Proceedings of the TMS Middle East - Mediterranean Materials Congress on Energy and Infrastructure Systems (MEMA 2015) Ibrahim Karaman,Raymundo Arróyave,Eyad Masad,2016-12-06
This is a collection of papers presented at The TMS Middle East - Mediterranean Materials Congress on Energy and Infrastructure Systems (MEMA 2015), a conference organized by The Minerals, Metals & Materials Society (TMS) and held in Doha, Qatar. The event focused on new materials research and development in applications of interest for Qatar and the entire Middle East and Mediterranean region. The papers in this collection are divided into five sections: (1) Sustainable Infrastructure Materials; (2) Computational Materials Design; (3) Materials for Energy Conversion and Storage; (4) Lightweight and High Performance Materials; and (5) Materials for Energy Extraction and Storage: Shape Memory Alloys.

Organic Transistor Devices for In Vitro Electrophysiological Applications Andrea Spanu,2016-01-22
This thesis reports on a novel system for extracellular recordings of the activity of excitable cells, which relies on an organic, charge-modulated field-effect transistor (FET) called OCMFET. The book shows how, thanks to the intrinsic biocompatibility, lightness, and inexpensiveness of the material used, this new system is able to overcome several problems typical of “classic” electronic and bioelectronic. It provides a full description of the system, together with a comprehensive report of the successful experimental trials carried out on both cardiac and nerve cells, and a concise yet comprehensive overview of bioelectronic interfaces and organic sensors for electrophysiological applications.

Designing Denuclearization Bruce Larkin,2018-02-06 This work canvasses nuclear weapon abolition, proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today. It has an ambitious purpose, to show that nuclear abolition can and should be placed on the public agenda.^a The author terms it interpretive in that it incorporates his commentaries, never hiding his reasons and judgments. It is neither just the facts nor all the facts. It is an encyclopedia in the original meaning of a general course of instruction. He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose, committed to self-instruction. In another sense, he writes, this work is a conversation with the Reader. What is needed to abolish nuclear weapons? His starting-point is this: As long as nuclear weapons are stockpiled and deployed there is risk of their use, which would be catastrophic. Abolition, however, is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo. Even with that, the politics of abolition, bringing the governments of the nuclear weapon states to believe

that abolition is in their interest, is the sine qua non of achieving a world free of nuclear weapons. Larkin's text is written for those, whether practitioners or citizens, interested in designing and bringing about denuclearization. Abolition cannot be achieved by political elites in the absence of broad concurrent public support. Governments, career policy officials and legislators have chosen to assume responsibility for the public agenda. They may be asked must be asked, what they will do to bring about denuclearization.

Pediatric Formulations Daniel Bar-Shalom, Klaus Rose, 2014-01-30 Until the 1990s, it was generally accepted that medicines were first developed for adults and their use in children was investigated later, if at all. One of the main tasks of hospital pharmacies was the manufacturing of child-appropriate formulations in a more or less makeshift way. The first change came in 1997 with U.S. legislation that rewarded manufacturers to do voluntary pediatric research. Ten years later, the European Union passed legislation that required manufacturers to discuss all pediatric aspects, including formulations, with the regulatory authorities as a condition of starting the registration procedure. In consequence, manufacturers must now cover all age groups, including the youngest ones. So far, pediatric formulations were more a focus for academic researchers. Through the changed regulatory environment, there is now a sudden high commercial demand for age-appropriate formulations. This book begins by highlighting the anatomical, physiological and developmental differences between adults and children of different ages. It goes on to review the existing technologies and attempts to draw a roadmap to better, innovative formulations, in particular for oral administration. The regulatory, clinical, ethical and pharmaceutical framework is also addressed.

Medical Sensors And Lab-on-a-chip Devices: Mechanisms, Biofunctionalization And Measurement Techniques Khanna Vinod Kumar, 2018-02-13

Organic Light-Emitting Materials and Devices Zhigang Rick Li, 2017-12-19 Organic Light-Emitting Materials and Devices provides a single source of information covering all aspects of OLEDs, including the systematic investigation of organic light-emitting materials, device physics and engineering, and manufacturing and performance measurement techniques. This Second Edition is a compilation of the advances made in recent years and of the challenges facing the future development of OLED technology. Featuring chapters authored by internationally recognized academic and industrial experts, this authoritative text: Introduces the history, fundamental physics, and potential applications of OLEDs Reviews the synthesis, properties, and device performance of electroluminescent materials used in

OLEDs Reflects the current state of molecular design, exemplifying more than 600 light-emitting polymers and highlighting the most efficient materials and devices Explores small molecules-based OLEDs, detailing hole- and electron-injection and electron-transport materials, electron- and hole-blocking materials, sensitizers, and fluorescent and phosphorescent light-emitting materials Describes solution-processable phosphorescent polymer LEDs, energy transfer processes, polarized OLEDs, anode materials, and vapor deposition manufacturing techniques employed in OLED fabrication Discusses flexible display, the backplane circuit technology for organic light-emitting displays, and the latest microstructural characterization and performance measurement techniques Contains abundant diagrams, device configurations, and molecular structures clearly illustrating the presented ideas Organic Light-Emitting Materials and Devices, Second Edition offers a comprehensive overview of the OLED field and can serve as a primary reference for those needing additional information in any particular subarea of organic electroluminescence. This book should attract the attention of materials scientists, synthetic chemists, solid-state physicists, and electronic device engineers, as well as industrial managers and patent lawyers engaged in OLED-related business areas.

The Hip Resurfacing Handbook K De Smet,P. N. Campbell,C Van Der Straeten,2013-04-22 Hip resurfacing arthroplasty (HRA) using metal-on-metal bearings is an established but specialised technique in joint surgery. Based on the experience of leading experts in the field, The hip resurfacing handbook provides a comprehensive reference for all aspects of this important procedure. The first part of the book reviews and compares all the major hip resurfacing prostheses, their key design features, relevant surgical techniques and clinical results. Part two discusses clinical follow-up of the hip resurfacing patient, including pre- and post-operative examination, acoustic phenomena and rehabilitation. It also covers the use of techniques such as radiography and metal ion measurement, as well as bone scans, ultrasound, CT, MRI, PET and DEXA, to evaluate hip resurfacings. Part three reviews best practice in surgical technique, including the modified posterior and anterior approaches, as well as instrumentation, anaesthesia and revision surgery. Based on extensive retrieval studies, Part four includes examples of the main failure modes in HRA. The final part of the book includes patients' own experiences, a comparison of HRA with total hip arthroplasty (THA), regulatory issues and relevant web sites. Comprehensive in its scope and authoritative in its coverage, The hip resurfacing handbook is a standard work for orthopaedic surgeons and all those involved in HRA. A standard work for orthopaedic surgeons and all those involved in HRA Reviews and compares all the major hip resurfacing prostheses, their key design features, relevant surgical techniques and clinical

results Clinical follow-up of the patient is discussed

ICT Futures Paul Warren,John Davies,David Brown,2008-04-30 Learn all about the major trends and future advancements in ICT! ICT Futures provides an insightful introduction to the major technology trends in Information and Communication Technologies (ICT), and to the economic, commercial and societal environment which is shaping them. The experienced author-team, consisting of experts from both industry and academia, addresses: The interaction between people and technology - how ICT affects every day social practices; the rise of social computing; how the way we interact with information and the devices we use are changing; and how trust can be assured over the Internet. The underlying ICT infrastructure - the semantic web and the semantic intranet; the real-time service-oriented infrastructure; the future optical network; self-managing networks and agents; P2P technologies; pervasiveness; mobility and wireless technology; and how all this infrastructure can be made secure. ICT technology and how it is affecting industries as diverse as health, finance, retail and law. The book covers a vast wealth of material, with a strong focus upon the impending changes to the way ICT operates.This reference is a valuable tool for people in managerial roles, CIOs, CTOs, business and technology strategists, and students undertaking technology MBAs, or technology modules in general MBAs. Professionals working in ICT will also find this book valuable.

Using Information Technology Brian K. Williams,Stacey C. Sawyer,2001 Using Information Technology, 6/e covers the fundamental computing concepts that are part of the digital age, including software, hardware, data, people, and procedures along with expanded coverage on Security and ethics. The text centers on educating today's technology consumer, using themes of ethics, the Internet, and communications to demonstrate how the changing world of technology influences our lives and the decisions we make..

PRO WAP, AREHART,Charlie Arehart,2000-07-04 The essentials of the technology that delivers Internet content to wireless devices--Wireless Application Protocol (WAP)--are explained in this book, ideal for any developer who needs to develop and deploy this cutting-edge application.

Foundations of Orientation and Mobility, 3rd Edition William R. Wiener,Richard L. Welsh,Bruce B.

Blasch,2010 Foundations of Orientation and Mobility, the classic professional reference and textbook has been completely revised and expanded to two volumes by the most knowledgeable experts in the field. The new third edition includes both the latest research in O&M and expanded information on practice and teaching strategies. Volume 2, Instructional Strategies and Practical Applications, contains detailed information in such as areas as the use of the senses in O&M; teaching O&M to different age and ability groups; the use of technology-based travel systems; and travel in complex environments. No O&M student or professional can afford to be without this essential resource.

Handbook of Human Factors in Web Design, Second Edition Kim-Phuong L. Vu,Robert W.

Proctor,2011-04-25 The Handbook of Human Factors in Web Design covers basic human factors issues relating to screen design, input devices, and information organization and processing, as well as addresses newer features which will become prominent in the next generation of Web technologies. These include multimodal interfaces, wireless capabilities, and agents that can improve convenience and usability. Written by leading researchers and/or practitioners in the field, this volume reflects the varied backgrounds and interests of individuals involved in all aspects of human factors and Web design and includes chapters on a full range of topics. Divided into 12 sections, this book covers: historical backgrounds and overviews of Human Factors and Ergonomics (HFE) specific subfields of HFE issues involved in content preparation for the Web information search and interactive information agents designing for universal access and specific user populations the importance of incorporating usability evaluations in the design process task analysis, meaning analysis, and performance modeling specific Web applications in academic and industrial settings Web psychology and information security emerging technological developments and applications for the Web the costs and benefits of incorporating human factors for the Web and the state of current guidelines The Handbook of Human Factors in Web Design is intended for researchers and practitioners concerned with all aspects of Web design. It could also be used as a text for advanced courses in computer science, industrial engineering, and psychology.

A Philosophy of Evidence Law H. L. Ho,2008-03-06 The dominant approach to evaluating the law

on evidence and proof focuses on how the trial system should be structured to guard against error. This book argues instead that complex and intertwining moral and epistemic considerations come into view when departing from the standpoint of a detached observer and taking the perspective of the person responsible for making findings of fact. Ho contends that it is only by exploring the nature and content of deliberative responsibility that the role and purpose of much of the law can be fully understood. In many cases, values other than truth have to be respected, not simply as side-constraints, but as values which are internal to the nature and purpose of the trial. A party does not merely have a right that the substantive law be correctly applied to objectively true findings of fact, and a right to have the case tried under rationally structured rules. The party has, more broadly, a right to a just verdict, where justice must be understood to incorporate a moral evaluation of the process which led to the outcome. Ho argues that there is an important sense in which truth and justice are not opposing considerations; rather, principles of one kind reinforce demands of the other. This book argues that the court must not only find the truth to do justice, it must do justice in finding the truth.

International Business Information on the Web Sheri R. Lanza, 2001 The sites selected for this Web research guide are specific to the needs of business researchers, providing annotated listings of global business information sources. Researchers will find resources such as finding financial information on a foreign company, identifying overseas buyers and suppliers, and finding a market research study or an industry analysis from another country.

Unsaturated Soils, Two Volume Set Eduardo E. Alonso, Antonio Gens, 2010-09-02 In recent decades the development of unsaturated soil mechanics has been remarkable, resulting in momentous advances in fundamental knowledge, testing techniques, computational procedures, prediction methodologies and geotechnical practice. The advances have spanned the full spectrum of theory and practice. In addition, unsaturated materials exhibiting complex behaviour such as residual soils, swelling soils, compacted soils, collapsing soils, tropical soils and solid wastes have been integrated in a common understanding of shared behaviour features. It is also noteworthy that unsaturated soil mechanics has proved surprisingly fruitful in expanding to other neighbouring areas such as swelling rocks, rockfill mechanics, and freezing soils. As a consequence, geotechnical engineering involving unsaturated soils can be now approached from a more rational and systematic perspective leading towards an improved and more effective practice. *Unsaturated Soils* contains the papers presented at the 5th International Conference on Unsaturated Soil (Barcelona, Spain, 6-8 September 2010). They report significant advances in the areas of unsaturated soil behaviour, testing techniques, constitutive

and numerical modelling and applications. The areas of application include soil-atmosphere interaction, foundations, slopes, embankments, pavements, geoenvironmental problems and emerging topics. They are complemented by three keynote lectures and three general reports covering general issues of modelling, testing and applications. Unsaturated Soils is a comprehensive record of the state-of-the art in unsaturated soil mechanics and a sound basis for further progress in the future. The two volumes will serve as an essential reference for academics, researchers and practitioners interested in unsaturated soils.
