Histories of the Future Susan Harding,Daniel Rosenberg,2005-07-21 We live in a world saturated by futures. Our lives are constructed around ideas and images about the future that are as full and as flawed as our understandings of the past. This book is a conceptual toolkit for thinking about the forms and functions that the future takes. Exploring links between panic and nostalgia, waiting and utopia, technology and messianism, prophecy and trauma, it brings together critical meditations on the social, cultural, and intellectual forces that create narratives and practices of the future. The prognosticators, speculators, prophets, and visionaries have their say here, but the emphasis is on small narratives and forgotten conjunctures, on the connections between expectation and experience in everyday life. In tightly linked studies, the contributors excavate forgotten and emergent futures of art, religion, technology, economics, and politics. They trace hidden histories of science fiction, futurism, and millennialism and break down barriers between far-flung cultural spheres. From the boardrooms of Silicon Valley to the forests of Java and from the literary salons of Tokyo to the roadside cafés of the Nevada desert, the authors stitch together the disparate images and stories of futures past and present. *Histories of the Future* is further punctuated by three interludes: a thought-provoking game that invites players to fashion future narratives of their own, a metafiction by renowned novelist Jonathan Lethem, and a remarkable graphic research tool: a timeline of timelines. Contributors. Sasha Archibald, Susan Harding, Jamer Hunt, Pamela Jackson, Susan Lepselter, Jonathan Lethem, Joseph Masco, Christopher Newfield, Elizabeth Pollman, Vicente Rafael, Daniel Rosenberg, Miryam Sas, Kathleen Stewart, Anna Tsing

The War Conspiracy Peter Dale Scott,2013-09-01 Peter Dale Scott examines the many ways in which war policy has been driven by “accidents” and other events in the field, in some cases despite moves toward peace that were directed by presidents. This book explores the “deep politics” that exerts a profound but too-little-understood effect on national policy outside the control of traditional democratic processes. An important analysis into the causes of war and the long-lasting effects that major events in American history can have on foreign and military policies, *The War Conspiracy* is a must-read book for students of American history and foreign policy, and anyone interested in the ways that domestic tragedies can be used to manipulate the country’s direction. First published in 1972, this edition of *The War Conspiracy* is fully updated for the twenty-first century and includes two lengthy additional essays, one on the transition in Vietnam policy in the wake of the Kennedy assassination, and the other discussing the many parallels between that 1963 event and the attacks of 9/11.

Clean Brexit Liam Halligan, Gerard Lyons, 2018-08-16 UPDATED FOREWORD BY GISELA STUART AND UPDATED AFTERWORD BY JACOB REES-MOGG On 23 June 2016, in the biggest ever vote in British history, 17.4 million people chose to leave the EU. So what does the future now hold after this momentous decision? What will life be like in Britain after we end our European marriage? Will Brexit precipitate the doom and gloom that many predict? Drawing on years of experience at the cutting edge of economic, business and policy issues, plus extensive discussions with leading politicians and diplomats across the UK, Europe and the world, Clean Brexit answers these questions and more. Authors and economists Liam Halligan and Gerard Lyons believe great days lie ahead. Brexit is an opportunity to strike deals with the world's fastest-growing economies, boosting British trade and job prospects. Freed from the EU's regulatory stranglehold, the UK can thrive, spreading wealth throughout the whole of the country. Directly elected MPs will once again have the final say over our laws, borders, taxes and trade negotiations. Important, balanced and accessible, Clean Brexit is the ultimate guide to making a success of Britain's divorce from the EU and a source of strength for voters elsewhere in Europe who have long demanded EU reform, but have been rebuffed.

Cities as Sustainable Ecosystems Peter Newman, Isabella Jennings, 2012-09-26 Modern city dwellers are largely detached from the environmental effects of their daily lives. The sources of the water they drink, the food they eat, and the energy they consume are all but invisible, often coming from other continents, and their waste ends up in places beyond their city boundaries. Cities as Sustainable Ecosystems shows how cities and their residents can begin to reintegrate into their bioregional environment, and how cities themselves can be planned with nature's organizing principles in mind. Taking cues from living systems for sustainability strategies, Newman and Jennings reassess urban design by exploring flows of energy, materials, and information, along with the interactions between human and non-human parts of the system. Drawing on examples from all corners of the world, the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability. Some cities have adopted simple strategies such as harvesting rainwater, greening roofs, and producing renewable energy. Others have created biodiversity parks for endangered species, community gardens that support a connection to their foodshed, and pedestrian-friendly spaces that encourage walking and cycling. A powerful model for urban redevelopment, Cities as Sustainable Ecosystems describes aspects of urban ecosystems from the visioning process to achieving economic security to fostering a sense of place.

Electronic Discourse in Language Learning and Language Teaching Lee B. Abraham, Lawrence Williams, 2009-08-27 New technologies are constantly transforming traditional notions of language use and literacy in online communication environments. While previous research has provided a foundation for understanding the use of new technologies in instructed second language environments, few studies have investigated new literacies and electronic discourse beyond the classroom setting. This volume seeks to address this gap by providing corpus-based and empirical studies of electronic discourse analyzing social and linguistic variation as well as communicative practices in chat, discussion forums, blogs, and podcasts. Several chapters also examine the assessment and integration of new literacies. This volume will serve as a valuable resource for researchers, teachers, and students interested in exploring electronic discourse and new literacies in language learning and teaching.

Elections and Exit Polling Fritz J. Scheuren, Wendy Alvey, 2008-06-30 An understanding of the relationship between the product and the process in election polling is often lost. This edited volume unites ideas and researchers, with quality playing the central role. —J. Michael Brick, PhD, Director of the

Survey Methods Unit, Westat, Inc. *Elections and Exit Polling* is a truly unique examination of the specialized surveys that are currently used to track and collect data on elections and voter preferences. Employing modern research from the past decade and a series of interviews with famed American pollster Warren Mitofsky (1934-2006), this volume provides a relevant and groundbreaking look at the key statistical techniques and survey methods for measuring voter preferences worldwide. Drawing on the most current studies on pre-election and exit polling, this book outlines improvements that have developed in recent years and the results of their implementation. Coverage begins with an introduction to exit polling and a basic overview of its history, structure, limitations, and applications. Subsequent chapters focus on the use of exit polling in the United States election cycles from 2000–2006 and the problems that were encountered by both pollsters and the everyday voter, such as how to validate official vote count, confidentiality, new voting methods, and continuing data quality concerns. The text goes on to explore the presence of these issues in international politics, with examples and case studies of elections from Europe, Asia, and the Middle East. Finally, looking to the upcoming 2008 U.S. presidential election, the discussion concludes with predictions and recommendations on how to gather more accurate and timely polling data. Research papers from over fifty eminent practitioners in the fields of political science and survey methods are presented alongside excerpts from the editors' own interviews with Mitofsky. The editors also incorporate their own reflections throughout and conclude each chapter with a Summary Observations section that highlights notable concepts and trends. The appendix features sample questionnaires from actual exit polling scenarios and an extensive bibliography directs the reader to additional references for further study. Combining wisdom from one of the most notable names in the field along with findings from modern research and insightful recommendations for future practices, *Elections and Exit Polling* is an excellent supplement for political science and survey research courses at the upper-undergraduate and graduate levels. It is also a one-of-a-kind reference for pollsters, survey researchers, statisticians, and anyone with a general interest in the methods behind global elections and exit polling.

Expecting the End Kenneth G. C. Newport, Crawford Gribben, 2006 Jesus' promise that the end draws near has spawned an expectation of that grand event across various religious groups. This volume examines the abiding social issues that surround the continued presence of apocalyptic anticipation by setting them in historical, present-day, and future manifestations. Approaching this fervent expectation from a broad perspective, Gribben and Newport explore the contemporary movements with insightful analysis that provokes discussion and even self-reflection.

Exit Crispian Thurlborn, What if the soundtrack to your life was forever stuck, unchanging, on repeat? How far would you go to change the person you are? Tommy and Mary wanted to get out of the city and away from the loop that their life had become. Where better than the backwoods to really forget about everything and find yourself? It is often the quietest places that are the loudest. Silence rings with the echoes of the past bringing with it unwanted memories. Finding himself may prove to be the last thing Tommy wants to do. Remembering to forget is harder than it sounds.
