Advanced Parallel Processing Technologies Olivier Temam, Pen-chung Yew, Binyu Zang, 2011-09-15 This book constitutes the refereed proceedings of the 9th International Symposium on Advanced Parallel Processing Technologies, APPT 2011, held in Shanghai, China, in September 2011. The 13 revised full papers presented were carefully reviewed and selected from 40 submissions. The papers are organized in topical sections on parallel distributed system architectures, architecture, parallel application and software, distributed and cloud computing.

Early Childhood Intervention Christina J. Groark, Steven M. Eidelman, Susan Maude, Louise Kaczmarek, 2011-07-22 This eye-opening set looks at young children with special needs, their families, and the laws, policies, programs, and services designed to help them. The three-volume *Early Childhood Intervention: Shaping the Future for Children with Special Needs and Their Families* is a unique, comprehensive, and much-needed examination of a critically important issue. In its pages, a diverse array of experts discuss key aspects of policies, laws, rights, programs, and services available to children today. Examinations range from historical roots to present-day considerations, such as culturally and linguistically diverse children, use of technology, and contemporary testing and teaching methods. Throughout, the most current and best available research is combined with professional and clinical experience, wisdom, values, and family perspectives. The work explores issues affecting both children with psychological disorders and those with physical challenges, such as children who are blind or hearing impaired. Coverage includes all aspects of life-skills, medicine, health sciences, education, and child welfare. Although it is focused on programs in the United States, this comprehensive set offers additional insights by including comparisons of U.S. programs and services with their international counterparts.

Design and Implementation of Web-enabled Teaching Tools Mary Hricko, 2003-01-01 Exploring the myriad issues regarding web accessibility, this book specifically focuses on the design and implementation of web-enabled teaching tools. Educators from across the United States and Canada present their ideas on such topics as legal implications, overcoming organizational barriers, and course designs for the electronic classroom. Also discussed are special opportunities provided by web accessibility in education, such as web-based distance learning and teaching technology for blind or visually impaired faculty.

Public Health Perspectives on Disability Donald J. Lollar, Elena M. Andresen, 2010-11-08 Traditionally, the public health viewpoint on disability was geared toward primary prevention of disabling conditions or events. More recently, with the movement for disability rights and the emergence of disability studies, the challenge to the field has been to promote positive health outcomes in this underserved community. Such a change in public health culture must start at the educational level, yet training programs have generally been slow in integrating this perspective—with its potential for enriching the field—into their curricula. *Public Health Perspectives on Disability* meets this challenge with an educational framework for rethinking disability in public health study and practice, and for attaining the competencies that should accompany this knowledge. This reference balances history and epidemiology, scientific advances, advocacy and policy issues, real-world insights, and progressive recommendations, suiting it especially to disability-focused courses, or to add disability-related content to existing public health programs. Each chapter applies awareness and understanding of disabled persons' experience to one of the core curriculum areas, including: Health services administration, Environmental health science and occupational health, Health law and ethics, The school as physical setting, Maternal, child, and family health, Disasters and disability. In *Public Health Perspectives on Disability*, faculty, researchers, administrators, and students in graduate schools of public health throughout the U.S. will find a worthy classroom text and a robust source of welcome—and much needed—change.

R Markdown Yihui Xie, J.J. Allaire, Garrett Grolemund, 2018-07-27 *R Markdown: The Definitive Guide* is the first official book authored by the core R Markdown developers that provides a comprehensive and accurate reference to the R Markdown ecosystem. With R Markdown, you can easily create reproducible data analysis reports, presentations, dashboards, interactive applications, books, dissertations, websites, and journal articles, while enjoying the simplicity of Markdown and the great power of R and other languages. In this book, you will learn Basics: Syntax of Markdown and R code chunks, how to generate figures and tables, and how to use other computing languages Built-in output formats of R Markdown: PDF/HTML/Word/RTF/Markdown documents and ioslides/Slidy/Beamer/PowerPoint presentations Extensions and applications: Dashboards, Tufte handouts, xaringan/reveal.js presentations, websites, books, journal articles, and interactive tutorials Advanced topics: Parameterized reports, HTML widgets, document templates, custom output formats, and Shiny documents. Yihui Xie is a software engineer at RStudio. He has authored and co-authored several R packages, including knitr, rmarkdown, bookdown, blogdown, shiny, xaringan, and animation. He has published three other books, *Dynamic Documents with R* and *knitr*, *bookdown: Authoring Books and Technical Documents with R Markdown*, and *blogdown: Creating Websites with R Markdown*. J.J. Allaire is the founder of RStudio and the creator of the RStudio IDE. He is an author of several packages in the R Markdown ecosystem including rmarkdown, flexdashboard, learnr, and radix. Garrett Grolemund is the co-author of *R for Data Science* and author of *Hands-On Programming with R*. He wrote the lubridate R package and works for RStudio as an advocate who trains engineers to do data science with R and the Tidyverse.

Community of the Transfiguration Paul R Dekar, 2008-08-28 In the 1930s, German theologian Dietrich Bonhoeffer anticipated the restoration of the Church after the coming Second World War through a new kind of monasticism, a way of life of uncompromising adherence to the Sermon on the Mount in imitation of Christ. Since then, the renewal of Christian monasticism has become a great spiritual movement. Imbued with a love for God and neighbour, and with a healthy self-love, people are going to monasteries to deepen their relationship with God, to pray, and to find peace. While some monastic institutions are suffering a decline in traditional vocations, many Christians are exploring monastic lifestyles. This book introduces *The Community of the Transfiguration* in Australia, the story of a new monastic community and an inspiring source of hope for the world at another time of spiritual, social, and ecological crisis.

Disability and Community Living Policies Arie Rimmerman, 2017-07-14 This book provides a comprehensive analysis of the roots of institutionalization, deinstitutionalization legislation and policies of the twentieth century, and twenty-first-century efforts to promote community living policies domestically and internationally, particularly through the role of the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD), a landmark treaty adopted on 13 December 2006. Rimmerman shows that deinstitutionalization and community living cannot be

examined only in terms of the number of institutions closed but also through the substantial change in values, legislation, and policies supporting personalization, as well as the social participation of people with disabilities. The book includes a significant exploration of United States legislation and important Supreme Court decisions compared with European policies toward community living. Finally it discusses the importance of Articles 12 and 19 of the convention and demonstrates the case of Israel that has used the convention as a road map for proposing a new community living policy.

COM and .NET Component Services Juval Löwy,2001 With COM and .NET Component Services, skilled COM developers can leverage their knowledge for the next generation of components to be built for Microsoft's new .NET framework. A primary goal of Microsoft's COM+ is to provide proven design solutions for scalable systems. Assuming experience with classic COM, COM and .NET Component Services focuses on the added services of COM+, including support for transactions, queued components, events, concurrency management, and security. Along the way, it ably demonstrates that COM+ is a masterpiece of design and usability from the ground up--truly a mature set of component services oriented for the middle tier. COM+ provides a foundation for robust, enterprise-wide, mission-critical distributed applications. And it's not limited to Internet applications. You can use COM+ services in the same places as classic COM components: in-house two-tier information systems, client-tier controls, desktop applications, machine control components, and every other conceivable application of COM. COM and .NET Component Services is the first book to stress the importance of learning to use COM+ services for both .NET and COM component-based applications. Since most companies have considerable investment in existing code base and development skills, COM+ can serve as a migration path for companies and developers. Companies can start (or continue) their projects in COM, using COM+ as a supporting platform for component services, and then when the time comes to move to .NET, they can start plugging .NET components seamlessly into the same architecture, reusing and interacting with their existing COM components.

Greenhouse Gas Control Technologies B. Eliasson,P. Riemer,A. Wokaun,1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific, technical and political discipline of Greenhouse Gas (GHG) Control. The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies (GHGT-4). It was the largest gathering of experts active in this new and fast-developing field. GHGT-4 was different from its predecessors in that it included all greenhouse gases, not only CO2, and all issues which could contribute to the mitigation of the greenhouse problem - technical, economic and political. The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today. It also addressed ways to increase the efficiency of power production and utilisation, and looked at proposals to encourage the development of renewable energy sources. During the Opening Session, 10 keynote addresses were heard from prominent personalities in government, industry and academia. To tackle this very inter-disciplinary problem and to achieve acceptable solutions, it is essential for industry and government to initiate intense dialogue and cooperation. Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge. The primary attributes of this global challenge are manifold: the problem is global and international; it is inter-disciplinary, both in substance and approach; it covers technical, political and economic issues and involves government, science, industry and academia; it is complex and non-linear; and it will take the efforts of all parties involved to solve the problem. These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures. They also show it is a problem we can influence and that there is a wealth of ideas. The challenge now is to find the right partners to put these ideas into action.
