The Changing Frontier Adam B. Jaffe,Benjamin F. Jones,2015-08-14 In 1945, Vannevar Bush, founder of Raytheon and one-time engineering dean at MIT, delivered a report to the president of the United States that argued for the importance of public support for science, and the importance of science for the future of the nation. The report, Science: The Endless Frontier, set America on a path toward strong and well-funded institutions of science, creating an intellectual architecture that still defines scientific endeavor today. In The Changing Frontier, Adam B. Jaffe and Benjamin Jones bring together a group of prominent scholars to consider the changes in science and innovation in the ensuing decades. The contributors take on such topics as changes in the organization of scientific research, the geography of innovation, modes of entrepreneurship, and the structure of research institutions and linkages between science and innovation. An important

analysis of where science stands today, The Changing Frontier will be invaluable to practitioners and policy makers alike.

The Fog of War James G. Blight,janet M. Lang,2005-03-31 Robert S. McNamara is one of modern America's most controversial figures. His opinions, policies, and actions have led to a firestorm of debate, ignited most

recently by Errol Morris's Academy Award-winning film, The Fog of War. In the companion book, editors James G. Blight and janet M. Lang use lessons from McNamara's life to examine issues of war and peace in the 20th century. McNamara's career spans some of America's defining events—from the end of World War I, through the course of World War II, and the unfolding of the Cold War in Cuba, Vietnam, and around the world. The Fog of War brings together film transcripts, documents, dialogues, and essays to explore what the horrors and triumphs of the 20th century can teach us about the future.

A Guide to Reading Hebrew Inscriptions and Documents Rosemary Wenzerul,2005 When researching a Jewish family, it is extremely likely that you will come across various items and documents written in Hebrew. A Guide to Reading Hebrew Inscriptions and Documents is designed specifically to help those

people (whether Jewish or non-Jewish) who have difficulty in reading or understanding Hebrew. The idea is to compare the Hebrew on a document, photograph, inscription etc with the information shown in the Guide. For example, you may not be able to read the Hebrew inscription on a relative's grave. By referring to the sections in this Guide, this will be easily achieved. All the Hebrew in the book has English explanation, translation and transliteration. Reasons behind some of the inscriptions and Jewish customs both in the home and in the Synagogue have also been included in order to help researchers understand the religious side of their roots. It is very difficult, in fact near impossible, for those of us who are unable to understand or read Hebrew to interpret the Hebrew wording. Being in this position is most frustrating and restrictive. I have, therefore, put together a comprehensive guide which I hope will help resolve this problem. The Guide includes the Hebrew alphabet, Hebrew vowels, numerical values, Jewish calendar, conversion tables, formula to convert a Jewish year to a Gregorian year, how to read headstones, symbols on headstones and their meanings, frequently used Hebrew words with abbreviations found on tombstones, Hebrew given boys' and girls' names, Hebrew letters which are liable to be misread, glossary of Yiddish terms, examples of Hebrew documents/inscriptions, many photographs and much more.

Multidisciplinary Drug Policies and the UN Drug Treaties Brice Ruyver,2002 The last decades, changing societal phenomena concerning the drug problem influenced the national strategies and legal approaches of countries in a significant manner. Indeed, many European and other countries have developed a differentiated, multidisciplinary national drug policy.The pursuance of risk reduction strategies and the possible depenalisation of acts related to personal consumption remain controversial topics, though implemented in several countries. This book gives an overview of the main relevant international legal instruments dealing with the control of the drug problem.The United Nations, as well as the Council of Europe and the European

Union have established an international legal framework to tackle the problem of illicit substances. The reader will find the full texts of the three United Nations drug Convention in annex of this book. On the one hand, the book provides an analysis of the latitude that Parties have within the present United Nations Conventions to develop a differentiated, integrated national drug policy. Specific attention is given to acts related to personal consumption. The latitude is discussed at the different levels of the criminal justice system, being the levels of criminalisation, reaction (including the alternative measures to sanctions and with a focus on exploring the limits and possibilities of pursuing risk reduction policies within the framework of the United Nations Conventions), prosecution, sentencing and execution of sanctions. On the other hand, the book explores the possibilities for reform that have been embedded in the United Nations Conventions.The technique of amending, the modification of substances in the schedules, the possibilities to make reservations and to denounce the Conventions is outlined.
