Books and Beyond [4 volumes] Kenneth Womack, 2008-10-30 There's a strong interest in reading for pleasure or self-improvement in America, as shown by the popularity of Harry Potter, and book clubs, including Oprah Winfrey's. Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature, including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories, such as cyberpunk, fantasy literature, flash fiction, GLBTQ literature, graphic novels, manga and anime, and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Reading in America for pleasure and knowledge continues to be popular, even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. These have captured the attention of general readers and are also playing a critical role in the language arts classroom. This book maps the state of popular literature and reading in America today, including the growth of new genres, such as cyberpunk, zines, flash fiction, GLBTQ literature, and other topics. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's critical reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected, general bibliography. Students will find this book a valuable guide to what they're reading today and will appreciate its illumination of popular culture and contemporary social issues.

Applied Parallel Computing. Industrial Computation and Optimization Jerzy Wasniewski, 1996-12-11 Although the last decade has witnessed significant advances in control theory for finite and infinite dimensional systems, the stability and control of time-delay systems have not been fully investigated. Many problems exist in this field that are still unresolved, and there is a tendency for the numerical methods available either to be too general or too specific to be applied accurately across a range of problems. This monograph brings together the latest trends and new results in this field, with the aim of presenting methods covering a large range of techniques. Particular emphasis is placed on methods that can be directly applied to specific problems. The resulting book is one that will be of value to both researchers and practitioners.

It further helps you determine your needs and goals and make well informed design and content decisions. Creating Web Sites: The Missing Manual includes a basic primer on HTML, working with JavaScript, and incorporating services like Paypal's shopping cart, Amazon's associate program, and Google AdSense and AdWords. It delivers advanced tricks for formatting, graphics, audio and video, as well as Flash animation and dynamic content. And you'll learn how to identify and connect with your site's audience through forms, forums, meta tags, and search engines. This isn't just another dry, uninspired book on how to create a web site. Build a Co-parenting Team Peter K. Gerlach, 2003-03-23 Note: links below connect to the non-profit educational Break the Cycle! Web site (Formerly Stepfamily inFormation). Close the pages or use your browsers back button to return here. Typical multi-home stepfamilies are riddled with conflicts between three or more co-parents and their relatives over child discipline, nutrition, visitations, custody, hygiene, religion, schooling, holidays, loyalties, expenses, names, responsibilities, and other topics. The scope, complexity, and persistence of these disputes among ex mates, stepparents, and relatives can significantly contribute to eventual re/divorce. (The / notes it may be a stepparents first union). This guidebook is part of a series intended to help co-parents and supporters overcome five common hazards that combine to (1) promote epidemic U.S. re/divorce, and (2) pass on significant psychological wounds to vulnerable children. The hazards are: co-parents shared unawarenesses and ignorance of key information; plus... unseen psychological wounds from low-nurturance childhoods; plus... incomplete or blocked grief in kids and/or adults, which inhibits new bonds and adult intimacy; plus... courtship neediness and romantic illusions; plus... little informed stepfamily help in the media and local community. Typical nuclear

stepfamilies include three or more co-parents (bioparents and stepparents) and several minor kids shuttling between two or more homes: Parenting effectively in this environment is far more complex than in traditional intact biological families - which catches typical co-parents and relatives by surprise. Why this book (and series)? Families exist to nurture - i.e. to fill key needs of their kids and adults. Most U.S. stepfamilies follow the divorce of one or both new mates, most of whom are parents. Divorce suggests that their kids weren't well nurtured in their first family, and have many concurrent developmental + special needs to fill in their complex stepfamily.

The Remarriage Book Peter K. Gerlach, MSW, Peter K. Msw, 2003-04-14 Note - links below will take you articles and resources in the nonprofit Break the Cycle! Web site (formerly Stepfamily inFormation). Use your browser's back button to return to Xlibris.com. Love is not enough... Typical new stepparents and bioparents (co-parents) usually find that building a multi-home stepfamily is unexpectedly confusing and conflictual. Most recent stepfamily literature estimates that over half of American co-parents who attempt re/marriage after divorce or mate death ultimately re/divorce psychologically or legally - despite their love, maturity, commitment, and experience. The / notes that it may be a stepparent's first union. This unique guidebook results from 27 years' research into why so many U.S. couples re/divorce. It appears that there are five factors that combine to often defeat love's brightest dreams: unseen psychological wounds from childhood in stepfamily adults and kids, and... blocked grief from two or three major sets of losses in some co-parents and/or stepkids; and... co-parent unawareness of (a) their inner family of subselves and related psychological wounds; (b) healthy grieving basics; (c) vital parenting and relationship skills and (d) stepfamily realities; and... These factors and high neediness causing one or both partners to commit to wounded, unaware people (mate + ex mate + stepkids), for the wrong reasons, at the wrong time; and... Little informed co-parent support available in the media and their community. My work as a stepfamily therapist since 1981 suggests that courting and re/married partners can work patiently at 12 Projects together to overcome these five re/marital hazards and forge a strong, nourishing re/marriage

Passport to World Band Radio 1998 Lawrence Magne, 1997-09-16 Elegant rusticity meets unpretentious luxury in the work of this award-winning architecture firm. Howard Backen, award-winning principal of the architecture firm Backen Gillam Kroeger, is at the center of a popular movement in home design that emphasizes comfort over pretension and elegant simplicity over complication that tends to serve the ego of architects. This volume, the first on his work and that of the firm, is an artful exploration of that this aesthetic, featuring farmhouses in the Napa Valley, hilltop homes, seaside retreats, and lakeside hideaways. Throughout the work, a sense of intimacy, warmth, and informality pervades. Natural materials, such as wood, stone, and brick form the foundations, walls, and ceilings of these subtly luxurious spaces, while nature itself plays a considered role that is at

once complementary and also intricately conjoined with the work. Long vistas open outward toward sun-drenched valleys from the window-lined wall of a bedroom in one home, while more immediate scenes of steeply rising hillsides and hidden lakes appear from just beyond the back stoop--and the rough-hewn-board dock--of another. Sensitive, alluring, and wonderfully resonant with the suggestion of invitation, the work of Backen Gillam Kroeger is both thrilling to the eye and restorative to the soul.
