Phenomenology and Existentialism in the Twentieth Century Anna-Teresa Tymieniecka, 2009-10-13 Our world's cultural circles are permeated by the philosophical influences of existentialism and phenomenology. Two contemporary quests to elucidate rationality - took their inspirations from Kierkegaard's existentialism plumbing the subterranean source of subjective experience and Husserl's phenomenology focusing on the constitutive aspect of rationality. Yet, both contrary directions mingled readily in common vindication of full reality. In the inquisitive minds (Scheler, Heidegger, Sartre, Stein, Merleau-Ponty, et al.), a fruitful cross-pollination of insights, ideas, approaches, fused in one powerful wave disseminating throughout all domains of thought. Existentialist rejection of ratiocination and speculation together with Husserl's shift to the genesis of rapproches philosophy and literature (Wahl, Marcel, Berdyaev, Wojtyla, Tischner, etc.), while the foundational underpinnings of language (Wittgenstein, Derrida, etc.) opened the hidden behind the veils (Sezgin and Dominguez-Rey).

100 Atmospheres The Meco Network, 2019-07-17 100 Atmospheres is an invitation to think differently. Through speculative, poetic, and provocative texts, thirteen writers and artists have come together to reflect on human relationships with other species and the planet.

Writing Science Fiction Lazette Gifford, 2010 Who else wants to write science fiction? Written by professional writer (see www.lazette.net/) this book takes the reader by the hand and explains exactly how to create a commercially successful science fiction novel. The author is well known in the genre and regularly teaches creative writing. This book defines science fiction and explains the different categories of science fiction. The reader

is then taught the basics of research, how to build a world based on science and myth, how to build 'the others', namely building up believable characters in your Aliens, how to write the language of the future, placing stories in the universe, space travel, the possibilities of government in the future, the challenge of writing something new, creating an effective outline, being a professional writer and preparing your manuscript for the publisher. Market; All creative writing enthusiasts; All university and WEA creative writing students; Secondary school and sixth-form libraries; Teachers, tutors and lecturers responsible for creative writing and English teaching; College/university central and departmental libraries.

Tales of Research Misconduct Hub Zwart, 2017-09-14 This monograph contributes to the scientific misconduct debate from an oblique perspective, by analysing seven novels devoted to this issue, namely: *Arrowsmith* by Sinclair Lewis (1925), *The affair* by C.P. Snow (1960), *Cantor's Dilemma* by Carl Djerassi (1989), *Perlmann's Silence* by Pascal Mercier (1995), *Intuition* by Allegra Goodman (2006), *Solar* by Ian McEwan (2010) and *Derailment* by Diederik Stapel (2012). Scientific misconduct, i.e. fabrication, falsification, plagiarism, but also other questionable research practices, have become a focus of concern for academic communities worldwide, but also for managers, funders and publishers of research. The aforementioned novels offer intriguing windows into integrity challenges emerging in contemporary research practices. They are analysed from a continental philosophical perspective, providing a stage where various voices, positions and modes of discourse are mutually exposed to one another, so that they critically address and question one another. They force us to start from the admission that we do not really know what misconduct is. Subsequently, by providing

case histories of misconduct, they address integrity challenges not only in terms of individual deviance but also in terms of systemic crisis, due to current transformations in the ways in which knowledge is produced. Rather than functioning as moral vignettes, the author argues that misconduct novels challenge us to reconsider some of the basic conceptual building blocks of integrity discourse. Except where otherwise noted, this book is licensed under a Creative Commons Attribution 4.0 International License. Making Hope Happen Shane J. Lopez, 2014-07-22 Draws on cutting-edge research and inspiring true stories about people who resolved to build better lives for themselves, their families and their communities in a guide based on the author's research about the psychology of hope that provides a scientifically based, customizable blueprint for meeting goals.

Postcolonialism Cross-Examined Monika Albrecht, 2019-06-19 Taking a strikingly interdisciplinary and global approach, *Postcolonialism Cross-Examined* reflects on the current status of postcolonial studies and attempts to break through traditional boundaries, creating a truly comparative and genuinely global phenomenon. Drawing together the field of mainstream postcolonial studies with post-Soviet postcolonial studies and studies of the late Ottoman Empire, the contributors in this volume question many of the concepts and assumptions we have become accustomed to in postcolonial studies, creating a fresh new version of the field. The volume calls the merits of the field into question, investigating how postcolonial studies may have perpetuated and normalized colonialism as an issue exclusive to Western colonial and imperial powers. The volume is the first to open a dialogue between three different areas of postcolonial scholarship that previously

developed independently from one another: • the wide field of postcolonial studies working on European colonialism, • the growing field of post-Soviet postcolonial/post-imperial studies, • the still fledgling field of post-Ottoman postcolonial/post-imperial studies, supported by sideways glances at the multidirectional conditions of interaction in East Africa and the East and West Indies. Postcolonialism Cross-Examined looks at topics such as humanism, nationalism, multiculturalism, nostalgia, and the Anthropocene in order to piece together a new, broader vision for postcolonial studies in the twenty-first century. By including territories other than those covered by the postcolonial mainstream, the book strives to reframe the “postcolonial” as a genuinely global phenomenon and develop multidirectional postcolonial perspectives.

Circulars and Regulations Board of Governors of the Federal Reserve System (U.S.), 1915

Predictive Maintenance of Pumps Using Condition Monitoring Raymond S Beebe, 2004-04-16 This book shows how condition monitoring can be applied to detect internal degradation in pumps so that appropriate maintenance can be decided upon based on actual condition rather than arbitrary time scales. The book focuses on the main condition monitoring techniques particularly relevant to pumps (vibration analysis, performance analysis). The philosophy of condition monitoring is briefly summarised and field examples show how condition monitoring is applied to detect internal degradation in pumps. * The first book devoted to condition monitoring and predictive maintenance in pumps. * Explains how to minimise energy costs, limit overhauls and reduce maintenance expenditure. * Includes material not found anywhere else.

The Diversity of Sacred Lands in Europe Delos Initiative. Workshop, 2012 The

Delos Initiative focuses on the sacred natural sites in developed countries throughout the world (such as Australia, Canada, the European countries, Japan, New Zealand and the United States of America). Its main purpose is to help in maintaining both the sanctity and the biodiversity of these sites, through the understanding of the complex relationship between spiritual/cultural and natural values.

Information and Communication Technologies and Broad-based Development

Jeremy Grace, Charles Kenny, Christine Zhen-Wei Qiang, World Bank, 2004

Annotation This paper reviews some of the evidence linking telecommunications and the Internet and economic growth, the likely impact of these new ICTs on income inequality and anecdotal evidence on the role of the Internet in improving government services and governance. It's final chapter looks at methods to maximize the development impact of new ICTs.

The Flat Earth Trilogy Book of Secrets I Gregory Lessing Garrett, 2018-12-20

This book is an Anthology of Gregory Lessing Garrett's writings and others on the topic of Flat Earth Plane Cosmology of all types, including Enclosed Earth, Hollow Earth, Concave Earth, Infinite Plane Earth, The Enochian Earth Model, etc... The hope is that the ideas expounded in this Flat Earth Trilogy series will provide compelling justifications for the claim that no curvature can be found on the Earth, which points to the empirical conclusion that we live on a plane and not a spinning ball in science fiction outer space. The details regarding the possible topography of the Earth are discussed in depth in this book, but ultimately, the absolute true topography of the Earth is not known by anyone. -Gregory Lessing Garrett

Kleinzeit Russell Hoban, 2002-01-02 'Russell Hoban is one of our greatest, timeless novelists' The Times

The Limits of Organic Life in Planetary Systems National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Origins and Evolution of Life, Committee on the Limits of Organic Life in Planetary Systems, 2007-07-26 The search for life in the solar system and beyond has to date been governed by a model based on what we know about life on Earth (terran life). Most of NASA's mission planning is focused on locations where liquid water is possible and emphasizes searches for structures that resemble cells in terran organisms. It is possible, however, that life exists that is based on chemical reactions that do not involve carbon compounds, that occurs in solvents other than water, or that involves oxidation-reduction reactions without oxygen gas. To assist NASA incorporate this possibility in its efforts to search for life, the NRC was asked to carry out a study to evaluate whether nonstandard biochemistry might support life in solar system and conceivable extrasolar environments, and to define areas to guide research in this area. This book presents an exploration of a limited set of hypothetical chemistries of life, a review of current knowledge concerning key questions or hypotheses about nonterran life, and suggestions for future research.

Global Handbook of Quality of Life Wolfgang Glatzer, Laura Camfield, Valerie Møller, Mariano Rojas, 2015-01-22 This handbook provides a comprehensive historical account of the field of Quality of Life. It brings together theoretical insights and empirical findings and presents the main items of global quality of life and wellbeing research. Worldwide in its scope of topics, the handbook examines discussions of demographic and health development, the spread of democracy, global economic accounting, multi-item

measurement of perceived satisfaction and expert-assessed quality of life and the well-being of children, women and poor people. It looks at well-being in specific regions, including North and Sub-Saharan Africa, Asia, South America and Eastern and Western Europe. In addition to contributions by leading and younger authors, the handbook includes contributions from International Organizations about their own work with respect to social reporting.

Electricity for Health in the 21st Century Carole Punt, 2000

Biographical Dictionary of Literary Influences John Powell, 2000-10-30 Over the past two decades, the process of cultural development and, in particular, the role of reading has been of growing interest, but recent research has been episodic and idiosyncratic. In this biographical dictionary, research devoted specifically to the reading habits of 19th century individuals who shaped Western culture is brought together for the first time. While giving prominent coverage to literary and political figures, the volume's 270 entries also include musicians, painters, educators, and explorers. Each entry includes brief biographical information, a concise summary of literary influences on the subject, and clear direction for further research. The book provides a practical tool for scholars wishing to trace the reading experience of important Western cultural figures. Subjects were selected from the people most responsible for the cultural development of Europe, Britain and the British Empire, and the Americas between 1800 and 1914. Although selective, the sample of 270 figures is substantial enough to suggest broad, cross-cultural habits and effects, enabling scholars to better understand the relationship between reading and culture. In an introductory essay, Powell explores the patterns and relationships that can be discerned from the entries. The first of three anticipated volumes, the book is an important

step forward in researching the role of reading in cultural development.

Physics of the Earth Frank D. Stacey, Paul M. Davis, 2008-08-28 The fourth edition of Physics of the Earth maintains the original philosophy of this classic graduate textbook on fundamental solid earth geophysics, while being completely revised, updated, and restructured into a more modular format to make individual topics even more accessible. Building on the success of previous editions, which have served generations of students and researchers for nearly forty years, this new edition will be an invaluable resource for graduate students looking for the necessary physical and mathematical foundations to embark on their own research careers in geophysics. Several completely new chapters have been added and a series of appendices, presenting fundamental data and advanced mathematical concepts, and an extensive reference list, are provided as tools to aid readers wishing to pursue topics beyond the level of the book. Over 140 student exercises of varying levels of difficulty are also included, and full solutions are available online at www.cambridge.org/9780521873628.

The Medusa Frequency Russell Hoban, 2012-06-18 An inexplicable message flashed onto the screen of his Apple II computer at 3 a.m. heralds the beginning of a startling quest for frustrated author Herman Orff. Taking up the offer of a cure for writer's block leads him 'to those places in your head that you can't get to on your own' - and plunges him into a semi-dreamland inhabited by a bizarre combination of characters from myth and reality: the talking head of Orpheus; a lost love; the young girl of Vermeer's famous portrait - and a frequency of Medusas.
