorn, 2012-10-01 Research on driver behaviour over the past two decades has clearly demonstrated that drivers' goals and motivations are important determinants of driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of the third volume, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. A major focus is to consider how driver training and education needs to be adapted to raise awareness of the personal characteristics that contribute to unsafe driving behaviour with the aim of developing and reporting interventions to improve road safety. The contributors consider the novice driver problem, emotions and driver behaviour, at-work road safety, technological interventions, human factors and the road environment and rider behaviour. The readership for this volume includes researchers from a variety of different academic backgrounds, senior practitioners in road safety, including regulatory authorities, the police service, and private and public sector personnel working with drivers and motorcyclists.

**Value-Based Pricing: Drive Sales and Boost Your Bottom Line by Creating, Communicating and Capturing Customer Value** Harry Macdivitt, Mike Wilkinson, 2011-09-19 A Groundbreaking Pricing Model for the New Business Landscape Why would any customer choose Brand X over Brand Y, regardless of price? In a word: Value. When customers feel they are getting good value from your product or service, they are more than happy to pay more—which is good news for you and your business. Even in today's global market—with its aggressive competitors, low-cost commodities, savvy consumers, and intangible digital offerings—you can outsell and outperform the rest using Value-Based Pricing. Done correctly, this method of pricing and selling helps you: Understand your customers' wants and needs Focus on what makes your company different Quantify your differences and build a value-based strategy Communicate your value directly to your customers Now more than ever, it is essential for you to reexamine the reality of the value you offer customers—and this step-by-step program shows you how. Developed by global consultants Harry Macdivitt and Mike Wilkinson, Value-Based Pricing identifies three basic elements of the Value Triad: revenue gain, cost reduction, and emotional contribution. By delivering these core values to your customers—through marketing, selling, negotiation, and pricing—you can expect an increase in profits, productivity, and consumer goodwill. These are the same value-based strategies used by major companies such as Philips, Alstom, Siemens, and Virgin Mobile. And when it comes to today's more intangible markets—such as consulting services or digital properties like e-books and music files—these value-based strategies are more important than ever. So forget about your old pricing methods based on costs and competition. Once you know your own value—and how to communicate it to others—everybody profits.

**Planning Your Internet Marketing Strategy** Ralph F. Wilson, 2001-10-25 A top international authority on Web marketing and e-commerce provides a sure-fire formula for developing a winning e-commerce marketing strategy One of the biggest reasons why so many Internet-based businesses fail isn't poor product or service, or technology failures, or even lack of funding. As Internet marketing guru Ralph F. Wilson explains in this ground-breaking book, a preponderance of e-business failures can be traced back to a lack of knowledge about the Internet's full potential as a marketing and sales tool. With the help of case studies of outstanding e-business successes and failures, Wilson describes how to develop four, core e-business marketing competencies. Readers learn how to develop a USP, clarify goals, and perform analysis and customer profiling. They also learn how to perform product positioning; develop a balanced promotional mix; provide lifetime customer value; and much more. Ralph F. Wilson (Loomis, CA) is the founding editor of three popular e-business publications read by 130,000 subscribers in 130 countries: Web Marketing Today, Web Commerce Today, and Doctor Ebiz.

*Citizenship, Identity and Social Movements in the New Hong Kong* Wai-man Lam, Luke Cooper, 2017-09-11 Hong Kong's 'Umbrella Revolution' has been widely regarded as a watershed moment in the polity's post-1997 history. While public protest has long been a routine part of Hong Kong's political culture, the preparedness of large numbers of citizens to participate in civil disobedience represented a new moment for Hong Kong society, reflecting both a very high level of politicisation and a deteriorating relationship with Beijing. The transformative processes underpinning the dramatic events of autumn 2014 have a wide relevance to scholarly debates on Hong Kong, China and the changing contours of world politics today. This book provides an accessible entry point into the political and social cleavages that underpinned, and were expressed through, the Umbrella Movement. A key focus is the societal context and issues that have led to growth in a Hong Kong identity and how this became highly politically charged during the Umbrella Movement. It is widely recognised that political and ethnic identity has become a key cleavage in Hong Kong society. But there is little agreement amongst citizens about what it means to 'be Hong Konger' today or whether this identity is compatible or conflicting with 'being Chinese'. The book locates these identity cleavages within their historical context and uses a range of theories to understand these processes, including theories of nationalism, social identity, ethnic conflict, nativism and cosmopolitanism. This theoretical plurality allows the reader to see the new localism in its full diversity and complexity and to reflect on the evolving nature of Hong Kong's relationship with Mainland China.

Deathbird Stories Harlan Ellison, 2014-04-29 Masterpieces of myth and terror about modern gods from technology to drugs to materialism—"fantasy at its most bizarre and unsettling" (The New York Times). As Earth approaches Armageddon, a man embarks on a quest to confront God in the Hugo Award-winning novelette, "The Deathbird." In New York City, a brutal act of violence summons a malevolent spirit and a growing congregation of desensitized worshippers in "The Whimper of Whipped Dogs," an Edgar Award winner influenced by the real-life murder of Queens resident Kitty Genovese in 1964. In "Paingod," the deity tasked with inflicting

pain and suffering on every living being in the universe questions the purpose of its cruel existence. Deathbird Stories collects these and sixteen more provocative tales exploring the futility of faith in a faithless world. A legendary author of speculative fiction whose best-known works include A Boy and His Dog and I Have No Mouth, and I Must Scream—and whose major awards and nominations number in the dozens, Harlan Ellison strips away convention and hypocrisy and lays bare the human condition in modern society as ancient gods fade and new deities rise to appease the masses—gods of technology, drugs, gambling, materialism—that are as insubstantial as the beliefs of those who venerate them. In addition to his Nebula, Hugo, World Fantasy, Bram Stoker, Edgar, and other awards, Ellison was called “one of the great living American short story writers” by the Washington Post—and this collection makes it clear why he has earned such an extraordinary assortment of accolades. Stories include: “Introduction: Oblations at Alien Altars” “The Whimper of Whipped Dogs” “Along the Scenic Route” “On the Downhill Side” “O Ye of Little Faith” “Neon” “Basilisk” “Pretty Maggie Moneyeyes” “Corpse” “Shattered Like a Glass Goblin” “Delusion for a Dragon Slayer” “The Face of Helene Bournouw” “Bleeding Stones” “At the Mouse Circus” “The Place with No Name” “Paingod” “Ernest and the Machine God” “Rock God” “Adrift Just Off the Islets of Langerhans: Latitude 38° 54' N, Longitude 77° 00' 13 W” “The Deathbird”
