**The Hidden Screen** Robert L. Hilliard, Michael C. Keith, 1999 A highly eclectic form of broadcasting in the United States today, by any standard, is low-power television (LPTV). Not an insignificant blip in the industry, there are more LPTV stations licensed than there are full-power television stations. LPTV offers true local and community programming to millions of viewers. Because it fills gaps left by both full-power television and cable, LPTV tends to serve outlying communities, disenfranchised urban groups, and others who have no other way to get their messages out, stay connected, or receive video programs that meet their special interests and needs. In this, the first book devoted entirely to LPTV, the authors tell the complete story of this unique and important medium from its inception to the formidable challenges it faces today and its potential for tomorrow.

**International Energy and Poverty** Lakshman Guruswamy, 2015-08-20 Around 2.8 billion people globally, also known as the Other Third or energy poor, have little or no access to beneficial energy that meets their needs for cooking, heating, water, sanitation, illumination, transportation, or basic mechanical power. This book uniquely integrates the hitherto segmented and fragmented approaches to the challenge of access to energy. It provides theoretical, philosophical and practical analysis of energy for the low energy (non-hydrocarbon based) Other Third of the world, and how the unmet needs of the energy poor might be satisfied. It comprehensively addresses the range of issues relating to energy justice and energy access for all, including affordable - sustainable energy technologies (ASETs). The book breaks new ground by crafting a unified and cohesive framework for analysis and action that explains the factual and socio-political phenomenon of the energy poor, and demonstrates why clean energy is a primary determinant of their human progress. This is a must-read for all scholars, students, professionals and policy makers working on energy policy, poverty, and sustainable energy technologies.

*Burma at the Turn of the 21st Century* Monique Skidmore, 2005-07-31 This is the first study in a half century of one of the least known societies in the contemporary world. *Burma at the Turn of the 21st Century* provides insight into the everyday lives, concerns, and values of the people of this reclusive nation. Prominent anthropologists and religion scholars with in-depth, long-term knowledge of central Burma offer detailed analyses of the ways in which Burmese actively manage and create lives for themselves in the shadow of a military dictatorship. Their research crosses the domains of religious, political, and social life, examining public festivals and performance, local-state relations, literary life, lottery frenzies, mass meditators, political rumors and black humor, the value of children, changing male identities, and more in this impressive, wide-ranging collection.

*Nuclear Power* Richard Hantula, Debra Voegelé, 2010 Explains how electricity is made from a source that will never run out: the energy packed inside the basic units of matter called atoms. This book also examines some of the challenges and problems associated with nuclear power that scientists are working to solve.--P. [4] of cover.

*Coal* Robert Green, 2009-08-01 This title provides information on Coal as a source of energy. It highlights the positives and negatives of coal and discusses clean coal technology.

**The Barter Economy of the Khmer Rouge Labor Camps** Scott Pribble, 2023-07-21

Pribble investigates the barter economies that developed in many of the labor camps established under the Khmer Rouge in Cambodia. When the Khmer Rouge abolished currency and markets in 1975, starving Cambodians created underground exchanges in labor camps throughout the country, bartering luxury items for food and other necessities, while simultaneously undermining the regime's ideological goals of eliminating any traces of capitalism in Democratic Kampuchea. Pribble asserts three key points about the barter economy in the Khmer Rouge labor camps. First, the underground exchanges in Democratic Kampuchea provided food and medicine for desperate people subsisting under a totalitarian regime, saving the lives of countless Cambodians. Second, bartering was the riskiest way to obtain food because it was dependent upon the discretion of two or more individuals from different social classes under the threat of violent punishment, thereby altering the social dynamics of the camps. Finally, despite the regime's extreme efforts to eliminate foreign influence from the country and impose communist ideology on millions of citizens, basic forms of market capitalism and a demand for superfluous luxury goods persisted in labor camps throughout the country. A fascinating study of the human consequences of imposing rigid ideology, that will be of particular interest to scholars and students of political history and Southeast Asian history. **Economic Persuasions** Stephen Gudeman, 2009-06-30 As the transition from socialism to a market economy gathered speed in the early 1990s, many people proclaimed the final success of capitalism as a practice and neoliberal economics as its accompanying science. But with the uneven achievements of the transition—the deepening problems of development, persistent unemployment, the widening of the wealth gap, and expressions of resistance—the discipline of economics is no longer seen as a mirror of reality or as a unified science. How should we understand economics and, more broadly, the organization and disorganization of material life? In this book, international scholars from anthropology and economics adopt a rhetorical perspective in order to make sense of material life and the theories about it. Re-examining central problems in the two fields and using ethnographic and historical examples, they explore the intersections between these disciplines, contrast their methods and epistemologies, and show how a rhetorical approach offers a new mode of analysis while drawing on established contributions.

**Premodern Rulers and Postmodern Viewers** Janice North, Karl C. Alvestad, Elena Woodacre, 2018-02-01 Pop culture portrayals of medieval and early modern monarchs are rife with tension between authenticity and modern mores, producing anachronisms such as a feminist Queen Isabel (in RTVE's Isabel) and a lesbian Queen Christina (in The Girl King). This book examines these anachronisms as a dialogue between premodern and postmodern ideas about gender and sexuality, raising questions of intertemporality, the interpretation of history, and the dangers of presentism. Covering a range of famous and lesser-known European monarchs on screen, from Elizabeth I to Muhammad XII of Granada, this book addresses how the lives of powerful women and men have been mythologized in order to appeal to today's audiences. The contributors interrogate exactly what is at stake in these portrayals; namely, our understanding of premodern rulers, the gender and sexual

ideologies they navigated, and those that we navigate today.

**The Price of Belonging** Éva Rozália Hölzle, Joanna Pfaff-Czarnecka, 2023 By addressing what it means to belong beyond the collective safety net and an emotionally buttressed sense of embeddedness, *The Price of Belonging* exposes the adverse sides of belonging characterised by obligations, commitments, sacrifices, hidden threats and pressures.

Non-governmental Organizations (NGOs) and Sustainable Development in Sub-Saharan Africa Robert A. Dizie, 2008 Written to provide guidance for civil society organizations and their client groups, this book examines the role of NGOs in the development processes on the African continent. It raises questions about the influence of funding agencies over the NGOs they support and explores the challenges NGOs face. The book argues that increased knowledge and cooperation on all parts is essential to achieve sustainable development. This book also concludes that sustainable development activities are not beneficial to every community in Africa. Taking into consideration globalization and studies of sub-Saharan countries, this book concludes that new models of leadership are necessary for the success of Africa, and NGOs are a vital part of achieving that development.

Learn PowerPoint 2000 John M. Preston, Sally Preston, Robert Ferrett, 1999-11 For upper intermediate and more advanced students who want to communicate more effectively in English.

**The Greater Middle East in Global Politics** Mehdi Amineh, 2007-10-30 This anthology unites in one volume two studies of the Greater Middle East in global politics – each conceptual and empirical. First, it is a historical-comparative study of politics and societies in selected Greater Middle Eastern countries. Second, it is an empirical case study of states and societies of the Greater Middle East in global politics.

*Marketing Dictatorship* Anne-Marie Brady, 2008 Click here to hear Anne-Marie Brady's BBC World Service radio documentary titled *The Message from China* China's government is no longer a Stalinist-Maoist dictatorship, yet it does not seem to be moving significantly closer to democracy as it is understood in Western terms. After a period of self-imposed exclusion, Chinese society is in the process of a massive transformation in the name of economic progress and integration into the world economy. The Chinese Communist Party (CCP) is seeking to maintain its rule over China indefinitely, creating yet another new China. Propaganda and thought work play a key role in this strategy. In this important book, noted China scholar Anne-Marie Brady answers some intriguing questions about China's contemporary propaganda system. Why have propaganda and thought work strengthened their hold in China in recent years? How has the CCP government strengthened its power since 1989 when so many analysts predicted otherwise? How does the CCP maintain its monopoly on political power while dismantling the socialist system? How can the government maintain popular support in China when the uniting force of Marxist-Leninist-Maoist ideology is spent and discredited? What has taken the place of communist ideology? Examining propaganda and thought work in the current period offers readers a unique understanding of how the CCP will address real and perceived threats to stability and its continued hold on power. This innovative book is a must-read for everyone interested in China's growing role in the world community.

*Strategic Decision Making in Modern Manufacturing* Harinder Singh Jagdev, Attracta Brennan, J. Browne, 2013-06-29 *Strategic Decision Making in*

Modern Manufacturing introduces and explains the AMBIT (Advanced Manufacturing Business ImplemenTation) approach, which has been developed to bridge the gap between strategic management considerations and the operational effects of technology investment decisions on the manufacturing organisation, so that the likely impact of new manufacturing technology and/or programme implementations can be evaluated, anticipated and accurately predicted. The AMBIT approach focuses specifically on the non-financial aspects of such investment decisions and offers an approach that allows a manager, or more frequently a management team, to understand the impacts of a new technology or a new programme on the manufacturing organisation in terms of manufacturing performance.

*Word Made Global* Mark R. Gornik, 2011-07-22 A groundbreaking work of ethnography, urban studies, and theology, Mark Gornik's *Word Made Global* explores the recent development of African Christianity in New York City. Drawing especially on ten years of intensive research into three very different African immigrant churches, Gornik sheds light on the pastoral, spiritual, and missional dynamics of this exciting global, transnational Christian movement.

*Shakespeare and Money* Graham Holderness, 2020-05-01 Though better known for his literary merits, Shakespeare made money, wrote about money and enabled money-making by countless others in his name. With chapters by leading scholars on the economic, financial and commercial ramifications of his work, this multifaceted volume connects the Bard to both early modern and contemporary economic conditions, revealing Shakespeare to have been a serious economist in his own right.

**The Antitrust Paradigm** Jonathan B. Baker, 2019-05-06 A new and urgently needed guide to making the American economy more competitive at a time when tech giants have amassed vast market power. The U.S. economy is growing less competitive. Large businesses increasingly profit by taking advantage of their customers and suppliers. These firms can also use sophisticated pricing algorithms and customer data to secure substantial and persistent advantages over smaller players. In our new Gilded Age, the likes of Google and Amazon fill the roles of Standard Oil and U.S. Steel. Jonathan Baker shows how business practices harming competition manage to go unchecked. The law has fallen behind technology, but that is not the only problem. Inspired by Robert Bork, Richard Posner, and the "Chicago school," the Supreme Court has, since the Reagan years, steadily eroded the protections of antitrust. The Antitrust Paradigm demonstrates that Chicago-style reforms intended to unleash competitive enterprise have instead inflated market power, harming the welfare of workers and consumers, squelching innovation, and reducing overall economic growth. Baker identifies the errors in economic arguments for staying the course and advocates for a middle path between laissez-faire and forced deconcentration: the revival of pro-competitive economic regulation, of which antitrust has long been the backbone. Drawing on the latest in empirical and theoretical economics to defend the benefits of antitrust, Baker shows how enforcement and jurisprudence can be updated for the high-tech economy. His prescription is straightforward. The sooner courts and the antitrust enforcement agencies stop listening to the Chicago school and start paying attention to modern economics, the sooner Americans will reap the benefits of competition.

*How to Achieve Inclusive Growth* Valerie Cerra, Barry Eichengreen, Asmaa El-

Ganainy, Martin Schindler, 2022-01-22 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Rising inequality and widespread poverty, social unrest and polarization, gender and ethnic disparities, declining social mobility, economic fragility, unbalanced growth due to technology and globalization, and existential danger from climate change are urgent global concerns of our day. These issues are intertwined. They therefore require a holistic framework to examine their interplay and bring the various strands together. Leading academic economists have partnered with experts from several international institutions to explain the sources and scale of these challenges. They gather a wide array of empirical evidence and country experiences to lay out practical policy solutions and to devise a comprehensive and unified plan of action for combatting these economic and social disparities. This authoritative book is accessible to policy makers, students, and the general public interested in how to craft a brighter future by building a sustainable, green, and inclusive society in the years ahead.

**Politics as Usual** Thomas W. Pogge, 2013-04-24 Worldwide, human lives are rapidly improving. Education, health-care, technology, and political participation are becoming ever more universal, empowering human beings everywhere to enjoy security, economic sufficiency, equal citizenship, and a life in dignity. To be sure, there are some specially difficult areas disfavoured by climate, geography, local diseases, unenlightened cultures or political tyranny. Here progress is slow, and there may be set-backs. But the affluent states and many international organizations are working steadily to extend the blessings of modernity through trade and generous development assistance, and it won't be long until the last pockets of severe oppression and poverty are gone. Heavily promoted by Western governments and media, this comforting view of the world is widely shared, at least among the affluent. Pogge's new book presents an alternative view: Poverty and oppression persist on a massive scale; political and economic inequalities are rising dramatically both intra-nationally and globally. The affluent states and the international organizations they control knowingly contribute greatly to these evils - selfishly promoting rules and policies harmful to the poor while hypocritically pretending to set and promote ambitious development goals. Pogge's case studies include the \$1/day poverty measurement exercise, the cosmetic statistics behind the first Millennium Development Goal, the War on Terror, and the proposed relaxation of the constraints on humanitarian intervention. A powerful moral analysis that shows what Western states would do if they really cared about the values they profess.

*'Just' a Fisherman's Wife* Jane Dowling, 2011-05-25 This book provides a unique exposé of women in family businesses in the Australian commercial fishing industry and explores their visibility, contributions, barriers and opportunities for participation, and knowledge. Recognising the need to move beyond an exploration of women's 'roles,' this book applies a detailed, well articulated and sophisticated feminist post structural approach which explores women's identity, power/knowledge and positioning in relation to the current industry climate, in the context of discourses of 'crisis' and 'sustainability.' This is particularly pertinent with climate change looming as the next industry 'crisis.' As such, this book has significant interdisciplinary appeal, and will benefit feminist, gender, natural resource

management and fisheries scholars and policy makers. Ultimately, it is hoped that this book will have a substantial impact on industry women in both Australia and elsewhere, and reduce their marginalisation; increase awareness about their contributions; and result in greater opportunities to voice their unique knowledge on social issues with a view to enhancing industry sustainability.
