Maritime Security between China and Southeast Asia Liselotte Odgaard,2017-03-02 Arguing that security relations between China and Southeast Asia are profoundly affected by disputes over maritime space and territory in the South China Sea, the author demonstrates that the primacy of strategic competition over strategic partnerships promotes the emergence of a structure of deterrence, encouraging South East Asia to side with the United States to balance the military power of China. Combining the concepts of international disputes and order, the book establishes a framework designed to focus on periods of transition where international regulatory mechanisms are out of step with developments in the security environments of states. Features include: - Substantial evidence that strategic competition between the United States, China and South East Asia promotes stability. - A comprehensive account of military, diplomatic, economic, historical and legal aspects of security environments of states. Suitable for scholars and graduate students of international relations, international law, security studies, conflict management and regionalism, it will also be invaluable supplementary reading for undergraduate courses.

Teaching and Learning English Literature Ellie Chambers,Marshall Gregory,2006-03-14 'It is scarcely possible to imagine a truly educated person who cannot read well. Yet it is not clear how or even if courses in literature actually work. How can teachers of English help students in their developmental journey toward becoming skillful readers and educated persons? This is the complex question that Chambers and Gregory address in Teaching and Learning English Literature. The authors consider practical matters such as course design and student assessment but do not shirk larger historical and theoretical issues. In a lucid and non-polemical fashion - and occasionally with welcome humor - Chambers and Gregory describe the what, why, and how of doing literature, often demonstrating the techniques they advocate. Veteran teachers will find the book rejuvenating, a stimulus to examining purposes and methods; beginning teachers may well find it indispensable' - Professor William Monroe, University of Houston 'The transatlantic cooperation of Ellie Chambers and Marshall Gregory has produced an outstanding book that ought to be on the shelves of anyone involved in the teaching of English Literature, as well as anyone engaged in the scholarship of teaching and learning in general or in any discipline. As they say, the teaching of English Literature plays a central role in human beings' search for meaning although others in other disciplines may make this claim for theirs too. If so, they will still learn a great deal from this book; anyone looking for no more than a means of satisfying the demands of governments that look for simplistic quality measures and economic relevance, let them look elsewhere. This is a book for now and for all times' - Professor Lewis Elton, Visiting Professor, University of Manchester, Honorary Professor, University College London This is the third in the series Teaching and Learning the Humanities in Higher Education. The book is for beginning and experienced teachers of literature in higher education. The authors present a comprehensive overview of teaching English literature, from setting teaching goals and syllabus-planning through to a range of student assessment strategies and methods of course or teacher evaluation and improvement. Particular attention is paid to different teaching methods, from the traditional classroom to newer collaborative work, distance education and uses of electronic technologies. All this is set in the context of present-day circumstances and agendas to help academics and those in training become more informed and better teachers of their subject. The book includes: - how literature as a discipline is currently understood and constituted - what it means to study and learn the subject - what 'good teaching' is, with fewer resources for teaching, larger student numbers, an emphasis on 'user-pay' principles and vocationalism. This is an essential text for teachers of English Literature in universities and colleges worldwide. The Teaching & Learning in the Humanities series, edited by Ellie Chambers and Jan Parker, is for beginning and experienced lecturers. It deals with all aspects of teaching individual arts and humanities subjects in higher education. Experienced teachers offer authoritative suggestions on how to become critically reflective about discipline-specific practices.

Interactive Collaborative Learning Michael E. Auer,David Guralnick,James Uhomoibhi,2016-12-31 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning, held 21-23 September 2016 at Clayton Hotel in Belfast, UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general, but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning, with a focus on collaborative learning. Today the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings, and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

We Sleep They Live David Michael Beechwood,2019-06-07 Today, we are feeling the loss of our privacy like no other generation has. We are also being led down a path that fuels the evil intents of those who collect our secrets. Rather than being warmed by the suggested security blanket, most of us have felt a little uncovered at times. Our lives are often shamefully exposed by people with self-serving epic desires to know everything about each of us. Those involved in this prying employ little known or hidden processes. These methods have been used against us by both criminals and the government. Unendingly, we are asked to conform to intrusive measures or laws that severely alter our lives. Who is it that is restructuring our lives in all too often negative ways? While considering what has been happening here, an interesting comparison struck me. It came from an old movie called They Live. Others who have watched this movie likely had similar thoughts of comparing it to the reality we all face today. I have taken those lighthearted comparisons and have carried them further in this book. The effort here is to bring to light what most of us already know but do not want to take seriously. We live in a world that really does have evil people lurking behind the scenes. They take advantage of us with impunity. Why? – Because very few people are looking deep enough to uncover the webs of deceit that exist. This book uses the backdrop of the movie to paint a real-world comparison of those treacheries that befall most of us. The schemes used by those behind-the-curtain villains to perpetuate their corruptions on the world are addressed herein. This book might seem like a work of fiction, but sorry to say, it's a nonfiction title.

The SAGE Handbook of Media Studies John D. H. Downing,Denis McQuail,Philip Schlesinger,Ellen Wartella,2004-09-08 Media and communication research is a diverse and stimulating field of inquiry, not only in subject matter but also in purposes and methodologies. Over the past twenty years, and in step with the contemporary shift toward trans-disciplinarity, Media Studies has rapidly developed a very significant body of theory and evidence. Media Studies is here to stay and scholars in the discipline have a vital contribution to make. The SAGE Handbook of Media Studies surveys and evaluates the theories, practices, and future of the field. Editor John Downing and associate editors Denis McQuail, Philip Schlesinger, and Ellen Wartella have brought together a team of international contributors to provide a varied critical analysis of this intensely interesting field of study. The Handbook offers a comprehensive review within five interconnected areas: humanistic and social scientific approaches; global and comparative perspectives; the relation of media to economy and power; media users; and elements in the media mosaic ranging from media ethics to advertising, from popular music to digital technologies, and from Hollywood and Bollywood to alternative media. The contributors to The Handbook are from Australia, Austria, Britain, Canada, France, Guatemala, India, Japan, the Netherlands, South Korea, and the United States. Each contributor offers a unique perspective on topics broad in scope. The Handbook is an ideal resource for university media researchers, for faculty developing new courses and revising curricula, and for graduate courses in media studies. It is also a necessary addition to any academic library.

The Geopolitics of Australia's Regional Relations D. Rumley,2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle-Upon-Tyne. I was very fortunate to graduate among its extremely capable, sporty and enthusiastic class of '68 from where several academic geographers emerged. Equally fortunately, some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada. At the University of British Columbia I was supervised at different times by Julian Minghi and Victor Prescott, both of whom are not only extremely capable academics but are also very fine people. I owe an enormous debt to John, Julian and Victor and to the British and Canadian taxpayers who provided financial support for my University studies. In 1974, I began an academic career at the University of Western Australia where I have been ever since, save for a two-year period from 1991-3 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo. Viewing Australia and the Asia-Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact. I am especially grateful for the support provided by so many Japanese academic colleagues and friends beginning as early as 1976. Three individuals deserve special mention for their help, guidance and enduring friendship - George Ohshima, Hiroshi Tanabe and Akihiro Kinda.

Sanga,2003-03-30 With the publication of Salman Rushdie's Booker Prize winning novel, 'Midnight's Children' in 1981, followed by the unprecedented popularity of his subsequent works, the cinematic adaptation of Michael Ondaatje's 'The English Patient,' many other best-sellers written by South Asian novelists writing in English have gained a tremendous following. What High Schools Don't Tell You (And Other Parents Don't Want You toKnow) Elizabeth Wissner-Gross,2008-06-24 From the author of What Colleges Don't Tell You, a plan to help parents of middle and early high school students prepare their kids for the best colleges In order to succeed in the fiercely competitive college admissions game, you need a game plan—and you have to start young. In this empowering guide, Elizabeth Wissner- Gross, a nationally sought-after college “packager,” helps parents of seventh to tenth graders create a long-term plan that, come senior year, will allow their kids to virtually write their own ticket into their choice of schools. Japanese Infantryman 1937–45 Gordon L. Rottman,2012-09-20 This book examines in detail the Japanese Infantryman who was, despite comparisons with the notorious German Waffen SS, an enigma to Westerners. Identifying the ways in which the Japanese soldier differed from his Western counterpart, the author explores concepts such as Bushido, Seppuku, Shiki and Hakko Ichi-u in order to understand what motivated Japanese warriors.
