Are You Sh*tting Me? Cary McNeal, 2014-10-28 Blue Ice, Meteors, and Beaver Ass, Oh My! FACT: The use of maggots to clean wounds has proven to be effective for patients who don't respond to traditional treatments. FACT: The Icelandic dish hákarl is beheaded basking shark that is buried in the ground for six to 12 weeks to putrefy before it is eaten. FACT: Used during the Dutch Revolt, rat torture involved trapping rodents under a bowl on a prisoner's stomach then heating the bowl's exterior so the animals would eat through the victim's flesh to try to escape. FACT: The average person picks his nose five times every hour, occasionally eating what he picks. The world is a scary place, and it gets scarier every day. From the creator of the bestselling 1,001 Facts That Will Scare The S#*t Out Of You comes this new collection of 1,004 (count 'em!) truly horrifying and horrifyingly true facts about the world around us. From ancient medical practices to doomsday scenarios, to disgusting food from around the world and the entire terrifying state of Florida, the facts in *Are You Sh*tting Me?* are sure to entertain and disturb you at once. Unless of course you are already disturbed, in which case this is the book for you!

Deep Learning Classifiers with Memristive Networks Alex Pappachen James, 2019-04-08 This book introduces readers to the fundamentals of deep neural network architectures, with a special emphasis on memristor circuits and systems. At first, the book offers an overview of neuro-memristive

systems, including memristor devices, models, and theory, as well as an introduction to deep learning neural networks such as multi-layer networks, convolution neural networks, hierarchical temporal memory, and long short term memories, and deep neuro-fuzzy networks. It then focuses on the design of these neural networks using memristor crossbar architectures in detail. The book integrates the theory with various applications of neuro-memristive circuits and systems. It provides an introductory tutorial on a range of issues in the design, evaluation techniques, and implementations of different deep neural network architectures with memristors.

A Caregiver's Guide to Lewy Body Dementia Helen Buell Whitworth, James Whitworth, 2010-10-20 Although Lewy Body Dementia is the second leading cause of degenerative dementia in the elderly, it is not well known or understood and is often confused with Alzheimer's Disease or Parkinson's. The Caregivers Guide to Lewy Body Dementia is the first book

I, Ripper Stephen Hunter, 2015-05-19 A vivid reimagining of Jack the Ripper's personal story intertwines his 1888 murders of five prostitutes with the investigation of an Irish journalist who is caught in a deadly game of cat and mouse against a backdrop of London's seamy Whitechapel District.

Animal Subjects Jodey Castricano, 2008-05-20 Although Cultural Studies has directed sustained attacks against sexism and racism, the question of the animal has lagged behind developments in broader society with regard to animal suffering in factory farming, product testing, and laboratory

experimentation, as well in zoos, rodeos, circuses, and public aquariums. The contributors to *Animal Subjects* are scholars and writers from diverse perspectives whose work calls into question the boundaries that divide the animal kingdom from humanity, focusing on the medical, biological, cultural, philosophical, and ethical concerns between non-human animals and ourselves. The first of its kind to feature the work of Canadian scholars and writers in this emergent field, this collection aims to include the non-human-animal question as part of the ethical purview of Cultural Studies and to explore the question in interdisciplinary terms.

Racism and the Tory Party Mike Cole, 2022-12-30 Racism is an endemic feature of the Tory Party. Tracing the history of that racism, *Racism and the Tory Party* investigates the changing forms of racism in the party from the days of Empire, including the championing of imperialism at the turn of the 20th century and the ramping up of antisemitism, the imperial and 'racial' politics of Winston Churchill, the rise of Enoch Powell and Powellism, to the Margaret Thatcher years, the birth of 'racecraft' and her policies in Northern Ireland, and the hostile environment and its consolidation and expansion under Theresa May and Boris Johnson's premierships. Throughout the book, all forms of racism are addressed including the various forms of colour-coded and as well as non-colour-coded racism as they are put in their historical and economic contexts. This book should be of relevance to all interested in British politics and British history, as well as undergraduate and

postgraduate students studying the sociology and politics of racism, as well as for students of the history of the development of British racism and of imperialism and its aftermath.

Innovative Mobile Learning: Techniques and Technologies Ryu, Hokyoung, Parsons, David, 2008-10-31 This book includes the challenges and practical experience of the design of M-Learning environments, covering current developments in M-learning experiences in both academia and industry.-Provided by publisher.

Loss and Wonder at the World's End Laura A. Ogden, 2021-09-13 In *Loss and Wonder at the World's End*, Laura A. Ogden brings together animals, people, and things—from beavers, stolen photographs, lichen, American explorers, and birdsong—to catalog the ways environmental change and colonial history are entangled in the Fuegian Archipelago of southernmost Chile and Argentina. Repeated algal blooms have closed fisheries in the archipelago. Glaciers are in retreat. Extractive industries such as commercial forestry, natural gas production, and salmon farming along with the introduction of nonnative species are rapidly transforming assemblages of life. Ogden archives forms of loss—including territory, language, sovereignty, and life itself—as well as forms of wonder, or moments when life continues to flourish even in the ruins of these devastations. Her account draws on long-term ethnographic research with settler and Indigenous communities; archival photographs; explorer journals; and experiments in natural history and performance studies. *Loss*

and Wonder at the World's End frames environmental change as imperialism's shadow, a darkness cast over the earth in the wake of other losses.

Offshore Jamie Peck, 2017-03-09 Offshore outsourcing- the movement of jobs to lower-wage countries- is one of the defining features of globalization. Routine blue-collar work has been going offshore for decades, but the digital revolution beginning in the 1990s extended this process to many parts of the service economy too. Politically controversial from the beginning, offshoring is conventionally seen as a threat to jobs, wages, and economic security in higher-income countries, having become synonymous with the dirty work of globalization. Even though the majority of corporations make some use of offshore outsourcing, fearful of negative publicity most now choose to manage these activities in a discreet manner. Partly as a result, the global sourcing business, reckoned to be worth more than \$120 billion, largely operates under the radar, its ocean-spanning activities in low-cost labour arbitrage being poorly documented and poorly understood. Offshore is the first sustained investigation of the workings of the global sourcing industry, its business practices, its market dynamics, its technologies, and its politics. The book traces the complex transformation of the worlds of global sourcing, from its origins in the new international division of labour in the 1970s, through the rapid growth of back-office economies in India and the Philippines since the 1990s, to the development of nearshore markets in Latin America and Eastern Europe. Recently, this evolving process of

geographical and organizational restructuring has included experiments in backshoring within low-cost, ex-urban locations in the United States and a wave of software-enabled automation, which threatens to remove labour from many back offices altogether. In these and other ways, the offshore revolution continues.

Russia in the Wake of the Cold War Dorothy Horsfield, 2017-05-30 This study examines the enduring Cold War legacies underpinning Western perceptions of contemporary Russia under President Vladimir Putin. It analyzes the ways in which the West has interpreted and reacted to Russia's domestic authoritarianism and foreign policy behavior and argues for diplomatic engagement based on liberal pluralism.

Collateral Damage Paul Kimmel, Chris E. Stout Ph.D., 2006-08-30 Color-coded terrorism alerts are issued, then lifted with no explanation. False alarms can, like crying wolf, desensitize people to a real need to be on alert. And that psychic numbing is just one effect discussed in this book by fifteen psychologists teamed up to take a critical look at the U.S. war on terrorism. These experts are led by the Chairman of an American Psychological Association task force charged with pinpointing the effect of our anti-terrorism efforts on American mental health. Together, they present the most up-to-date and intriguing picture we have of the fallout on our own people from our own programs. The text spotlights stereotyping of foreigners, increased domestic hate crimes, fear, depression and helplessness, as well as

increased militancy and belligerence, especially among students. Perhaps most disturbing in the land of the free, we also see increasing acceptance of restrictions on our personal freedoms, and acceptance of human rights violations. Color-coded terrorism alerts are issued, then lifted with no explanation. False alarms can, like crying wolf, desensitize people to a real need to be on alert. Contributors to this collection aim to give us a reality check, looking at what our national reactions to terrorism have been, how those reactions have affected the psyche of our people and whether this has made us stronger or weaker, and more or less likely to be the target for future attacks.

Unconscious Branding Douglas Van Praet, 2012-11-13 For too long marketers

have been asking the wrong question. If consumers make decisions unconsciously, why do we persist in asking them directly through traditional marketing research why they do what they do? They simply can't tell us because they don't really know. Before marketers develop strategies, they need to recognize that consumers have strategies too . . . human strategies, not consumer strategies. We need to go beyond asking why, and begin to ask how, behavior change occurs. Here, author Douglas Van Praet takes the most brilliant and revolutionary concepts from cognitive science and applies them to how we market, advertise, and consume in the modern digital age. Van Praet simplifies the most complex object in the known universe - the human brain - into seven codified actionable steps to behavior change. These steps are illustrated using real world examples from advertising, marketing, media and business to consciously unravel what brilliant marketers and ad practitioners have long done intuitively, deconstructing the real story behind some of the greatest marketing and business successes in recent history, such as Nike's Just Do It campaign; Got Milk?; Wendy's Where's the Beef? ;and the infamous Volkswagen Punch Buggy launch as well as their beloved The Force (Mini Darth Vader) Super Bowl commercial.

The US-India Nuclear Pact Harsh V. Pant, 2011-08-05 The signing of the US-India civilian nuclear agreement in 2008 is a milestone in the geopolitics of the twenty-first century—one that has virtually rewritten the rules of the global nuclear order. It has also transformed the relationship between the

world's oldest and largest democracies. Harsh V. Pant's book is the first detailed examination of this major policy initiative as well as the process by which this pact came to fruition. Pant identifies a range of issues at the structural, domestic, political, and individual levels that have shaped the recent trajectory of the US–India relationship. He analyses the three-year long negotiating process with a special focus on how political leaderships in both states managed domestic opposition to the pact. The author locates the agreement in the context of the broader debate over the role of international institutions in global politics.

Corporate Power and Ownership in Contemporary Capitalism Susanne Soederberg, 2009-09-14 Despite the influence corporations wield over all aspects of everyday life, there has been a remarkable absence of critical inquiry into the social constitution of this power. In analysing the complex relationship between corporate power and the widespread phenomenon of share ownership, this book seeks to map and define the nature of resistance and domination in contemporary capitalism. Drawing on a Marxist-informed framework, this book reconnects the social constitution of corporate power and changing forms of shareholder activism. In contrast to other texts that deal with corporate governance, this study examines a diverse and comprehensive set of themes, from socially responsible investing to labour-led shareholder activism and its limitations. Through this ambitious and critical study, author Susanne Soederberg demonstrates how the corporate

governance doctrine represents an inherent feature of neoliberal rule, effectively disembedding and depoliticising relations of domination and resistance from the wider power and paradoxes of capitalism. Examining corporate governance and shareholder activism in a number of different contexts that include the United States and the global South, this important book will be of interest to students and scholars of international political economy, international relations and development studies. It will also be of relevance to a wider range of disciplines including finance, economics, and business and management studies. Winner of the Davidson/Studies in Political Economy Award.

Ownership of Proceeds of Corruption in International Law Kolawole Olaniyan, 2023-11-21 Recovery of proceeds deriving from corruption is now increasingly recognized as a principle of contemporary international law. However, people's sovereign and ownership rights over their wealth and natural resources have remained more theoretical than real, especially in the global fight against corruption. As a result, the populations of victim-states often cannot hold their governments accountable for misusing proceeds of corruption, and do not benefit from the recovery, repatriation, management, and use of returned proceeds. In the first comprehensive study on the issue, Kolawole Olaniyan challenges the conventional notion that sovereign and ownership rights over wealth and natural resources - and by extension, the proceeds of corruption - should be exclusively exercised by

states. Olaniyan's *Ownership of Proceeds of Corruption in International Law* examines the relationship between the right to wealth and natural resources, proceeds of corruption, and economic activities. Focusing on victims of corruption, the book argues that victim-states' populations ought to be empowered to pursue grand corruption and asset recovery actions against their governments. It proposes theoretical and legal remedies for recovering proceeds of corruption, encouraging the development of domestic laws.

The Oxford Handbook of Crime and Criminal Justice Michael Tonry, 2011-09-29 A comprehensive and accessible overview of the operation of the American criminal justice system. This handbook's extensive coverage of the criminal justice system in the U.S. makes it an important reference for students and scholars in criminal justice, law, and public policy.

Science and Spirituality Kayume Baksh, 2021-11-30 This book provides a fascinating, well-researched, and thorough discussion of the connections between science and spirituality, including religion. It is eye-opening and allows readers to truly redefine how they look at these disciplines while providing, at the same time, a vibrant perspective for those embarking on such an exercise for the first time. Science investigates the physical world, where space, time, and matter comprise the main aspects of its empirical approach, that is, of physically proving all that there is around us. Spirituality goes beyond the physical. Here, physical quantities become non-existent and so our connections are perceived through seemingly nonrational

(but hardly irrational) unscientific means. Religion is rendered useless as a way of explaining how the universe works. Quantum mechanics, an integral part of modern physics, is helping to bring about a closer convergence by showing remarkable similarities between advanced scientific observations and what has been taught for centuries in the wisdom traditions, known as spirituality. This insightful information continues to amaze us like none before. We, therefore, now have the right combination and evidence to show why the gap between science and spirituality must be bridged so that we can finally embrace the answers to mysterious questions about the universe and life. This thought-provoking book provides the details you need. We stand on the verge of heralding a new paradigm or, rather, a metaparadigm – the mother of all paradigms – one that unfolds a new vision of reality that includes consciousness for the first time, not excludes it – as science still does. Whether you belong to a religion or not, are a spiritualist, an atheist, an agnostic, or just curious about the universe and life, this book is for you.

Egyptian and Semito-Hamitic (Afro-Asiatic) Studies in Memoriam Werner Vycichl Gábor Takács, 2017-07-03 This volume is paying homage to the memory of Werner Vycichl (1909-1999), one of the most outstanding figures of Semito-Hamitic (Afro-Asiatic) comparative linguistics. The contributions by well-known specialists comprise almost all principle branches of the Semito-Hamitic macrofamily. The volume is divided in five major sections following the areas of interest of W. Vycichl: Egyptology and Coptology, Semitic

linguistics, Beja (Northern Cushitic), Chadic, and general Semito-Hamitic (Afro-Asiatic) comparative linguistics (Berber has been excluded, since we already have a separate Mémorial Werner Vycichl with articles only in Berberology). The volume is important for the researchers in all the linguistic fields enumerated above as well as for those interested in African or comparative linguistics in general.

Egyptian and Semito-Hamitic (Afro-Asiatic) Studies Werner Vycichl, Gâabor Takâacs, 2004 This collection of papers comprises almost all major areas of interest of Werner Vycichl: Egyptology and Coptology, Semitic linguistics, Beja (Northern Cushitic), Chadic, and general Semito-Hamitic (Afro-Asiatic) comparative linguistics.
