New Perspectives on CALL for Second Language Classrooms Sandra Fotos,Charles M. Browne,2013-06-17 This practical handbook is designed to help language teachers, teacher trainers, and students learn more about their options for using computer-assisted language learning (CALL) and develop an understanding of the theory and research supporting these options. The chapters in New Perspectives on CALL for Second Language Classrooms synthesize previous CALL theory and research and describe practical applications to both second and foreign language classrooms, including procedures for evaluating these applications. The implementation of CALL at the institutional level is also addressed, with attention to designing multimedia language laboratories and creating collaborative CALL-based projects between educational institutions. Although many chapters locate their descriptions of CALL activities and projects within the ESL/EFL setting, the principles and activities described are equally useful for other language settings. The book does not require prior knowledge of CALL, computers, or software. To assist readers, a glossary of CALL terms and an appendix of CALL Web sites are provided. The book also has its own accompanying Web site (http://www.erlbaum.com/callforL2classrooms) presenting chapter abstracts, author contact information, and regularly updated links to pedagogical, research, and teacher development sites. By integrating theoretical issues, research findings, and practical guidelines on different aspects of CALL, this book offers teachers multiple levels of resources for their own professional development, for needs-based creation of specific CALL activities, for curriculum design, and for implementation of institutional and inter-institutional CALL projects.

Letters, Postcards, Email Esther Milne,2012-02-27 In this original study, Milne moves between close readings of letters, postcards and emails, and investigations of the material, technological infrastructures of these forms, to answer the question: How does presence function as an aesthetic and rhetorical strategy within networked communication practices? As her work reveals, the relation between old and new communication systems is more complex than allowed in much contemporary media theory. Although the correspondents of letters, postcards and emails are not, usually, present to one another as they write and read their exchanges, this does not necessarily inhibit affective communication. Indeed, this study demonstrates how physical absence may, in some instances, provide correspondents with intense intimacy and a spiritual, almost telepathic, sense of the other's presence. While corresponding by letter, postcard or email, readers construe an imaginary, incorporeal body for their correspondents that, in turn, reworks their interlocutor's self-presentation. In this regard the fantasy of presence reveals a key paradox of cultural communication, namely that material signifiers can be used to produce the experience of incorporeal presence.
