Everything Happened in Vietnam Robert Peter Thompson,2009-02 A uniquely powerful departure from the genre of war literature, this narrative moves in the cadence of memories told as stories over a campfire. Thompson transports the reader into the mind-space of his 19-year-old self, as he fought this war, grew up there, grew old there, and changed forever there.

The Best Place to Work Ron Friedman,2014 Award-winning psychologist Ron Friedman, Ph.D. uses the latest research from the fields of psychology, economics, neurobiology, marketing, and evolutionary anthropology to reveal what really makes us successful at work. Integrating powerful stories and cutting edge science, Friedman explains how companies-and every one of the people working in them, from the front lines to the corner office-can leverage proven psychological techniques that naturally lead to smarter thinking, greater innovation, and stronger productivity.

Instant DHTML Scriptlets Dino Esposito,1998 Scriptlets are reusable HTML and Dynamic HTML components, similar in concept to Java applets. This guide gives lots of real-world examples, bitmapped menus, interactive text, callbacks, and scrollable components and is targeted at programmers developing Windows-based commercial code.

Homo Sapiens Are Bio-Robots Olga Skorbatyuk,Kate Bazilevsky,2015-08-20 Back in the 80s of the XX century, researcher Andrey Davydov decrypted one of the most ancient sources preserved in this civilization—Shan Hai Jing. This ancient Chinese monument turned out to be the Catalog of human population; meaning—a collection of detailed descriptions of 293 subtypes of the biological type Homo sapiens. This Catalog contains information about each person who lived, lives or will live in the future on planet Earth. Information about the subtype structure is implanted in the form of a program in the unconscious of a person from birth, and this program determines all of his life: his/her personal qualities and character properties, algorithms of life and functioning, hidden motivational spring, abilities, talents, preferences, inclinations, etc. Natural subtype program is that what is called psyche, soul. In addition to a program, Homo sapiens, as a biosystem programmed by nature, has modes of self-regulation and regulation (control from the outside). For colleagues from the scientific environment we are offering our definition of what psyche of Homo sapiens and the Catalog of human population are: The Catalog of human population is a description of a human as a type by subtype structures. Subtype structure (“psyche”, “soul”) is a combination of individual archetypes, recorded at the genetic level (principle). Expressions and interaction of subtype structures in manipulation modes and phenological algorithms are described with adjustments for gender, age and cultural differences. Information is recorded on six factors. Programs and manipulation modes of each subtype differ from one another. For this reason, people differ from each other by internal characteristics, and individual manipulation scenarios are necessary for each person. Homo sapiens is a living system, which, as it turned out, exists and functions strictly on the basis of a natural program implanted from birth, and from this it was concluded that a human is a bio-robot. This is confirmed by that knowledge of the natural individual program and manipulation modes of a person from Shan Hai Jing allows uncovering absolutely everything about this person and making him/her 100% controllable. You might ask: if the Catalog of human population is such a serious scientific discovery, then why it is not being talked about on television, why it is not being mentioned in newspapers, why the scientific world keeps silent and the Internet is packed with unintelligible nonsense about it? If you asked this question, then it means that you are very poorly informed about how the society in which you live is arranged and functions. Since if you knew a little more about society, then you would have immediately understood that the discovery of the Catalog of human population completely destroys not only many scientific dogmas (in biology, anthropology, psychology, sociology, etc.), but also a huge number of public institutions, professions (including very high-profit), as they simply become no longer needed. For this reason it is not a sin not only to keep silent about the scientific discovery, but also to sign a death sentence instead of awarding the Nobel Prize. Essentially, this is what was done and details about this are available in the 5th book of this series. Since not only powerful people do not care about you personally and the masses in general, but also even doctors, who had only one question after learning about this discovery: If all people will be healthy, then who will need us? Therefore, do not waste your time looking for positive feedback about us in any sources for the masses. Maybe instead it makes sense to spend your time getting answers to questions like Who am I?, What am I like?, What is the meaning of my life?, How should I live? not from your own or other people's fantasies, as usual, but from the ancient source, which existed for tens of thousands or maybe even millions of years? No one in this world will take care of you. A human in this civilization is just a resource for someone else's gain. Now each person got a chance to make a choice: should he personally continue being a resource or not. However, these are not our difficulties.

Rethinking and Reforming American Policing Joseph A. Schafer,Richard W. Myers,2022-01-01 Policing in the US and many western nations is in an era of crisis, facing extensive calls for reformation and change. This edited book outlines the major challenges and changes needed to achieve a more stable future for the policing profession and police organizations. The chapters come from innovative police leaders and officers as well as academics with subject matter expertise, to provide insight into how reform can be done with the police. It focusses on how leaders should understand and approach their role during times of instability and uncertainty. It starts with an examination of how policing reached this state of crisis and discusses some interviews conducted with police leaders, particularly chiefs as agents of change and reform. This is followed by chapters from several veteran police leaders and personnel describing some of the factors that brought policing to this critical time of change and reform, how has policing evolved in the late 20th and early 21st centuries, and how that impacts the current environment, and some potential strategies to create meaningful change while considering unintended consequences. The following chapters from academics seek to define paths that policing can take toward needed changes that will increase legitimacy, trust, and equality of policing services. It speaks to students, academics and professionals interested in police organization and administration, police leadership, and contemporary issues in policing and criminal justice.

Survive Jerry Pannone,2022-12-09 'Jerry, I read through your book and was bowled over by its breadth and depth, and by the scholarship in it, and by the clarity and fluency in your writing. Excellent!' Rick Hanson Ph.D., New York Times bestselling author of Buddha’s Brain, and UC Berkeley psychology professor Although the concept of survival is evident in a biological sense, it expands far beyond simple physical survival for the human being. The questions of psychological, emotional, intellectual and spiritual survival, as well as the overriding question of identity all play a role. Who is the ‘me’ that is fighting to survive? That is the existential question we struggle consciously or unconsciously to address.

Class, Identity, and Finding the Right Wine in Schitt’s Creek Kellie Deys,James Deys,Nikki Anderson,2024-05-15 Class, Identity, and Finding the Right Wine in Schitt’s Creek: A Place To Love analyzes the themes of love, place, and identity. The book argues that Schitt’s Creek’s inclusive ideologies and strongly formed characters encourage a process of self-growth and acceptance as well as the value of community.

World Religions and Cults Volume 2 Bodie Hodge,2016-05-01 Recognize and refute the Far East false religions What do these religions teach and why? How can a Christian be an effective witness for Jesus Christ when presented with ideas that are so different from a biblical perspective? How can these religions be refuted and biblical authority be the standard? This eye-opening second volume deals with many Eastern religions like Hinduism, Taoism, New Age, Sikhism, Confucianism, Shinto, and Buddhism, as well as other pagan-based systems like Witchcraft, Voodoo, and Greek

mythology (and many more)! This volume dives into these styles of religions and looks at their origins and their basic tenets as well as why they fall so short. Understanding the basic tenets of these religions helps the Bible believer see the flaws in these philosophies and discern how to be an effective witness for Jesus Christ while standing on the authority of the Bible.

Introduction to Biomedical Instrumentation Barbara L. Christe,2017-12-07 This fully updated second edition provides readers with all they need to understand the use of medical technology in patient care. Incorporating the most recent changes in healthcare, regulations, Standards, and technology, coverage is expanded to include new chapters on device testing, with a particular emphasis on safety inspections, and the interface of medical technology with the electronic medical record. A wide variety of medical instrumentation is discussed, focusing on device types and classifications, and including individual manufacturers as examples. It is designed for readers with a fundamental understanding of anatomy, physiology and medical terminology, as well as electronic concepts such as voltage, current, resistance, impedance, analog and digital signals, and sensors. Additional documents and solutions to end-of-chapter questions accompany the book online, providing biomedical engineering technicians with the resources and tools they need to become knowledgeable and effective members of the patient care team.

The NFL's Pivotal Years Brad Schultz,2021-03-26 Recent years have been among the most challenging in NFL history, culminating in the 2020-21 coronavirus and social justice issues. Yet a complete understanding of where the NFL is today begins with a five-year period that was the most transformative for the league. From 1957 to 1962, the NFL saw: the advent of unionization, with a landmark Supreme Court decision; the legendary 1958 title game, the first to go into sudden death overtime; a challenge from the American Football League that would have important consequences for decades; the introduction of computerization and statistical analysis; the first steps towards globalization; and the hiring of legends Vince Lombardi and Tom Landry, who both contributed to the league's growing mythology. This book describes in detail the key events that helped shape the modern NFL, and why this period was so momentous to the league and its fans.

Intelligence, Creativity and Fantasy Mário S. Ming Kong,Maria do Rosário Monteiro,Maria João Pereira Neto,2019-09-30 The texts presented in Proportion Harmonies and Identities (PHI) - INTELLIGENCE, CREATIVITY AND FANTASY were compiled with the intent to establish a multidisciplinary platform for the presentation, interaction and dissemination of research. The aim is also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture, Arts and Humanities, Design, Engineering, Social and Natural Sciences, and their importance and benefits for the sense of both individual and community identity. The idea of modernity has been a significant motor for development since the Western Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

Composing Women Elfriede Reissig,Leon Stefanija,2022-12-02 This volume presents fifteen musicological perspectives on the creativity of women composers and the question of 'femininity' in Southeastern-European musical cultures from 1918 on. In the questions about and beyond a 'female aesthetics', socio-cultural approaches to the lives of creative women prove to be indispensable for contemporary musicological gender research, because highly complex facts of musical life and social realities in political systems cannot be separated from each other. By this means the exclusion and marginalization of women composers in the national and international music establishment, as well as strategies for overcoming these systems, are made visible and brought to consciousness. This volume therefore focusses on the social, cultural, and biological preconditions of cultural action, and intends to arouse curiosity for multi-layered realities; it aims to increase the reception of the compositional oeuvre of women composers from Southeastern Europe by the global music scene, the musicological discourse, and an engaged audience.

Gramsci's Critique of Civil Society Marco Fonseca,2016-03-31 Antonio Gramsci was an Italian Marxist thinker whose radical ideas on how to build an alternative world from below remain vigorously relevant today. Gramsci's philosophy of praxis critically dissects the institutions of modern liberal democracy to reveal what is perhaps its deepest secret: it is the most successful political system in modernity at preserving an objective condition of domination while transforming it into a subjective conviction of freedom. Based on a careful reading of Gramsci's The Prison Notebooks, Marco Fonseca shows hegemony as more than leadership of elites over subaltern majorities based on consent. Following Gramsci's critique of citizenship, civil society and democracy, including the current project of neoliberal democracy promotion particularly in the Global South, he discloses a hidden process of hegemony that generates the preconditions for consent and, thus, successful

domination. As the struggles from Zapatismo to Chavismo and from the Arab Springs to Spain's Podemos show, liberation is not possible without counter-hegemony. This book will be of interest to activist scholars engaged in the study of Marxism, Gramsci, political philosophy, and contemporary debates about the renewal of Marxist thought and the relevance of revolution and Communism for the twenty-first century.

What Really Works in Special and Inclusive Education David Mitchell, Dean Sutherland, 2020-02-18 This fully revised and updated third edition presents teachers with a range of up-to-date evidence-based strategies they can use to tackle the challenges of inclusive education. An essential resource for the busy educator, each of the twenty-nine strategies explored in this book has a substantial research base drawn from a range of countries, a strong theoretical rationale and clear guidelines on their implementation, as well as cautionary advice where necessary. Key features of the third edition include: An easy to follow structure divided into four categories: behavioural approaches, social strategies, cognitive strategies and mixed strategies Eight new chapters, focusing on topical areas such as neuroscience, social and emotional education, visual learning and communication and the transition from school to post-school environments Updated chapters that consider the most diverse and up-to-date research in education, psychology, health and technology Whilst the focus of this book is on children with special educational needs, the strategies are universally applicable, making this essential reading for all classroom teachers, school leaders, teacher educators and students, educational psychologists, special needs coordinators and consultants and educational researchers.
