Performance Analysis for Public and Nonprofit Organizations

XiaoHu Wang, 2010 The book focuses on application of performance analysis tools, not the theory of performance management. This text is an effective learning tool for students in analytical technique courses in public administration and policy programs. With other texts, students may learn about a statistical concept and calculation, but still don't understand the managerial context where the statistical tool applies. Consequently, they often fail to understand the managerial importance of statistical tools they learn, and worse, fail to recognize the correct tool to use when a managerial issue rises. This book corrects this problem by providing a managerial context that bridges statistical concepts and the managerial reality. The managerial context is performance management, in which performance data are presented, monitored, and analyzed. It is in this performance management context that the usefulness and applicability of statistical tools are illuminated for the learner.--BOOK JACKET.

Making Sense of Madness Jim Geekie, John Read, 2009-05-06

The experience of madness - which might also be referred to

more formally as 'schizophrenia' or 'psychosis' – consists of a complex, confusing and often distressing collection of experiences, such as hearing voices or developing unusual, seemingly unfounded beliefs. Madness, in its various forms and guises, seems to be a ubiquitous feature of being human, yet our ability to make sense of madness, and our knowledge of how to help those who are so troubled, is limited. *Making Sense of Madness* explores the subjective experiences of madness. Using clients' stories and verbatim descriptions, it argues that the experience of 'madness' is an integral part of what it is to be human, and that greater focus on subjective experiences can contribute to professional understandings and ways of helping those who might be troubled by these experiences. Areas of discussion include: how people who experience psychosis make sense of it themselves scientific/professional understandings of 'madness' what the public thinks about 'schizophrenia' *Making Sense of Madness* will be essential reading for all mental health professionals as well as being of great interest to people who experience psychosis and their families and friends.

Conditional Citizens Laila Lalami, 2021-10-19 A New York Times Editors' Choice • Finalist for the California Book Award • Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction • Best Book of the Year: Time, NPR, Bookpage, Los Angeles Times In this brilliantly argued and deeply personal work, Pulitzer Prize finalist Laila Lalami recounts her unlikely journey from Moroccan immigrant to U.S. citizen, using her own story as a starting point for an exploration of the rights, liberties, and protections that are traditionally associated with American citizenship. Tapping into history, politics, and literature, she elucidates how accidents of birth—such as national origin, race, and gender—that once determined the boundaries of Americanness still cast their shadows today, poignantly illustrating how white supremacy survives through adaptation and legislation. Weaving together her experiences with an

examination of the place of nonwhites in the broader American culture, Lalami illuminates how conditional citizens are all those whom America embraces with one arm and pushes away with the other.

The Objects of Experience Elizabeth Wood, Kiersten F Latham, 2016-06-16 What if museums could harness the emotional and intellectual connections people have to personal and everyday objects to create richer visitor experiences? In this book, Elizabeth Wood and Kiersten Latham present the Object Knowledge Framework, a tool for using objects to connect museum visitors to themselves, to others, and to their world. They discuss the key concepts underpinning our lived experience of objects and how museums can learn from them. Then they walk readers through concrete methods for transforming visitor-object experiences, including exercises and strategies for teams developing exhibit themes, messages, and content, and participatory experiences.

Health Technology Literacy: A Transdisciplinary Framework for Consumer-Oriented Practice Maryalice Jordan-Marsh, 2010-08-31 Health Technology Literacy: A Transdisciplinary Framework for Consumer-Oriented Practice examines the wide range of resources used by health consumers to inform and support their decisions around their own health care. Today's health consumer is self-monitoring, building supportive social networks online or via cell phone, and engaging in treatment using interactive programs online, on CD or related media. Using evidence-based practice and relevant theories, this unique text analyzes the trend for health care systems to be reactive, while consumers are proactively seeking the health care information they feel they deserve.

Howard Pyle Jill P. May, Robert E. May, 2011 Best remembered as an influential illustrator and teacher, Howard Pyle (1853-1911) produced magnificent artwork and engrossing books and magazine stories about King Arthur, Robin Hood,

swashbuckling pirates, and the American Revolution. He also completed public murals and trained many famous artists and illustrators at the turn of the twentieth century, including N. C. Wyeth and Jessie Willcox Smith. This engaging portrait of the influential American artist, teacher, author, and muralist is the first fully documented treatment of Pyle's life and career.

Drawing on numerous archival sources including Pyle's own letters to provide new perspectives on his life, Jill P. May and Robert E. May reveal Pyle to be a passionate believer that art should be understood and appreciated by the general public. His genteel values and artistic tastes shaped not only his own creative output but his influential work as a teacher, first at the Drexel Institute of Art, Science and Industry in Philadelphia and later at his own school in Delaware's Brandywine River Valley. May and May also show him to be far more supportive of women artists than is generally believed, explaining how he deployed club memberships and relationships with publishers and politicians to advance the prospects of his students. Duly measuring his influence on later artists, May and May detail his quest to lead a distinctively American school of art freed from European models. Amply illustrated with evocative photographs and color reproductions of his own and his students' work, this exceptional volume presents Howard Pyle's creative career and legacy for American popular culture as it has never been seen before.
